EnCognitive = Enlightened Mind. En(ENlightened), Cognitive (pertaining to the mind).

Our Mission: To preserve and disseminate the knowledge of Natural Medicine so people can make *informed consent* decisions regarding their health.

Natural Medicine

For every drug that benefits a patient, there is a natural substance that can achieve the same effect. ~Pfeiffer's Law~ Dr. Carl C. Pfeiffer, MD, PhD

Man-made drugs are created by synthesizing the bioactive substances (alkaloids, phytochemicals, nutrients) in plants. The pharmaceutical companies do not use the natural substances because they cannot be patented. The petrochemicals in man-made drugs and vaccines are toxins and are biochemically incompatible with the biochemistry of humans; thus the horrendous side effects, diseases, and deaths caused by pharmaceutical drugs

and vaccines.

To sell chemotherapy as a 'therapy' is most likely the biggest deceit in the history of medicine. Whoever masterminded this chemo-torture deserves a monument in hell." —Dr. Ryke Geerd Hamer, MD

"There is no evidence whatsoever of the ability of vaccines to prevent any diseases. To the contrary, there is a great wealth of evidence that they cause serious side effects." —Dr. Viera Scheibner

"My clinical experience is that in America, when people die from cancer, they are NOT actually dying from cancer, but instead, they are dying from the medical treatment itself. They are dying from chemotherapy, radiation, and surgery. Again: They are not dying from the cancer. They are being killed by the medical doctors and their medical treatment." —Dr. Richard Shulze, ND, MH

Orthomolecular Medicine: Orthomolecular Medicine (the right nutrients in the right amounts), commonly referred to as Nutritional Medicine, as conceptualized by double-Nobel Laureate Dr. Linus Pauling, aims to restore the optimum environment of the body by correcting imbalances or deficiencies based on individual biochemistry using substances [nutrients] natural to the body such as vitamins, minerals, amino acids, trace elements, water, lipids, and essential fatty acids.

The necessity of teaching mankind not to take drugs and medicines is a duty incumbent upon all who know their uncertainty and injurious effects; and the time is not far distant when the drug system will be abandoned. --
Dr. Charles Armbruster, M. D.

"As a retired physician, I can honestly say that unless you are in a serious accident, your best chance of living to a ripe old age is to avoid doctors and hospitals and learn nutrition, herbal medicine and other forms of natural medicine unless you are fortunate enough to have a naturopathic physician

available. Almost all drugs are toxic and are designed only to treat symptoms and not to cure anyone. Vaccines are highly dangerous, have never been adequately studied or proven to be effective, and have a poor risk/reward ratio. Most surgery is unnecessary and most textbooks of medicine are inaccurate and deceptive. Almost every disease is said to be idiopathic (without known cause) or genetic—although this is untrue. In short, our main stream medical system is hopelessly inept and/or corrupt. The treatment of cancer and degenerative diseases is a national scandal. The sooner you learn this, the better off you will be." –Dr. Allan Greenberg, MD, Dec. 24, 2002

The food you eat can be either the safest and most powerful form of medicine or the slowest form of poison. --Dr. Ann Wigmore

"The doctor of the future will give no medication, but will interest his patients in the care of the human frame, diet, and in the cause and prevention of disease." --Thomas Edison, inventor of the lightbulb, phonograph, and motion picture.

Let food be your medicine and medicine be your food. --Hippocrates (460 - 377 B.C.), considered the father of Western medicine.

"You can trace every sickness, every disease, and every ailment to a mineral deficiency." --Linus Pauling

The medicine of the future must not only conform to the rules of nature, avoiding the use of alien drugs where possible, but also conform to human rules for ethics and objective science. --Dr. Carl C. Pfeiffer, PhD, MD

"You are what you eat." --Ancient adage. Everything we eat is digested, metabolized, and absorbed by our cells. What we eat today becomes our cells tomorrow.

To be a physician in the truest sense, one must consider the patient's troubles from all these basic standpoints—is it mechanical, nutritional, or

psychological, or is it a varied combination of all three? The human body is not comprised of separate entities, but is a working unit in its entirety and so must be treated as such. --Dr. Fred Loffler, ND

"One of the first duties of the physician is to educate the masses not to take medicine...The good physician treats the disease; the great physician treats the patient who has the disease...The person who takes medicine must recover twice, once from the disease and once from the medicine." —Dr. William Osler (1849 - 1919)

You are what you THINK.

You are what you EAT

**and what your parents ate and
what your ancestors ate.**

“If civilized man is to survive, he must incorporate the fundamentals of primitive nutritional wisdom into his modern life-style.” —Dr. Weston A. Price

Don't count calories. Count nutrients.

Food is life. Anyone who doesn't believe this, don't eat for four weeks and see what happens.

Food is science. The purpose of eating is to nourish our cells. When we feed our cells the wrong foods, they become sick. Then we become sick.

Holistic Health. Complete health consists of many components. The main three are physical health, mental health, and emotional health. The body, mind, and spirit are entwined and are an inseparable part of holistic health; each one affects the other.

Physical Health. Physical health requires that we connect with Nature to get plenty of fresh air, sunlight, and exercise. In addition, a balanced diet of whole foods, organic when possible, should be a part of our daily lives. When

in doubt, eat what our ancestors ate, which is the Palaeolithic Diet (but with less meat and more fruits and vegetables). The processed foods nowadays that come in cans, bags, bottles, and containers are not really food but are “food-like stuff” chemicals. Anything with a long-shelf life should be avoided in favour of perishable whole foods, such as fruits, vegetables, grains, legumes, nuts, seeds, algae, fungi, eggs, herbs, spices, essential oils, and animal protein in moderation. Eight hours of sleep a night is also essential to physical health.

Mental Health. One study suggested that 90% of doctor visits were due to stress. Stress has a debilitating effect on our brain, immune system, and other major organs. Left untreated, stress can develop into disease or exacerbate an existing one. Other common mental health issues include anxiety, grief, depression, shame, frustration, panic attacks, and unresolved or suppressed psychological problems. A daily routine of exercise, meditation, and cognitive behaviour therapy (CBT) has been shown to significantly improve a person’s mood.

Emotional Health. Our emotional health is mostly determined by our relationships, hobbies, purpose, and social circle. Are we happy in our personal relationships? Do the people we work with uplift us? What are we doing in our spare time that makes us happy? Have we found our meaning and purpose in life? Are the people we interact with outside of work a positive influence? Do they add value to our lives and make us better? The goal of emotional health is to become content or happy so that we can enjoy all life has to offer.

There are many facets to health. Like anything else in life, we have to work hard to achieve good health.

"The greatest wealth is health." —Virgil (70 - 19 BC), Roman Poet

The Pharmaceutical-Industrial Complex and the Medical-Industrial Complex

It may surprise most people that modern medicine is a for-profit industry. The first fiduciary (legal) duty of the drug companies, hospitals, and most of its clerks (medical doctors) is to maximize profit for their shareholders, and not to make people healthy. Making a profit is perfectly acceptable in a capitalist society; however, profit should not come at the expense of precious lives.

The bottom line is that the medical systems are controlled by financiers in order to serve financiers. Since you cannot serve people unless they get sick, the whole medical system is designed to make people sicker and sicker. —Dr. Guylaine Lancot, MD

"There is so much bungling, guesswork, faulty diagnosis and coverup, both inside and outside of the hospitals, that the doctors conceal their manslaughter cases by calling them "Accidents." There are so many doctor caused diseases that they have given them a name, "iatrogenic." It means doctor-caused diseases. People think they go to the hospitals to get well—to be healed, but instead, millions of them are made sicker by the treatments, and even killed by the poison drugs, operations and experiments. Most, maybe all, of the hospitals have a separate section set aside for their "iatrogenic diseases." Why are they kept separate? It is probably because the doctors don't want the visitors to see what they have done to them, and also to use them for experimentation. They justify this by claiming they must experiment to find a cure for the diseases they have caused. But they use the same deadly drugs and treatments that caused the diseases in the first place.' —Dr. Eleanor McBean, ND, PhD, "Vaccines: The Biggest Medical Fraud in History"

They are running a monopoly and they will lie, cheat and steal to keep it that way...Every day, consumers are becoming more educated about the benefits of holistic and alternative methods. This is something that the medical establishment obviously fears and wants to crush with false propaganda. —Dr Eva Snead

"Mammography simply joins the long list of therapies and procedures where desire for profits and lowering of world population levels have superseded the welfare of our citizens." —Dr. James Howenstine, MD, (more than 30% of breast cancer cases are misdiagnosed due to mammography, causing unnecessary treatment)

"Mammography is a fraud. The scientific literature clearly says that what we are recommending is over-exaggerated. The Jan. 8, 2000 issue of The Lancet carried an article stating that mammography is unjustifiable. Actually, of the eight studies done, six of them show that it doesn't work--and yet the American public believes that this is a time honored, definite way of saving

their lives from breast cancer." —Dr. John McDougall, M.D.

Vaccination is the biggest medical fraud in history

Over 150 years of data clearly show that vaccination is based on fraud. Vaccines did not save a single life. Vaccines did not prevent one disease. Contagious/communicable diseases are transmitted primarily through the air, water, food, or contact. Look at the charts below. It's not a coincidence that the diseases dropped at roughly the same time frame:

- garbage collection reduced airborne contagions,
- water treatment/purification reduced waterborne contagions,
- refrigeration wiped out food contagions,
- plumbing (toilets, sinks) reduced physical-contact contagions (not STD-sexually transmitted diseases-though).
- washing machines, soap, deodorant, improved personal hygiene
- readily availability of food improved nutrition

Vaccines had little to do with the eradication of diseases. As the charts show, some vaccines actually caused the diseases they were supposed to prevent. Did you know vaccine ingredients are more poisonous than those used to make meth? And that vaccines have more side effects than cigarettes?

40 years of "asbestos science."

40 years of "tobacco science."

200 years and counting of "vaccine science."

WHAT'S IN A VACCINE?

- **ammonium sulfate** (salt)
Suspected gastrointestinal, liver, nerve and respiratory system poison.
- **beta-propiolactone**
Known to cause cancer, suspected gastrointestinal liver, respiratory, skin and sense organ poison.
- **genetically modified yeast, animal, bacterial & viral DNA**
Can be incorporated into the recipient's DNA and cause unknown genetic mutations.
- **latex rubber**
Can cause life-threatening allergic reactions.*
- **monosodium glutamate**
(MSG)/glutamate/glutamic acid
Being studied for mutagenic, teratogenic (developmental malformation and monstrosities) and reproductive effects. A neurotoxin. Allergic reactions can range from mild to severe.*
- **aluminium**
Implicated as a cause of brain damage; suspected factor in Alzheimer's Disease, dementia, seizures, and comas. Allergic reactions can occur on skin.*
- **formaldehyde** (formalin)
Major constituent of embalming fluid; poisonous if ingested. Probable carcinogen; suspected gastrointestinal, liver, immune system, nerve, reproductive system, and respiratory poison. Linked to leukemia, brain, colon, and lymphatic cancer.
- **micro-organisms**
Live and killed viri and bacteria or their toxins. The polio vaccine was contaminated with a monkey virus now turning up in human bone, lung-lining (mesothelioma), brain tumors and lymphomas.
- **polysorbate 80**
Known to cause cancer in animals.
- **tri (n) butylphosphate**
Suspected kidney and nerve poison
- **glutaraldehyde**
Poisonous if ingested. Causes birth defects in experimental animals.
- **gelatin**
Produced from selected pieces of calf and cattle skins, de-mineralized cattle bones and pork skin. Allergic reactions have been reported.*
- **gentamicin sulfate & polymyxin B** (antibiotics)
Allergic reactions can range from mild to life threatening.*
- **mercury** (thimerosal)
One of the most poisonous substances known. Has an affinity for the brain, gut, liver, bone marrow and kidneys. Minute amounts can cause nerve damage. Symptoms of mercury toxicity are similar to those of autism.
- **neomycin sulfate** (antibiotic)
Interferes with Vitamin B6 absorption. An error in the uptake of B6 can cause a rare form of epilepsy and mental retardation. Allergic reactions can be mild to life threatening. *
- **phenol/phenoxyethanol** (2-PE)
Used as antifreeze. Toxic to all cells and capable of disabling the immune system's primary response mechanism.
- **human & animal cells**
Human cells from aborted fetal tissue and human albumin. Pig blood, horse blood, rabbit brain, guinea pig, dog kidney, cow heart, monkey kidney, chick embryo, chicken egg, duck egg, calf serum, sheep blood and others.

* When babies are hours or days old, it is impossible to know if they have an allergy.

“A major cause of the Roman Empire's decline, after six centuries of world dominance was its replacement of stone aqueducts by lead pipes for the transport and supply of drinking water. Roman engineers, the best in the world, turned their fellow citizens into neurological cripples. Today our own "best and brightest," with the best of intentions, achieve the same end through childhood vaccination programmes yielding the modern scourges of hyperactivity learning disabilities, autism, appetite disorders, and impulsive violence.” **Harris L. Coulter, Ph.D.**

“The entire vaccine program is based on massive FRAUD.”—Dr. Russell L. Blaylock, M.D., neurosurgeon, editorial staff of Journal of American Physicians and Surgeons

“Drug companies are not here to bring health to the population but to SCAM them on one level for vast amounts of money.” —Sir William Osler, MD, FRS, FRCP

According to the drug companies, the most common side effects (adverse reactions) of many vaccines are allergies, autoimmune diseases, cancer, autism, and death. Vaccines don't prevent diseases. Vaccines cause diseases.

“Vaccinations do not work. They don't work at all.” —Dr. Lorraine Day, MD

“Don't get your flu shot.” —Dr. Raymond Francis, D.Sc., M.Sc., RNC, chemist, MIT graduate

Every smallpox epidemic was caused by the smallpox vaccine. Polio was caused by the pesticide DDT and the Salk polio vaccine. The Salk polio vaccine caused polio, cancer, and death in children. It was discontinued in the early 1970s. Measles? You have a higher chance of dying from a lightning strike.

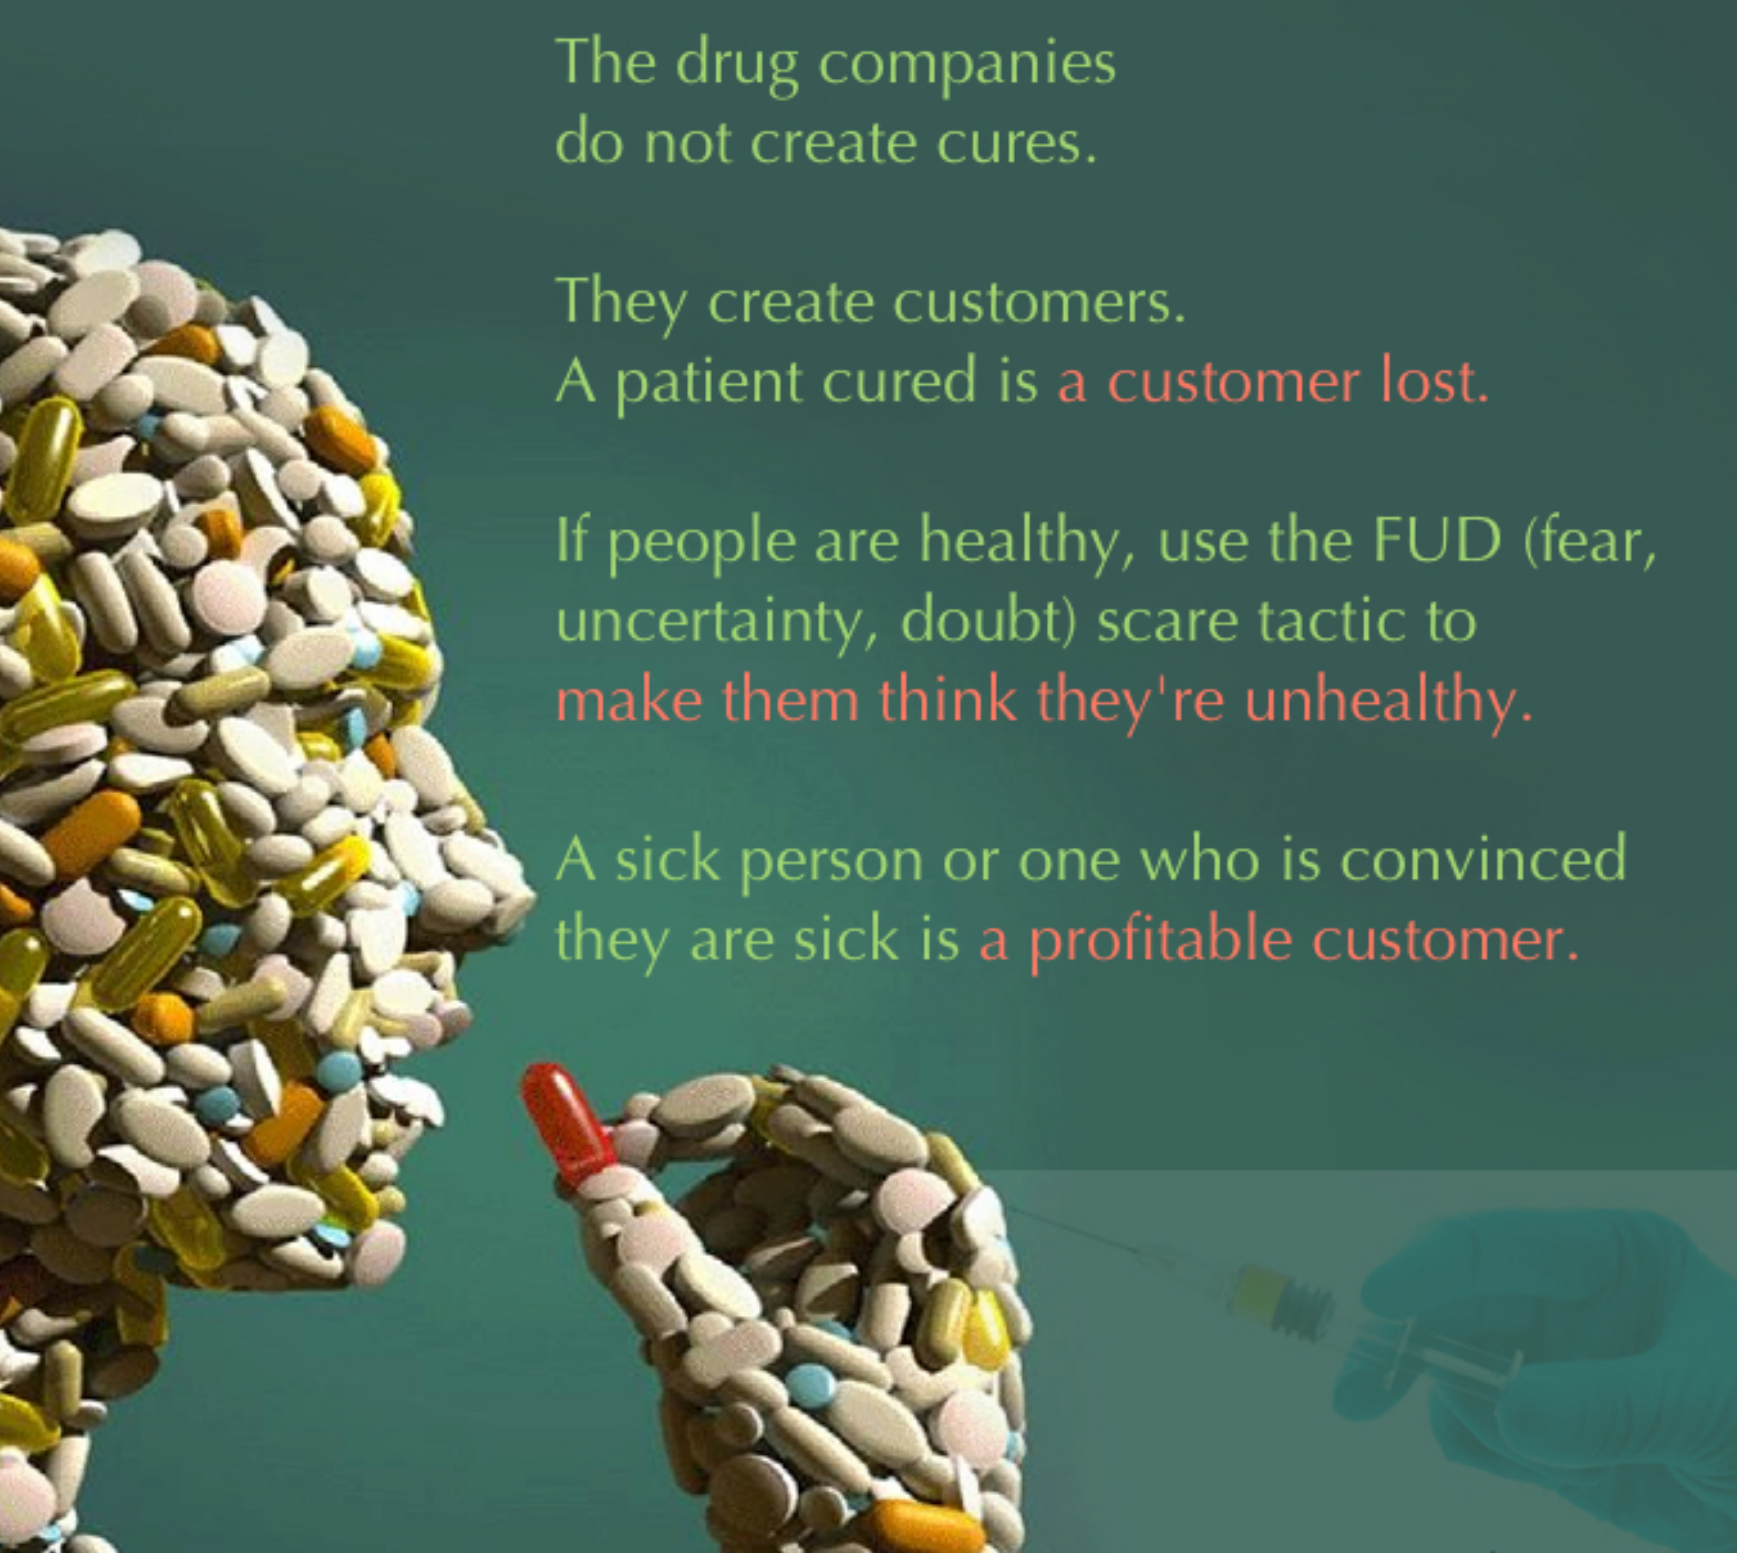

For over 150 years, EVERY single study demonstrated that vaccinated people have a higher disease and death rates than the unvaccinated. What else can you expect when you inject disease and poisons into the body.

“The greatest LIE ever told is that vaccines are safe and effective.”—Dr. Leonard Horowitz, MPH (Master of Public Health), DMD, MA, Harvard University graduate

“The vaccine industry is itself a FRAUD. I spent my whole career studying vaccines.”—Dr. Shiv Chopra, B.V.S., A.H., M.Sc., Ph.D., Fellow of the World Health Organization

"A lot of money can be made from healthy people who believe they are sick. Pharmaceutical companies sponsor diseases and promote them to prescribers and consumers. Ray Moynihan, Iona Heath, and David Henry give examples of 'disease mongering' and suggest how to prevent the growth of this practice..There's a lot of money to be made from telling healthy people they're sick. Some forms of medicalising ordinary life may now be better described as disease mongering: widening the boundaries of treatable illness in order to expand markets for those who sell and deliver treatments. Pharmaceutical companies are actively involved in sponsoring the definition of diseases and promoting them to both prescribers and consumers. The social construction of illness is being replaced by the corporate construction of disease." —*Selling Sickness: The Pharmaceutical Industry and Disease Mongering* , Ray Moynihan, journalist, Iona Heath, general practitioner, and David Henry, professor of clinical pharmacology

I've never known anyone on pharmaceutical drugs who is healthy. Most people visit a medical doctor with one problem. They're put on multiple drugs and end up with multiple problems—caused by the side effects. And they still have the original problem.

The drug companies
do not create cures.

They create customers.
A patient cured is a customer lost.

If people are healthy, use the FUD (fear,
uncertainty, doubt) scare tactic to
make them think they're unhealthy.

A sick person or one who is convinced
they are sick is a profitable customer.

Medical Errors - A Leading Cause of Death

The JOURNAL of the AMERICAN MEDICAL ASSOCIATION (JAMA) written by Dr Barbara Starfield, MD, MPH, of the Johns Hopkins School of Hygiene and Public Health, shows that medical errors may be the third leading cause of death in the United States.

The report apparently shows there are 2,000 deaths/year from unnecessary surgery; 7000 deaths/year from medication errors in hospitals; 20,000 deaths/year from other errors in hospitals; 80,000 deaths/year from infections in hospitals; 106,000 deaths/year from non-error, adverse effects

of medications - these total up to 225,000 deaths per year in the US from iatrogenic causes which ranks these deaths as the # 3 killer. Iatrogenic is a term used when a patient dies as a direct result of treatments by a physician, whether it is from misdiagnosis of the ailment or from adverse drug reactions used to treat the illness. (drug reactions are the most common cause).

I no longer believe in Modern Medicine. I believe that despite all the super technology and elite beside manner, the greatest danger to your health is the doctor who practices Modern Medicine. I believe that Modern Medicine's treatments for disease are seldom effective, and that they're often more dangerous than the diseases they're designed to treat. I believe more than 90% of Modern Medicine could disappear from the face of the Earth—doctors, hospitals, drugs, and equipment—and the effect on our health would be immediate and beneficial. --Dr. Robert Mendelsohn, MD

Medical Errors in Hospitals Kill More Patients than Most Diseases

An article published in the September, 2013 issue [September 2013 - Volume 9 - Issue 3 - p 122–128] of the *Journal of Patient Safety* estimates that there are between 210,000 and 400,000 deaths per year associated with medical errors in hospitals. That would make medical errors the third-leading cause of death in the United States, behind heart disease and cancer...

A 2013 review of studies in the *Journal of Patient Safety* suggested medical errors cause somewhere between 210,000 and 400,000 deaths each year in the U.S. In a landmark report (PDF) 15 years ago (1999).

Our investigation has found that thousands of adolescents, children, and adults have been hospitalized for psychiatric treatment they didn't need; that hospitals hire bounty hunters to kidnap patients with mental health insurance; that patients are kept against their will until their insurance benefits run out; that psychiatrists are being pressured by the hospitals to

increase profit; that hospitals 'infiltrate' schools by paying kickbacks to school counselors who deliver students; that bonuses are paid to hospital employees, including psychiatrists, for keeping the hospital beds filled; and that military dependents are being targeted for their generous mental health benefits. I could go on, but you get the picture. --U.S.

Representative Patricia Schroeder, 1992 Senate hearing. By Lynn Payer, *Disease- Mongers: How Doctors, Drug Companies, and Insurers Are Making You Feel Sick*

Prescription Drugs - Leading Killer in USA

According to information we have received, a statistical study of hospital deaths in the U.S. conducted at the University of Toronto revealed that pharmaceutical drugs kill more people every year than are killed in traffic accidents.

The study is said to show that more than two million American hospitalized patients suffered a serious adverse drug reaction (ADR) within the 12-month period of the study and, of these, over 100,000 died as a result. The researchers found that over 75 per cent of these ADRs were dose-dependent, which suggests they were due to the **inherent toxicity of the drugs** rather than to allergic reactions.

The data did not include fatal reactions caused by accidental overdoses or errors in administration of the drugs. If these had been included, it is estimated that another 100,000 deaths would be added to the total every year.

The researchers concluded that ADRs (Adverse Drug Reactions) are now the fourth leading cause of death in the United States after heart disease, cancer, and stroke.

The pharmaceutical industry has spent over \$9 billion since 2004 [over \$12 billion as of 2014] to settle thousands of criminal and civil complaints

related to the illegal marketing of drugs that kill or injure a million Americans annually – and yet, they control the policies that are used by CS [civil service] personnel to force drug/vaccine use. ----Office of Medical and Scientific Justice Journal

A half million people died from the use of sleeping pills in 2010 alone. --
Dr. Carolyn Dean, [Death by Modern Medicine](#)

Doctors Are More Dangerous Than Gun Owners

Drugs are the primary cause of accidental liver poisoning in North America. In fact, even seeking medical attention today is becoming more dangerous.

The U.S. Department of Health Human Services reports that there are 700,000 U.S. doctors and they cause 120,000 accidental deaths every year, or 0.171 accidental deaths per physician.

The FBI says there are 80 million gun owners in the U.S., which cause 1,500 accidental deaths per year or just 0.000188 deaths per gun owner.

It's a trifle shocking that doctors are 9,000 times more dangerous than gun owners! And almost everyone has more than one doctor. [Over 90% of mass shootings were committed by people on anti-depressants or anti-psychotics. Mentally ill people don't kill other people. Mentally ill people on psychiatric drugs kill other people].

It is difficult to get a man to understand something, when his salary depends upon his not understanding it! --Upton Sinclair

FIREARMS vs. DOCTORS/DRUGS

Annual US death rates for firearms versus the US medical system

DEATHS BY FIREARMS *

31,940

HOMICIDE:	11,101
SUICIDE:	19,766
UNINTENTIONAL SHOOTING:	851
UNDETERMINED INTENT:	222

DEATHS BY THE US MEDICAL SYSTEM

783,936

ADVERSE DRUG REACTIONS:	106,000
OUTPATIENTS:	199,000
MEDICAL ERRORS:	98,000
OTHER MEDICAL REALATED: **	380,936

DID YOU KNOW?

According to U.S. government statistics, FDA-approved prescription drugs kill 290 Americans every single day, meaning that for mass shootings to approach that number, you'd have to see a Colorado Batman movie massacre take place every hour of every day, 365 days a year. That's how dangerous doctors and FDA-approved prescription medications really are. ***

FDA advisers tied to pharmaceutical industry

An article by Dennis Cauchon, the USA TODAY Newspaper

According to a USA Today study, more than half of the experts hired to advise the government on the safety and effectiveness of medicine have financial relationships with the pharmaceutical companies that will be helped or hurt by their decisions. These experts are hired to advise the Food and Drug Administration on which medicines should be approved for sale, what the warning labels should say and how studies of drugs should be designed. The experts are supposed to be independent, but USA TODAY found that 54% of the time, they have a direct financial interest in the drug or topic they are asked to evaluate. These conflicts include helping a pharmaceutical company develop a medicine, then serving on an FDA advisory committee that judges the drug.

The conflicts typically include stock ownership, consulting fees or research grants.

Federal law generally prohibits the FDA from using experts with financial conflicts of interest, but according to the article, the FDA has waived the restriction more than 800 times since 1998.

These pharmaceutical experts, about 300 on 18 advisory committees, make decisions that affect the health of millions of Americans and billions of dollars in drugs sales. With few exceptions, the FDA follows the committees' advice.

The thing that bugs me is that the people think the FDA (Food and Drug Administration) is protecting them. It isn't. What the FDA is doing and what the public thinks it's doing are as different as night and day. --Dr Herbert Ley, former Commissioner of the FDA.

GlaxoSmithKline fined \$3bn after bribing doctors to increase drugs sales

Sales reps in the US encouraged to mis-sell antidepressants Paxil and

Wellbutrin and asthma treatment Advair

The pharmaceutical group GlaxoSmithKline has been fined \$3bn (£1.9bn) after admitting bribing doctors and encouraging the prescription of unsuitable antidepressants to children. Glaxo is also expected to admit failing to report safety problems with the diabetes drug Avandia in a district court in Boston on Thursday.

The company encouraged sales reps in the US to mis-sell three drugs to doctors and lavished hospitality and kickbacks on those who agreed to write extra prescriptions, including trips to resorts in Bermuda, Jamaica and California.

The company admitted corporate misconduct over the antidepressants Paxil and Wellbutrin and asthma drug Advair.

Psychiatrists and their partners were flown to five-star hotels, on all-expenses-paid trips where speakers, paid up to \$2,500 to attend, gave presentations on the drugs. They could enjoy diving, golf, fishing and other extra activities arranged by the company.

GSK also paid for articles on its drugs to appear in medical journals and "independent" doctors were hired by the company to promote the treatments, according to court documents... —www.TheGuardian.com

Pharmaceutical corporations and individual executives accused of genocide

Pharmaceutical companies including Pfizer, Merck, GlaxoSmithKline, Novartis, Amgen and Astra Zeneca are accused of deliberately preventing life-saving natural alternatives to drug based treatments from being applied in prevention and cure...A worldwide disinformation campaign undertaken by these companies is said to have caused the death of millions of people...The charges are contained in a detailed complaint filed by Dr. Mathias Rath in the

International Criminal Court in the Hague.

"The main reason we take so many drugs is that drug companies don't sell drugs, they sell lies about drugs. This is what makes drugs so different from anything else in life...Virtually everything we know about drugs is what the companies have chosen to tell us and our doctors...the reason patients trust their medicine is that they extrapolate the trust they have in their doctors into the medicines they prescribe. The patients don't realise that, although their doctors may know a lot about diseases and human physiology and psychology, they know very, very little about drugs that hasn't been carefully concocted and dressed up by the drug industry...If you don't think the system is out of control, please email me and explain why drugs are the third leading cause of death...If such a hugely lethal epidemic had been caused by a new bacterium or a virus, or even one-hundredth of it, we would have done everything we could to get it under control." —Peter Gotzsche , [*Deadly Medicines and Organised Crime: How Big Pharma Has Corrupted Healthcare*](#)

Corporation: A separate **person** under the law.

The first legal (fiduciary) duty of a corporation:
Maximize profit for its shareholders.

As people, the pharmaceutical companies are guilty of the following crimes:

- FRAUD
- BRIBERY
- MANSLAUGHTER
- NEGLIGENCE
- MURDER
- ANTITRUST
- MASS MURDER
- CORRUPTION
- FABRICATION OF DATA
- ORGANIZED CRIME

Why would you trust your health
or your children's health to
convicted criminals?

Politicians and health officials are controlled by pharmaceutical industry

Allen Jones, Commonwealth of Pennsylvania Office of Inspector General (OIG)

Drug companies write checks to politicians—they write checks to politicians on both sides of the aisle...As an OIG Investigator, I attempted to expose evidence of major pharmaceutical company wrongdoing. The industry was influencing state officials with trips, perks, lavish meals, transportation to and first-class accommodations in major cities. Some state employees were paid honorariums of up to \$2,000 for speaking in their official capacities at drug-company sponsored events...the drug industry methodically compromised the decision making of elected and appointed public officials to gain access to captive populations of mentally ill individuals in prisons and state mental health hospitals...The pharmaceutical industry bypassed governmental safeguards and medical review by creating and marketing TMAP as a “treatment model” that was instituted in various states as an administrative decision by a select few politically appointed officials....

The treatment model accepted by these state officials had a fundamental requirement rooted deep within it: Doctors must first treat their patients with the newest, most expensive drugs patented by the pharmaceutical companies. The state doctors treating mental illness could choose which patented drug to use, but effectively could not choose to use less expensive generic drugs unless and until the patented drugs failed.

At Pfizer I was expected to increase profits at all costs, even when sales meant endangering lives. —John Kopchinski, former Pfizer sales representative. Mr. Kopchinski won a \$52 million qui tam lawsuit against Pfizer in 2009.

Drug Companies Bribing Doctors

Pharmaceutical companies have curried the favor of practicing physicians for many years... As the cost of development and marketing of pharmaceuticals increased, the drug companies efforts to attract the allegiance of practicing physicians intensified.

The state of medicine has deteriorated to the point that it is taken for granted that you can't find experts who aren't on the take. --Dr. Howard Brody, on physicians and others in the healthcare industry.

“It is simply no longer possible to believe much of the clinical research that is published, or to rely on the judgment of trusted physicians or authoritative medical guidelines. I take no pleasure in this conclusion, which I reached slowly and reluctantly over my two decades as an editor of the New England Journal of Medicine.” —Dr. Marcia Angell, physician, author, former editor-in-chief of the New England Medical Journal. [The Truth About the Drug Companies: How They Deceive Us and What to Do About It](#)

In 2014, pharmaceutical companies spent \$4 billion marketing to consumers and \$24 billion marketing to doctors.

These advertising efforts, which began with gifts to practicing doctors and medical students, have become a massive campaign to mold the attitudes, thoughts, and policies of practicing physicians. Drug companies hire detail men to visit physicians' offices and to distribute drug samples. They describe the indications for these drugs and attempt to persuade physicians to use their products. Like any other salesman, they denigrate the products of their competitors while glossing over the shortcomings of their own. Detail men have no formal medical or pharmacological training and are not regulated by any state or federal agencies. Despite their lack of training, these salesmen have been very effective. Their sales campaigns have been so successful within the United States that the average physician today has virtually been trained by the drug detail man. This practice has led to widespread overuse of drugs by both physicians in their everyday practice and the lay public....

With the exception of heroin and cocaine, 85 percent of all drugs currently abused in the streets are manufactured by 'ethical' drug companies.... Gross sales forecasts from these 'ethical' drug companies deliberately include profits made from illicit sales to drug peddlers.

University Scientists--the Willing Pawns

Drug companies employ many means in bribing doctors and medical institutions. Dr Levin writes:

Young physicians are offered research grants by drug companies. Medical schools are given large sums of money for clinical trials and basic pharmaceutical research. Drug companies regularly host lavish dinner and cocktail parties for groups of physicians. They provide funding for the establishment of hospital buildings, medical school buildings, and 'independent' research institutes. --Dr. Levin

The pharmaceutical industry has purposefully moved to develop an enormous amount of influence within medical teaching institutions. This move was greatly facilitated by several factors. The first was the economic recession, which caused a marked constriction in federal funding for research programs. Academic scientists lacked funding for pet research projects. The second was the tremendous interest that academic scientists held in biotechnology, the stock market, and the possibility of becoming millionaires overnight. The third is the fact that academic physicians tend to lack real clinical experience. In the university, the physician is an expert in esoteric disease, end-stage disease, and animal models of human disease. He or she has little or no experience with the day-to-day needs of the chronically ill patient or the patient with very early symptoms of serious illness. As the academic physician does not depend upon the good will of the patient for his or her livelihood, the patient's well-being becomes of minor consideration to him or her. All these factors make the academic physician a very poor judge of treatment efficacy and a willing pawn of health industrialists.

The further I looked the more shocked I became. I found that the whole vaccine business was indeed a gigantic hoax. Most doctors are convinced that they are useful, but if you look at the proper statistics and study the instances of these diseases, you will realize that this is not so...My final conclusion after forty years or more in medicine is that the unofficial policy of the WHO (World Health Organization) and the unofficial policy of the "Save the Children" fund and other vaccine promoting organizations is one of murder and genocide. I cannot see any other possible explanation. You cannot immunize sick children, malnourished children,

and expect to get away with it. You'll kill far more children than would have died from natural infection. --Dr. Archie Kalokerinos, Ph.D., A.M.M., M.B.B.S., F.A.P.M.

Dear Pharmaceutical Companies,

You are a \$1 trillion industry that can't prevent or cure the common cold.

What makes you think you can prevent or cure complicated diseases like polio, measles, cancer, diabetes, etc.?

Relying on Doctors and Scientists for Medical Advice

"Data fabrication is so widespread that it is called 'making' in the Japanese pharmaceutical industry, 'graphiting' or 'dry labelling' in the United States...Pharmaceutical companies face great temptations to mislead health authorities about the safety of their products." --Dr John Braithwaite

The #1 Selling Drug in the U.S. is Abilify, an Antipsychotic

From Ferguson, Missouri to the deserts of Afghanistan the specter of US aggression is fueling the flames of civil strife and military conflict around an increasingly volatile planet. Much of the problem may be connected to the breakdown of the American psyche.

Before attempting to shed some light on America's mental condition, let's open with a pop quiz question: What is the top-selling prescription drug in the US? Nope, it's not Viagra, not Prozac, forget the Percocet. If you don't know, take a peek in the medicine cabinet because there's a high chance it's lurking in there, right behind that purple people eater. Yes, you got it. The top-selling drug in the Land of the Free and Disturbed is an antipsychotic, happily named Abilify [a drug used to treat mentally disturbed patients].

Once again: The top-selling drug in America is an antipsychotic. Now some might say that's mental... Aside from the fact that Americans are buying antipsychotic medication by the truckload, there's another disturbing thing about Abilify: Nobody, not even the Food and Drug Administration (FDA), has any idea what makes it effective. —RT.com News, Oct. 2015

"Psychiatric drugs create abnormal brain states, which are often unpleasant and impair normal intellectual and emotional functions along with other harmful consequences." —Joanna Moncrieff, [*The Myth of the Chemical Cure*](#)

Doctors rely heavily on information supplied by the pharmaceutical industry. But proper research suggests that just six percent of this

information is supported by hard evidence. All this leads to another important issue—we the public are taking record levels of drugs but our health is not improving. I see some patients who take more than ten medications a day and I feel that these multiple drugs may do a lot more harm than good. The pharmaceutical industry has invested a fortune in making us sick and neurotic. Put bluntly, the profit motive of the pharmaceutical industry is corrupting doctors and destroying society's sense of well-being. The medical profession continues to be in denial over the influence of the pharmaceutical industry. Many doctors are addicted to its hospitality and freebie culture, so beware; your prescription may not have been issued for all the right reasons. --GERARD KIELTY, I.R.B., I.D.E.

I.R.B. (Institutional Review Board), I.D.E. (Investigational Device Exemption)

In the US, it is legal for a physician to receive up to \$50,000 from the pharmaceutical industry. If the amount is \$50,000 or less, it does not have to be reported to an ethics committee. Therefore, not deemed a conflict of interest in the eyes of the law. It is a common practice for physicians, particularly MDs (Medical Doctors), to receive gifts, money, trips, equipment, etc., from pharmaceutical companies.

The FDA protects the big drug companies, and is subsequently the government's police powers, they attack those who threaten the big drug companies. People think that the FDA is protecting them. It isn't. What the FDA is doing, and what the public thinks it is doing are as different as night and day. —Dr. Herbert Ley, former FDA Commissioner

The reason is that many FDA officials were former employees of the drug industry. This is made possible by the corrupt "revolving door" phenomenon.

In the 1930s, the tobacco industry concluded that people trusted their physicians. So when physicians brought forth evidence that cigarettes were causing lung and other cancers in their patients, the tobacco industry used

physicians in its marketing campaigns. This continued for five decades, until the 1980s, when faced with government pressure and a barrage of class action lawsuits did the tobacco industry admit that cigarettes caused lung and other cancers. Although it had known about it for approximately four decades.

The pharmaceutical industry is using the same deceptive strategy with drugs and vaccines that the tobacco industry had used with cigarettes.

Cigarettes can cause lung cancer. Antidepressants can cause suicidal and homicidal tendencies because they suppress emotions (over 90% of mass shooters in the US were on antidepressants or antipsychotics). Vaccines can cause autism and other brain diseases. Read the warning labels, ingredients, and independent studies on these products. Big Tobacco, Big Oil, Big Pharma. They operate the same way: Profit First.

40 years of "asbestos science."

40 years of "tobacco science."

Now 200 years and counting of "vaccine science."

"I would like to dispel the myth that the pharmaceutical industry is in the business of health and healing. In fact, the pharmaceutical industry is in the business of disease maintenance and symptoms management. They are not in the business to cure cancer, to cure Alzheimer's, or to cure heart disease. Because if they were, they would be in the business of putting themselves out of business." —Gwen Olsen, former 15-year pharmaceutical sales rep.,

Informed Consent

The patient's right of self-decision can be effectively exercised only if the patient possesses enough information to enable an informed choice. The patient should make his or her own determination about treatment. The physician's obligation is to present the medical facts accurately to the patient or to the individual responsible for the patient's care and to make recommendations for management in accordance with good medical practice. The physician has an ethical obligation to help the patient make choices from among the therapeutic alternatives consistent with good medical practice. Informed consent is a basic policy in both ethics and law that physicians must honor, unless the patient is unconscious or otherwise incapable of consenting and harm from failure to treat is imminent. In special circumstances, it may be appropriate to postpone disclosure of information, (see Opinion E-8.122, "Withholding Information from Patients").

Physicians should sensitively and respectfully disclose all relevant medical information to patients. The quantity and specificity of this information should be tailored to meet the preferences and needs of individual patients. Physicians need not communicate all information at one time, but should assess the amount of information that patients are capable of receiving at a given time and present the remainder when appropriate. (I, II, V, VIII)

First, do no harm. --Hippocratic Oath (still sworn by modern physicians)

"Last year over a million people left the same suicide note: 'SHOPPING LIST: butter, eggs, mayo, potato chips, ham, bacon.' " - Physicians Committee for Responsible Medicine

Every person is the author of their own health or disease. --Buddha

The belief that for-profit man-made pills and chemicals can treat illness and disease is medical quackery

"As a medical doctor, I practiced medicine for over 20 years in different countries. I went to different provinces in Canada, and I lived in the U.S. for 6 years. I got to know the medical system. I was questioning, "Why is everything so expensive? Why are we getting sicker and sicker and health care is getting more and more expensive, and everybody's unhappy?" I realized that different systems are totally alike. They have different names but, whether they are a capitalist system, like we have in the U.S., or socialized, like in France, or in between, like in Canada, the bottom line is that the

medical systems are all alike. They all serve financiers and not the people. That's the basic thing. **The bottom line is that the medical systems are controlled by financiers in order to serve financiers. Since you cannot serve people unless they get sick, the whole medical system is designed to make people sicker and sicker.** When I realized this, I had the choice either to obey the medical authorities and keep my mouth shut or to obey my conscience and speak out. I made a decision to obey my conscience, knowing what the punishments were when one doesn't obey the system. So, I wrote the book [*The Medical Mafia: How to Get Out of It Alive and Take Back Our Health and Wealth.*](#) —Dr. Guylaine Lanctot, M.D.

Monsanto To Be Sued For Crimes Against Humanity At International Criminal Court

Last week, dozens of environmental activist groups, farmers, and sustainable food organizations joined forces at the COP21 Paris to announce that Monsanto will face international tribunal over crimes against humanity and the environment. Their trial is set to take place in October of 2016; more specifically, on World Food Day...The announcement took place at the climate summit because Monsanto is a major contributor to anthropogenic greenhouse gas emissions, not to mention the depletion of soil and water resources, declining biodiversity, species extinction, and the displacement of millions of small farmers worldwide...

The crimes against humanity include a long list. Recently, the World Health Organization found that Glyphosate (main active ingredient in Monsanto's roundup herbicide) can cause cancer. A recently study also found it to be 125 times more toxic than regulators had claimed. This is disturbing because glyphosate is found in the urine of humans all over the world.

It's not only glyphosate that is a cause for concern, but also agent orange. The fact is that Monsanto's chemicals are linked to birth defects, deadly kidney disease, cancer, and more. Keep in mind this does not even include the pesticides that are sprayed on non-organic food.

The list is long, and I encourage you to do your research if you are curious. There is no shortage of information out there when it comes to this subject. — <http://www.collective-evolution.com/2015/12/07/monsanto-sued-for-crimes-against-humanity-at-international-criminal-court/>

16 Quotes on Pharmaceutical Drugs from MDs (Medical Doctors)

1. "The cause of most disease is in the poisonous drugs physicians superstitiously give in order to effect a cure." -- Charles E. Page, M.D.
2. "Medicines are of subordinate importance because of their very nature, they can only work symptomatically." -- Hans Kutsche, M.D.
3. "If all the medicine in the world were thrown into the sea, it would be bad for the fish and good for humanity" -- O.W. Holmes, (Prof. of Med. Harvard University)
4. "Drug medications consists in employing, as remedies for disease, those things which produce disease in well persons. Its materia medica is simply a lot of drugs or chemicals or dye-stuffs in a word poisons. All are incompatible with vital matter; all produce disease when brought in contact in any manner with the living; all are poisons." -- R.T. Traill, M.D., in a two and one half hour lecture to members of congress and the medical profession, delivered at the Smithsonian Institute in Washington D.C.
5. "Every drug increases and complicates the patients condition." -- Robert Henderson, M.D.
6. "Drugs never cure disease. They merely hush the voice of nature's protest, and pull down the danger signals she erects along the pathway of transgression. Any poison taken into the system has to be reckoned with later on even though it palliates present symptoms. Pain may disappear, but the patient is left in a worse condition, though unconscious of it at the time." -- Daniel. H. Kress, M.D.
7. "The greatest part of all chronic disease is created by the suppression of acute disease by drug poisoning." -- Henry Lindlahr, M.D.
8. "Every educated physician knows that most diseases are not appreciably helped by medicine." -- Richard C. Cabot, M.D. (Mass. Gen. Hospital)
9. "Medicine is only palliative, for back of disease lies the cause, and this

cause no drug can reach." -- Wier Mitchel, M.D.

10. "The person who takes medicine must recover twice, once from the disease and once from the medicine." -- William Osler, M.D.

11. "Medical practice has neither philosophy nor common sense to recommend it. In sickness the body is already loaded with impurities. By taking drug - medicines more impurities are added, thereby the case is further embarrassed and harder to cure." -- Elmer Lee, M.D., Past Vice President, Academy of Medicine.

12. "Our figures show approximately four and one half million hospital admissions annually due to the adverse reactions to drugs. Further, the average hospital patient has as much as thirty percent chance, depending how long he is in, of doubling his stay due to adverse drug reactions." -- Milton Silverman, M.D. (Professor of Pharmacology, University of California)

13. "Why would a patient swallow a poison because he is ill, or take that which would make a well man sick." -- L.F. Kebler, M.D.

14. "What hope is there for medical science to ever become a true science when the entire structure of medical knowledge is built around the idea that there is an entity called disease which can be expelled when the right drug is found?" -- John H. Tilden, M.D.

15. "The necessity of teaching mankind not to take drugs and medicines is a duty incumbent upon all who know their uncertainty and injurious effects; and the time is not far distant when the drug system will be abandoned." -- Charles Armbruster, M. D.

16. "We are prone to thinking of drug abuse in terms of the male population and illicit drugs such as heroin, cocaine, and marijuana. It may surprise you to learn that a greater problem exists with millions of women dependent on legal prescription drugs." -- Robert Mendelsohn, M.D

What some doctors have said about vaccines

"My suspicion, which is shared by others in my profession, is that the nearly 10,000 SIDS deaths that occur in the United States each year are related to one or more of the vaccines that are routinely given children. The pertussis vaccine is the most likely villain, but it could also be one or more of the others." --Dr. Mendelsohn, M.D.

"The evidence for indicting immunisations for SIDS is circumstantial, but compelling. However, the keepers of the keys to medical-research funds are not interested in researching this very important lead to the cause of an ongoing, and possibly preventable, tragedy. Anything that implies that immunisations are not the greatest medical advance in the history of public health is ignored or ridiculed. Can you imagine the economic and political import of discovering that immunisations are killing thousands of babies?" --Dr. Douglass M.D.

"Only after realising that routine immunisations were dangerous did I achieve a substantial drop in infant death rates. The worst vaccine of all is the whooping cough vaccine... it is responsible for a lot of deaths and for a lot of infants suffering irreversible brain damage. In susceptible infants, it knocks their immune systems about, leading to irreparable brain damage, or severe attacks or even deaths from diseases like pneumonia or gastro-enteritis and so on." --Dr. Kalokerinos, M.D.

"Delay of DPT immunisation until 2 years of age in Japan has resulted in a dramatic decline in adverse side effects. In the period of 1970-1974, when DPT vaccination was begun at 3 to 5 months of age, the Japanese national compensation system paid out claims for 57 permanent severe damage vaccine cases, and 37 deaths. During the ensuing six year period 1975-1980, when DPT injections were delayed to 24 months of age, severe reactions from the vaccine were reduced to a total of eight with three deaths. This represents

an 85 to 90 percent reduction in severe cases of damage and death." --
Raymond Obomsawin, M.D.

"Autism may be a disorder linked to the disruption of the G-alpha protein, affecting retinoid receptors in the brain. A study of sixty autistic children suggests that autism may be caused by inserting a G-alpha protein defect, the pertussis toxin found in the D.P.T. vaccine, into genetically at-risk children." -
-Mary N. Megson, M.D.

"This report describes six mothers who received live virus vaccines and one who received a Hepatitis B vaccine during pregnancy after having received an MMR booster five months prior to conception. All the children who resulted from these pregnancies have had developmental problems, six out seven (85%) were diagnosed with autism, and the seventh seems to exhibit symptoms often associated with autistic spectrum disorders." --F.
Edward Yazbak, MD

"Every day new parents are ringing us. They all have the same tragic story. Healthy baby, child, teenager, usually a boy, given the DPT (diphtheria, pertussis and tetanus) or DT (diphtheria and tetanus), MMR or MMR booster followed by a sudden fall or slow, but steady decline into autism or other spectrums disorder."--The Hope Project (Ireland)

"There is no evidence whatsoever of the ability of vaccines to prevent any diseases. To the contrary, there is a great wealth of evidence that they cause serious side effects." -- Dr. Viera Scheibner

"My data proves that the studies used to support immunisation are so flawed that it is impossible to say if immunisation provides a net benefit to anyone or to society in general. This question can only be determined by proper studies which have never been performed. The flaw of previous studies is that there was no long term follow up and chronic toxicity was not looked at. The American Society of Microbiology has promoted my research...and thus acknowledges the need for proper studies." --John B. Classen, M.D., M.B.A.

"The medical authorities keep lying. Vaccination has been a disaster on the immune system. It actually causes a lot of illnesses. We are changing our genetic code through vaccination." --Guylaine Lancot M.D. Canadian author of the best-seller 'Medical Mafia'.

Jonas Salk, inventor of the IPV, testified before a Senate subcommittee that nearly all polio outbreaks since 1961 were caused by the oral polio vaccine.

"Crib death" was so infrequent in the pre-vaccination era that it was not even mentioned in the statistics, but it started to climb in the 1950s with the spread of mass vaccination against diseases of childhood. --Harris L.Coulter, PhD.

"These data show that DPT vaccination may be a generally unrecognised major cause of sudden infant and early childhood death, and that the risks of immunisation may outweigh its potential benefits. A need for re-evaluation and possible modification of current vaccination procedures is indicated by this study." --William C. Torch, M.D., Director of Child Neurology, Department of Paediatrics, University of Nevada School of Medicine

"You cannot be in the presence of a profoundly vaccine damaged child and not know that child could be your own. And you cannot try to comfort a mother who has just buried a baby who has died from a vaccine or a disease and not know that you could be the one standing over the grave. When it happens to your child, the risks are 100 percent." -Anonymous

"Vaccination is not necessary, not useful, does not protect. There are twice as many casualties from vaccination as from AIDS." --Dr. Gerhard Buchwald, West Germany, specialist of internal diseases and participant in about 150 trials of vaccination victims.

Dr. Michael Odent has written a letter in the JAMA (1994) where his figures show a five times higher rate of asthma in pertussis immunised children compared to non-immunised children. He is also quoted in the International

Vaccination Newsletter (Sept. 1994): "Immunised children have more ear infections and spend more days in hospital."

Every drug that has been recalled by the FDA...

was first proven to be "safe and effective" by the FDA

"The public is surely entitled to convincing proof, beyond all reasonable doubt, that artificial immunisation is in fact a safe and effective procedure, in no way injurious to health, and that the threat of the corresponding natural diseases remain sufficiently clear and urgent to warrant mass inoculation of everyone, even against their will if necessary. Unfortunately, such proof has never been given." --Richard Moskowitz, M.D., Journal of the American Institute of Homeopathy, March 1983 (76:7)

"Vaccination is expensive and represents a cost of one billion dollars annually. It therefore benefits the industry; most notably, the multinational manufacturers. One sells the vaccines. The other then provides the arsenal of medications to respond to the numerous complications that follow. Their profits increase while our expenses go through the roof. To the point where we have simply had it up to here and are ready to accept the unacceptable, such as socialised medicine in the United States, for example." --Dr Lancetot MD

In the May 24, 1996, New Zealand Medical Journal, J. Barthelow Classen, MD, a former researcher at the U.S. National Institutes of Health (NIH) and the founder and CEO of Classen Immunotherapies in Baltimore, reported that juvenile diabetes increased 60 per cent following a massive hepatitis B vaccination campaign for babies six weeks or older in New Zealand from 1988 to 1991. In the October 22, 1997, Infectious Diseases in Clinical Practice, Classen showed that Finland's incidence of diabetes increased 147 per cent in children under five after three new vaccines were introduced in the 1970s, and that diabetes increased 40 per cent in children aged 5 to 9 after the addition of the MMR and Hib vaccines in the 1980s. He concluded that "the rise in IDDM [juvenile onset diabetes] in the different age groups correlated with the number of vaccines given."

Yet some parents and doctors, concerned about the future, are looking beyond the present. "What we forget is that millions of years of evolution have taken place on this planet, and up until the last 100 years, humans have lived in relative harmony with microbes. Yes, there have been epidemic infectious diseases in history, but they have always resolved themselves. I don't think there is any real appreciation for what we may be doing by using so many vaccines to try to eradicate so many organisms. If we stay the present course, will mankind be free from infectious disease but crippled by chronic disease? Will eradication of feared diseases, such as AIDS, through mass vaccination be one of man's greatest triumphs or will we live in fear of deadly mutations of microbes that have outsmarted man's attempt to

eradicate them? We may look back at the crossroads we are at today and wish we had decided to make peace with nature instead of trying to dominate it." -- Richard Moscowitz, MD

"This..forced me to look into the question of vaccination further, and the further I looked the more shocked I became. I found that the whole vaccine business was indeed a gigantic hoax. Most doctors are convinced that they are useful, but if you look at the proper statistics and study the instances of these diseases you will realise that this is not so . . . My final conclusion after forty years or more in this business [medicine] is that the unofficial policy of the World Health Organisation and the unofficial policy of the 'Save the Children's Fund' and ... [other vaccine promoting] organisations is one of murder and genocide. . . . I cannot see any other possible explanation. . . . You cannot immunise sick children, malnourished children, and expect to get away with it. You'll kill far more children than would have died from natural infection." --Dr Kalokerinos MD

"Two or three years ago there was a rash of positive HIV and hepatitis patients in Baltimore among people who would otherwise not be expected to have a positive test. When studied all of these people had received the influenza vaccine four to six weeks prior and this was rapidly covered up by the press." -- Dr. Eva Snead, Feb 2000

Nine die in flu tragedy as epidemic hits nursing home (Daily Express 1/1/1999) Nine pensioners died within days of each other after a suspected flu epidemic swept the nursing home where they lived. An investigation has been launched after it emerged all the victims suffered severe chest infections despite having the flu vaccinations.

If vaccines are so effective in preventing disease why have epidemics occurred around the world following mass vaccination programs? In the Philippines for example, "after ten years of compulsory inoculation against smallpox (25 million shots) over 170,000 got smallpox and 75,000 deaths were recorded between 1911 and 1920" (from the Townsend Letter for Doctors article "Are

Vaccines Generally Detrimental to the Human Defence System," Feb/Mar 1994).

"Sudden Infant Death Syndrome has been reported following administration of DPT. The significance is unclear. 85% of SIDS cases occur in the period 1 through 6 months of age, with the peak incidence at age 2 to 4 months." -- From the accompanying insert to Connaught Labs DPT shot.

"There has been a frightening increase in cases of autism that has not been explained. There are a number of anecdotal reports from parents that symptoms of autism have appeared close to the time of the (MMR) vaccine." Jane Orient, M.D., executive director of the Association of American Physicians and Surgeons and clinical lecturer in medicine at the University of Arizona College of Medicine, and a professor of clinical medicine at the Oregon Institute of Science and Medicine.

Even the WHO (World Health Organisation) has admitted, disease and mortality rates in Third World countries have no direct correlation with immunisation procedures or medical treatment, but they are closely related to the standard of hygiene and diet. A 1973 issue of Scientific American revealed the same finding : that "over 90% of all contagious disease was eliminated by vastly improved water systems, sanitation, living conditions and transportation of food." Mass vaccinations did not appear on the scene until a century after the decline in infectious diseases started (1850-1940), but inoculations were, and still are given full credit. --Susan DeSimone

"Up to 90% of the total decline in the death rate of children between 1860-1965 because of whooping cough, scarlet fever, diphtheria, and measles occurred before the introduction of immunisations and antibiotics." ---Dr. Archie Kalokerinos, M.D.

"The mechanics of vaccination to build immunity, on the other hand, is quite unnatural. Rather than space exposure to a relatively minuscule level of micro-organisms in a gradual manner, massive quantities of antigens are

introduced into the body through a series of vaccinations that are given right in a row over a short period of time. All vaccines, with the exception of the OPV (oral polio vaccination) are injected directly into the bloodstream, bypassing the mucosal immune system known as the secretory IgA. The secretory IgA is the first in a series of defensive levels within the immune system. It serves as a buffer, filtering microbes so that the impact of these invading organisms is greatly reduced once it reaches the bloodstream. The IgA allows the antigen to be removed in the same manner in which it arrived - through the mucosal barrier - by sneezing, coughing and sweating. So a vaccine that has been injected "gives the body no warning, no generalised inflammatory response, no chance to recognise, duplicate or defend itself against future challenges from typical antigens," writes Dr. Mendelsohn in *How to Raise a Healthy Child In Spite of Your Doctor*.

A recent topical example: the diphtheria case, and the "fear" created by this one, extremely mild, case in an unvaccinated child. Dr Ossi Mansoor, a principal doctor regarding vaccination policy, stated on Radio Pacific, "The figures we have are that in the 1920s there were 800 deaths every year" (from diphtheria). Yet the New Zealand Government's statistics show the average yearly number was below 100, also that the average death rate per 10,000 mean of population fell from 6.08 to 0.20 before the use of the diphtheria vaccine. --Southland Times 30-Sep-1998

"I've been practicing for 40 years, and in the past 10 years the children have been sicker than ever."--Dr Doris J.Rapp, paediatric allergist.

"I once believed in Jenner; I once believed in Pasteur. I believed in vaccination. I believed in vivisection. But I changed my views as the result of hard thinking."--Dr. Hadwen

"Measles, mumps, rubella, hepatitis B, and the whole panoply of childhood diseases are a far less serious threat than having a large fraction (say 10%) of a generation afflicted with learning disability and/or uncontrollable aggressive behaviour because of an impassioned crusade for universal

vaccination.....Public policy regarding vaccines is fundamentally flawed. It is permeated by conflicts of interest. It is based on poor scientific methodology (including studies that are too small, too short, and too limited in populations represented), which is, moreover, insulated from independent criticism. The evidence is far too poor to warrant overriding the independent judgements of patients, parents, and attending physicians, even if this were ethically or legally acceptable." --Association Of American Physicians & Surgeons

"If you want the truth on vaccination you must go to those who are not making anything out of it. If doctors shot at the moon every time it was full as a preventive of measles and got a shilling for it, they would bring statistics to prove it was a most efficient practice, and that the population would be decimated if it were stopped."---Dr Allinson

"To pass our examinations and get qualified, we must accept what our teachers tell us. In other words, we must cultivate what Josh Billings called 'A well-balanced mind---one that will balance in any direction required.'"--
Major R. Austin M.R.C.S., L.R.C.P

"The greatest threat of childhood diseases lies in the dangerous and ineffectual efforts made to prevent them through mass immunisation....There is no convincing scientific evidence that mass inoculations can be credited with eliminating any childhood disease." --Dr. Robert Mendelsohn, M.D.

"I think that no person would permit anybody to get close to them with an inoculation if they would really know how they are made, what they carry, what has been lied to them about them and what the real percent of danger is of contracting such a disease which is minimal."---Dr. Eva Snead

"There are significant risks associated with every immunisation and numerous contraindications that may make it dangerous for the shots to be given to your child....There is growing suspicion that immunisation against relatively harmless childhood diseases may be responsible for the dramatic

increase in autoimmune diseases since mass inoculations were introduced. These are fearful diseases such as cancer, leukaemia, rheumatoid arthritis, multiple sclerosis, Lou Gehrig's disease, lupus erthematosus, and the Guillain-Barre syndrome." --Dr. Mendelsohn, M.D.

"Probably 20% of American children-one youngster in five--- suffers from 'development disability'. This is a stupefying figure..We have inflicted it on ourselves.. 'development disabilities' are nearly always generated by encephalitis. And the primary cause of encephalitis in the USA and other industrialised countries is the childhood vaccination program. To be specific, a large proportion of the millions of US children and adults suffering from autism, seizures, mental retardation, hyperactivity, dyslexia, and other shoots or branches of the hydraheaded entity called 'development disabilities', owe their disorders to one or another of the vaccines against childhood diseases." --Harris Coulter, PhD

"It is pathetic and ludicrous to say we ever vanquished smallpox with vaccines, when only 10% of the population was ever vaccinated." - Dr. Glen Dettman.

"There is no evidence that any influenza vaccine thus far developed is effective in preventing or mitigating any attack of influenza. The producers of these vaccines know that they are worthless, but they go on selling them anyway." - Dr. J. Anthony Morris (formerly Chief Vaccine Control Officer at the US Federal Drug Admin.)

"There is a great deal of evidence to prove that immunisation of children does more harm than good." - Dr. J. Anthony Morris (formerly Chief Vaccine Control Officer at the US Federal Drug Admin.)

"There is insufficient evidence to support routine vaccination of healthy persons of any age." - Paul Frame, M.D., Journal of Family Practice

"Official data shows that large scale vaccination has failed to obtain any

significant improvement of the diseases against which they were supposed to provide protection" - Dr. Sabin, developer of Polio vaccine.

"All vaccination has the effect of directing the three values of the blood into or toward the zone characteristics of cancer and leukaemia...Vaccines do predispose to cancer and leukaemia." -Professor L.Vincent - founder of Bioelectronics

"Many here voice a silent view that the Salk and Sabin Polio Vaccines, being made from monkey kidney tissue, has been directly responsible for the major increase in leukaemia in this country." - Dr F. Klenner, M.D.

"Provocation polio. That is the truth about those outbreaks of polio. And I offer a well considered personal opinion that polio is a man made disease." - Viera Scheibner, Ph.D.

"Even to this day, the government, the FDA is refusing to use the sophisticated biotechnology to evaluate the contaminants in the vaccines such as the polio vaccines that they are administering. I think (people) would be appalled that some of the vaccines that are currently being used are still laced with viruses." -Leonard Horowitz., D.M.D., M.A., M.P.H.

"May as well consult a butcher on the value of vegetarianism as a doctor on the worth of vaccination."---Bernard Shaw

"The vaccinations are not working, and they are dangerous.. We should be working with nature." --- Lendon H.Smith, M.D.

"For a paediatrician to attack what has become the 'bread and butter' of paediatric practice is equivalent to a priest denying the infallibility of the pope." - Dr Robert Mendelsohn, M.D.

"The decline in infectious diseases in developed countries had nothing to do with vaccinations, but with the decline in poverty and hunger." --Dr. Buchwald, M.D.

"I was working in one of the oldest lung illness treatment centres in Germany, and just by chance, I looked at the files of those people who had fallen ill during the first German epidemic of smallpox, in 1947...We had always been told that the smallpox vaccination would protect against smallpox. And now I could verify, thanks to the files and papers, that all of those who had fallen ill had been vaccinated. This was very upsetting for me." - Dr. Buchwald, M.D.

"It was similar with the measles vaccination. They went through Africa, South America and elsewhere, and vaccinated sick and starving children...They thought they were wiping out measles, but most of those susceptible to measles died from some other disease that they developed as a result of being vaccinated. The vaccination reduced their immune levels and acted like an infection. Many got septicaemia, gastro-enteritis, etcetera, or made their nutritional status worse and they died from malnutrition. So there were very few susceptible infants left alive to get measles. It's one way to get good statistics. Kill all those that are susceptible, which is what they literally did." - Dr. Kalokerinos, M.D.

"Only after realising that routine immunisations were dangerous did I achieve a substantial drop in infant death rates." --Dr. Kalokerinos

"I well remember, some years ago, listening to a knighted medical researcher as he spoke on the radio, about vaccines. He told two classical stories from the history books. The first concerned Edward Jenner who, according to history, watched as the milkmaid caught cowpox and this protected her from smallpox. So Jenner got some of the 'cowpox' and inoculated it into someone's arm - it fostered and the pus was then inoculated into someone else - 100% success was claimed. 100%!! How absurd - complete with all sorts of germs including hepatitis, syphilis and whatever. If one did that today, without antibiotics, the death rate would be huge."---Dr. Kalokerinos, M.D.

The prerequisite for today's medical policy is naturally the currently predominant system of medicine. The sick are the source of income, therefore it is necessary for sick people to be there. And, yes, it proves advantageous if

one makes the people artificially sick. --Dr. Med. Steintl: 'International Medical Policy', 1938, Berlin

In the April 15, 1998, issue of the Journal of the American Medical Association (JAMA), an analysis of drug side effects found that toxic reactions to correctly prescribed medications make more than two million Americans seriously ill every year and kill 106,000, putting drug side effects among the top 10 causes of death in the United States. Among children, antibiotics and vaccines cause more adverse reactions than any other.

In one study, serious reactions to the DPT vaccine (including grand mal epilepsy and encephalopathy) were shown to be as high as 1 in 600. In another study, approximately one out of every 200 children who received the full DPT series suffered severe reactions. Immunisation: Survey of Recent Research, (United States Department of Health and Human Services, April 1983), p. 76.

Dr. Bernard Greenberg, a biostatistics expert, was chairman of the Committee on Evaluation and Standards of the American Public Health Association during the 1950s. He testified at a panel discussion that was used as evidence for the congressional hearings on polio vaccine in 1962. During these hearings he elaborated on the problems associated with polio statistics and disputed claims for the vaccine's effectiveness. He attributed the dramatic decline in polio cases to a change in reporting practices by physicians. Less cases were identified as polio after the vaccination for very specific reasons. "Prior to 1954 any physician who reported paralytic poliomyelitis was doing his patient a service by way of subsidising the cost of hospitalisation and was being community-minded in reporting a communicable disease. The criterion of diagnosis at that time in most health departments followed the World Health Organisation definition: "Spinal paralytic poliomyelitis: signs and symptoms of non-paralytic poliomyelitis with the addition of partial or complete paralysis of one or more muscle groups, detected on two examinations at least 24 hours apart." Note that "two examinations at least

24 hours apart" was all that was required. Laboratory confirmation and presence of residual paralysis was not required. In 1955 the criteria were changed to conform more closely to the definition used in the 1954 field trials: residual paralysis was determined 10 to 20 days after onset of illness and again 50 to 70 days after onset.... This change in definition meant that in 1955 we started reporting a new disease, namely, paralytic poliomyelitis with a longer-lasting paralysis. Furthermore, diagnostic procedures have continued to be refined. Coxsackie virus infections and aseptic meningitis have been distinguished from paralytic poliomyelitis. Prior to 1954 large numbers of these cases undoubtedly were mislabelled as paralytic poliomyelitis. Thus, simply by changes in diagnostic criteria, the number of paralytic cases was predetermined as used.

A study revealed that 1 in 175 children who completed the full DPT suffered severe reactions ("Nature and Rates of Adverse Reactions Associated with DPT and DT Immunisations in Infants and Children" [Paediatrics, Nov. 1981, Vol.68, No.5]) and a Dr.'s report for attorneys which found that 1 in 300 DPT immunisations resulted in seizures (The Fresno Bee, Community Relations, DPT Report, Dec 5, 1984).

"Poliomyelitis trends in Pondicherry, south India, 1989-91" (Journal of Epidemiology and Community Health [London], vol. 51, no. 4, August 1997, pages 443-48): About 54 percent of children lamed as a result of poliomyelitis had received three doses of oral polio vaccine before the onset of paralysis.

"Poliomyelitis associated with type-2 poliovirus vaccine strain. Possible transmission from an immunised child to a non-immunised child" (The Lancet, vol. 1, March 30, 1968, pp. 661-3): a sixteen-month-old boy hospitalised for high fever and paralysis had never received any poliovirus vaccine. >From playing and sharing a bed with a cousin, he apparently had contracted paralytic poliomyelitis from the cousin, who had received type-2 oral poliovirus vaccine thirty-three days before. Virological and serological investigation revealed a vaccine-like strain of type-2 poliovirus. The patient's

history revealed no particular susceptibility to infections."

"If we look closely, we realise that health for all, according to the WHO, means medicalization and vaccinations for all. That is to say sickness for all."
-- Guylaine Lanctot, M.D.

Some doctors refuse to vaccinate their own children as well. According to Dr. Jerome Murphy, former head of PediatricNeurology at Milwaukee Children's Hospital, "There is just overwhelming data that there's an association [between the pertussis vaccine and seizures]. I know it has influenced many paediatric neurologists not to have their own children immunised with pertussis."

Vaccine Injury Compensation, Hearing Before the Subcommittee on Health and the Environment, 99th Congress, 2nd Session (July 25, 1986) p 214 "The vaccination lobby shamelessly takes all the children of this world as hostages to still their greed for money and power. They relentlessly abuse our compassion for the weaker and our concern about health to promote their giga-business. No matter what. No matter how many more vaccine victims will suffer death or side-effects. No matter how many financial resources this strategy devours at the expense of essential social investments like housing and employment. No matter what. Shocking! There is no excuse for this crime. Just as shocking is the observation that (health) policy is no longer under local, democratic control. Everything is set up and organised with scrutiny at the highest, international level by those who take profit from it: the pharmaceutical industry, the financial world, politicians." --Kris Gaublomme, MD

Five deaths have been reported in Australia from vaccines in the 19 month period 6/6/97 to 31/1/99. These statistics make a mockery of the words of Australia's Health Minister, Dr. Michael Wooldridge, who said: 'It's more likely your child will die because of a meteorite falling from space than die from immunisation'.

'When you do get to the little wrappers that come with the little bottles of vaccine and read the small print, the alarm bells start ringing.., vaccination does not guarantee immunisation... you do run some risk with vaccination... I put it that natural immunity is much more likely to be protective of the child than the much failed record of artificial immunity coming from vaccination'. -
-Senator Brown of Tasmania (ex medical practitioner).

'It is impossible to identify all rare adverse events or to identify the safest vaccine combinations prior to licensure' said Robert Chen, chief of vaccine safety and development activity at the USA National Immunisation Program of the Center for Disease Control.

The USA Association of American Physicians and Surgeons said that children younger than 14 are three times more likely to be killed or seriously injured by Hepatitis 'B' vaccine than to catch the disease. They have called for an immediate moratorium on mandatory Hepatitis 'B' vaccine for school children pending further research about dangerous side effects.

The USA Public Health Service and the American Academy of Pediatrics are now asking vaccine manufacturers to eliminate the preservative of Thimerosal (a mercury derivative) from all vaccines. Thimerosal is presently being used in Hepatitis 'B, Diphtheria Tetanus, Pertussis (DTPw), Influenza and Bacterial Meningitis (Hib) vaccines. It has been found that the cumulative effects of ingesting mercury can cause brain damage.

The Centers for Disease Control in the USA recently recommended the phasing-out of the oral polio vaccine in favour of the inactivated polio vaccine by injection. The risk of vaccine-associated paralytic poliomyelitis now seems greater than the risk posed by the disease.

The Bovine Spongiform Encephalitis BSE (Mad Cow Disease) inquiry in the UK has shown that the 40 victims of BSE and the new variant Creutzfeldt-Jakob disease may not have had anything to do with eating beef, but from injecting vaccines made from the brains of BSE-infected cattle.

Modern vaccinations, fear of germs and obsession with hygiene are depriving the immune system of the information input upon which it is dependent. This fails to maintain the correct cytokine balance and fine-tune T-cell regulation, and may lead to increased incidences of allergies and autoimmune diseases. If humans continue to deprive their immune systems of the input to which evolution has adapted it, it may be necessary to devise ways of replacing it artificially. --Rook GA, Stanford JL Dept of Bacteriology, UCL Medical School, London, UK.

"Instead of the Government spending \$400,000 on immunisation, we may get far better health outcomes if we spend \$100,000 in some other way, on nutrition for example...When you have an expenditure on getting your community healthier, then the resistance to many childhood diseases is stronger." -Michael Moore, .Health Minister, Hansard 1997.

"Among school age children, (measles) outbreaks have occurred in schools with vaccination levels of greater than 98%. These outbreaks have occurred in all parts of the country, including areas that had not reported measles for years." -Morbidity and Mortality Weekly Report, 29/12/1989.

"Dutch scientists are struggling to identify the exact cause of an epidemic of whooping cough that has swept throughout the country despite vaccination rates as high as 96%. Similar problems are also being reported from Norway and Denmark." -British Medical Journal, 1998.

"An outbreak of measles occurred among adolescents in Corpus Christi, Texas, even though vaccination requirements for school attendance had been thoroughly enforced." -New England Journal of Medicine Vol. 316: pp 771-774.

"(Whooping cough infections) are common in an immunised population." - Journal of the American Medical Association, 1998.

"From January 1988 to March 1989, a widespread outbreak (118 cases) of

polio type 1 occurred in Oman. Incidence of paralytic disease was highest in children younger than 2 years despite an immunisation program that had recently raised coverage with 3 doses of oral poliovirus vaccine among 12 month old children from 67% to 87%."

"The incidence of asthma has been found to be five times more common in vaccinated children." -The Lancet, 1994.

"There is no doubt in my mind that in the U.K. alone some hundreds, if not thousands, of well infants have suffered irreparable brain damage needlessly (due to being vaccinated)." - Prof. G. Stewart, Dev. Biol. Stand. Vol. 61: pp 395-405. 1985.

"There has been a tendency (by doctors) to play down the likelihood of common adverse reactions...Immunisations are thus commonly given without the informed consent of parents. When problems arise after vaccination, these doctors tend to play down the severity of the complaints and will often deny a connection with the vaccination." - MJA (Medical Journal of Australia) Submission on Vaccination. Dr. Mark Donohoe MB BS. Submitted to the Medical Journal of Australia, Feb 97 rejected May 97, then published in Australian Vaccination Network, "Vaccination Roulette" 1998.

"89% of doctors rely on drug company salesmen for their information." -The Australian Doctor 1989.

"In the USA the vaccination lobby has made the US Government shoulder the vaccine manufacturers liabilities. The Government established a National Vaccine Injury Compensation Program in 1986 and has paid out in excess of \$1 billion to families for vaccine injuries, mainly from the whooping cough vaccine. The Vaccine Adverse Events Reporting Scheme of the FDA admits 12,000 to 14,000 reports annually and agree that only 10 to 15% of adverse reactions are reported."

"In 1993 a high court judge in the UK decided that it was impossible to know

the exact contents of vaccines and that science had no idea what the cocktail of chemicals, contaminants and heavy metals contained in vaccines could do to the human body, or why they would work to prevent disease." -British Medical Journal, 1993.

"Studies have shown that while the oral polio vaccine contains three strains of polio virus, a fourth strain can be cultured from the faeces of vaccine recipients. This indicates that viruses have recombined and formed a new strain in the process of vaccination." -Virology, 1993.

"It is officially admitted that all cases of polio in the US, since the introduction of the vaccine, are caused by the vaccine. The same has been seen in Australia and other countries like England. So the occurrence of the same phenomenon all around the world would be asking too much of coincidence." - Dr Viera Scheibner, "Vaccination: The Medical Assault on the Immune System" 1993.

"In an outbreak of measles in Western Sydney in 1993, 73% of cases occurred in children aged 5-9 years who had been vaccinated against measles according to their parents." -Medical Journal of Australia, 1995.

"In the USA in 1978, they mandated vaccination and it resulted in a three fold increase in the reported incidence of whooping cough." -Dr. Viera Scheibner showing graphs from Tokai Journal of Experimental Biology and Medicine 1988.

Atypical measles has been known about for almost as long as the measles vaccine has been around and it is ONLY found in the vaccinated. It is typified by a milder than usual rash which is probably where the ugly rumour has originated that vaccinated people get milder cases of measles than the unvaccinated. Though the rash may be less, the symptoms can be much worse and the chances of lung involvement are higher than with wild measles (20% +) and liver involvement 3% +) The earliest medical journal study I have about this is "Altered Reactivity to Measles Virus" Atypical Measles in

Children Previously Immunised with Inactivated Measles Virus Vaccines. Fulginiti, V.A. et al; JAMA 18/12/67, Vol. 202, No. 12. Viera Scheibner has said that the chances of dying from wild measles are 0.03% while the chances of dying from atypical measles are between 12-15%. It was thought at one time that it was only the early inactivated vaccine that could cause atypical measles, but it is no known that any measles vaccine can. It seems that the vaccine perverts the immune process which may explain the reason why those who are vaccinated can get measles over and over without developing any natural immunity and may not be able to pass immunity onto their unborn child through the placenta.

In Post Vaccine Diseases of the Central Nervous System : Preliminary Results from the Mediterranean Journal of Surgery and Medicine Number 2 1996 On page 71...."Most vaccines have in their composition Thimerosal which has been the reported cause of neurologic and gastrointestinal (mainly related to the purinic nervous pathway) symptoms(6,7) These actions are not dose related."

"No batch of vaccine can be proved safe before it is given to children." -- Surgeon General of the United States, Leonard Scheele, addressing an AMA convention in 1955

"The only safe vaccine is a vaccine that is never used" -- Dr. James A. Shannon, National Institutes of Health

"In this article we begin to address the subject of vaccinosis, the general name for chronic dis-ease caused by vaccines. For some readers the very idea that vaccines are anything but wonderful and life-saving may come as a surprise, and it's not a very pleasant one. After all, the general population pictures vaccines as one of modern medicine's best and brightest moments, saving literally millions from the scourge of diseases like poliomyelitis and smallpox." --Dr. Richard Pitcairn D.V.M., Ph.D

"Pumping more vaccines into the body without understanding such basics as how they'll affect immune system function over time borders on the criminal." --Nicholas Regush, ABCNEWS.com

In the United States during the period 1980-1985, 55 cases of paralytic polio were reported. Of these cases, 51 were caused by the oral vaccine and 4 occurred in people returning from developing countries. (Morbidity and Mortality Weekly Report (MMWR), published by the United States Center for Disease Control. International notes: Imported paralytic poliomyelitis - United States, 1986; 35, 671-674.)

Of the reported 18 cases of paralytic polio in 1977, three of the patients were persons who were in the United States but who were not residents, and 2 of the other 15 victims apparently contracted the disease abroad. Three cases occurred in recent vaccine recipients, and 10 cases had been in close contact with recently vaccinated people. Only 3 cases occurred in persons "without known vaccine association". (Journal of the American Medical Association (JAMA), January 23, 1978.)

A study undertaken at the University of California, Los Angeles, under the sponsorship of the Food and Drug Administration, and which has been confirmed by other studies, links DPT (diphtheria, pertussis, tetanus) vaccination, and more specifically the pertussis component, to sudden infant death syndrome (SIDS). This study found that 53 of 145 SIDS victims whose

families were interviewed had received a DPT vaccination within 4 weeks. The authors conclude that "the excess of deaths in the 24 hours and first week following immunization and the absence of deaths in the fourth week following immunizations were significant." They call for more studies to substantiate their findings, despite the fact that this is already the third investigation, and all 3 have pointed in the same direction. (Pediatric Infectious Disease Journal, 1983. Possible temporal association between diphtheria - tetanus toxoid - pertussis vaccination and sudden infant death syndrome. Baraff, L.J., Ablon, W.J., Weiss, R.C.)

A report on 479 whooping cough patients in the US states that 60 percent of patients had received less than 3 doses of DPT vaccine, while the other 40 percent of victims had been fully vaccinated (three doses or more). (Weekly Report, Centers for Disease Control, July 2, 1982.)

Because of the obvious dangers of the whooping cough component of the DPT vaccine, physicians are assuring parents of the "safety" of the other two components of the triple antigen - diphtheria and tetanus (DT), although some doctors have a different view. "It is unnecessary to give a routine booster of diphtheria and tetanus vaccine every 10 years... The benefits of the procedure do not justify the risks." (Lancet, May 11, 1985. Mathias, R.G. and Schechter, M.T.)

A report on a study of 11 healthy individuals to determine the effects of routine tetanus booster vaccinations, showed that the vaccinations weaken the immune system of the recipients. (New England Journal of Medicine, January 19, 1984.)

As reported by a Chicago Board of Health, during an outbreak of diphtheria in Chicago in 1969, four of the 16 victims had been fully vaccinated against the disease, and 5 others had received one or more doses of the vaccine of which 2 of these showed evidence of "full immunity". (The People's Doctor, April 1978, Mendelsohn, R.)

A vast number of children who were injected with a killed measles vaccine between 1963 and 1968 in the United States are now subject, as young adults to what is called "atypical measles". This is a very severe form of the disease in which it appears that, because of the vaccination, there is an increased susceptibility to measles viruses, resulting from a damaged immune response. (JAMA, 1980, Vol. 1244, No. 8, pp. 804-806.)

A review of 1600 cases of measles in Quebec, Canada, between January and May 1989 revealed that 58 per cent of school-age cases had been previously vaccinated. (MMWR, Measles - Quebec. 1989; 38: 329-330.)

Since the widespread use of the mumps vaccine, the incidence of the disease has shifted to adolescents and adults who are much more susceptible to the complications of testicular and ovarian infection which can lead to sterility. During the period between 1967 and 1971 the annual average cases of mumps in persons greater or equal to 15 years of age was 8.3 percent; in 1987 this same age group accounted for 38.3 percent of cases, which is more than an eightfold increase. (MMWR, Mumps - United States, 1985-1988. 1989; 38: 101-105.)

The HEW reported in 1970 that as much as 26 percent of children receiving rubella vaccination, in national testing programs, developed arthralgia or arthritis. Many had to seek medical attention and some were hospitalised to test for rheumatic fever and rheumatoid arthritis. (Science, US, March 26, 1977.)

This vaccine has been shown to cause serious reactions including convulsions, anaphylactoid allergic reactions, serum sickness-like reactions and death. (Pediatrics, 1987, Milstien et al., 80: 270-274.)

A case-control study has shown that 41 percent of meningitis occurred in children vaccinated against the disease. The vaccine's protective efficacy was minus 58 percent. This means that children are much more likely to get the disease if they are vaccinated. (JAMA, 1988, Osterholm et al., 260: 1423-

1428.)

"The apparent paradox is that as measles immunization rates rise to high levels in a population, measles becomes a disease of immunized persons."
(Review article: 50 REFS. Dept. of Internal Medicine, Mayo Vaccine Research Group, Mayo Clinic and Foundation, Rochester, MN. Archives of Internal Medicine. 154(16):1815-20, 1994 Aug 22.)

Measles vaccination produces immune suppression which contributes to an increased susceptibility to other infections. Clinical Immunology and Immunopathology, May 1996; 79(2): 163-170.

Early in this century, the Philippines experienced their worst smallpox epidemic ever after 8 million people received 24.5 million vaccine doses; the death rate quadrupled as a result. (Physician William Howard Hay's address of June 25, 1937; printed in the Congressional Record)

"Our children face the possibility of death or serious long-term adverse effects from mandated vaccines that aren't necessary or that have very limited benefits" --Jane M. Orient, MD, AAPS (Association of American Physicians and Surgeons) Executive Director.

"There is insufficient evidence to support routine vaccination of healthy persons of any age." --Paul Frame, M.D., Journal of Family Practice

"Official data shows that large scale vaccination has failed to obtain any significant improvement of the diseases against which they were supposed to provide protection" --Dr Sabin, developer of Polio vaccine.

"All vaccination has the effect of directing the three values of the blood into or toward the zone characteristics of cancer and leukaemia...Vaccines do predispose to cancer and leukaemia." --Professor L.Vincent - founder of Bioelectronics

"You medical people will have more lives to answer for in the other world

than even we generals." - Napoleon Bonaparte

"The pharmaceutical corporations are engaged in the systematic corruption of the medical profession, country by country" - John le Carré

The mandatory vaccine money trail

The ‘physician’ is rewarded for administering vaccines by higher reimbursements for his fees. His vaccine “rates” are checked to determine whether or not he/she is entitled to more money. Physicians, public health workers, and drug companies have all been given immunity from any possible lawsuits that may arise as a result of vaccine-caused injury or illness. In other words, if a vaccine harms your child or causes autism you cannot sue any of them. They all have a liability exemption.

The American Academy of Paediatrics, which is a corporation headquartered in the STATE OF ILLINOIS – that receives lots of money from drug corporations for advertising in their journal, etc. This organization relies heavily on what they falsely believe to be a “government” health advocacy agency known as the Center for Disease Control (CDC).

The American Academy of Family Physicians, which is a corporation headquartered in the STATE OF KANSAS – that also receives lots of money from drug corporations for advertising in their journal, etc. This organization also relies heavily on what they falsely believe to be a “government” health advocacy agency known as the Center for Disease Control (CDC).

The Center for Disease Control (CDC), which is a corporation headquartered in the STATE OF GEORGIA. The CDC IS NOT PART OF A LEGITIMATE GOVERNMENT. Repeat: the CDC IS NOT PART OF A LEGITIMATE GOVERNMENT! It is a private for-profit corporation listed on Dun and Bradstreet that is chartered under the umbrella of the private for-profit UNITED STATES corporation with extremely close ties to the pharmaceutical companies and a sordid history of corruption.

Bottom line: all of the above “entities” make more money if they vaccinate our children and even more if our children get sick from the vaccines . . . including the pediatricians themselves.

<http://parentsaganinstmandatoryvaccines.net/2015/08/18/do-not-sign-the-r...>

Questions to ask Vaccination Advocates.

Dr. Michel Odent has linked asthma to the whooping cough vaccine. Have you read his research? What do you think?

Professor Wakefield (UK) has linked autism and crohns disease to the measles, mumps and rubella vaccine. What do you think? What evidence do you have to back up your opinions?

Why is the same dose of vaccines given to a two month old as for a 5 year old?

Are you aware that Japan changed the start time for vaccinating from 3 months to two years and straight away their SIDS rate plummeted?

Do you believe in herd immunity? If so, how is it that 98% of U.S.A. children are vaccinated yet they still have outbreaks of these diseases?

Most diseases were already 90% gone before any vaccines were introduced, If this is so, how can vaccines be applauded for diseases ceasing, especially when there were no vaccines for some diseases like bubonic plague and scarlet fever?

How can an unvaccinated child be more of a risk than a vaccinated child if neither have the disease? Surely it would be the other way around in the case of the live virus vaccines? These children are assured of having the virus in their bodies to spread.

How can the Tetanus vaccine induce immunity, when contracting the disease

naturally does not give immunity?

If the "so called" diphtheria vaccine, which is in fact a toxoid, works against the toxin produced by the bacteria, and not against the bacteria itself, then how did this "vaccine" help in the decline in diphtheria?

"When I was training, one in 2,500 [children were autistic]. Now it is one in 250. At the moment, the only logical explanation for this is MMR." -- Dr Kenneth Aitken, British specialist in the treatment of autism. (The Telegraph, United Kingdom, April 2, 2002)

"By the (U.S.) government's own admission, there has been a 41% failure rate in persons who were previously vaccinated against the (measles) virus." -- Dr. Anthony Morris, John Chriss, BG Young, "Occurrence of Measles in Previously Vaccinated Individuals," 1979; presented at a meeting of the American Society for Microbiology at Fort Detrick, Maryland, April 27, 1979.

"There is no evidence that any influenza vaccine thus far developed is effective in preventing or mitigating any attack of influenza. The producers of these vaccines know that they are worthless, but they go on selling them, anyway." -- Dr. J. Anthony Morris (formerly Chief Vaccine Control Officer at the US Federal Drug Admin.)

"Our results suggest that infants whose mothers are born since measles vaccine licensure in 1963 are significantly more susceptible to measles than are infants of older mothers and that the risk of measles increases incrementally with each year increase in the maternal year of birth." -- "Increased Susceptibility to Measles in Infants in the United States," Pediatrics, Nov. 5, 1999.

The strong association between vaccination with RRV-TV and intussusception among otherwise healthy infants supports the existence of a causal relation. -- Intussusception among infants given an oral rotavirus vaccine., Murphy TV, et al. Epidemiology and Surveillance Division, National

Immunization Program, Centers for Disease Control and Prevention, N Engl J Med. 2001 Feb 22;344(8):564-72.

"The (Illinois) department followed the recommendation of a panel of experts, its Immunization Advisory Committee, while rejecting the advice of others who thought the decision should be left to parents and pediatricians. But in what critics consider a conflict of interest, 5 of the committee's 18 members have financial ties to Merck, which makes the chickenpox vaccine. Two members of the committee have given talks for Merck, receiving up to \$750 per speech. A third member directs a nonprofit group that has received \$20,000 in grant money from the company. And two other members own stock in Merck, including one who has owned as much as \$16,000 worth." - (Sun Times, January 27, 2002)

Medical science has made such tremendous progress that there is hardly a healthy human left. —Aldous Huxley

"Only an educated and informed people will be a free people." —John F. Kennedy

Quote Unquote

“Doctors will have more lives to answer for in the next world than even we generals.” —Napoleon Bonaparte (1769-1821)

“Medical science has made such tremendous progress that there is hardly a healthy human left.” —Aldous Huxley (1894-1963)

“Drug companies do not look for ‘cause.’ The drug company business model is based on ‘sustainability.’ Rather than find a cause and cure, patients are simply sustained. There is not a single prescription drug that offers a ‘cure’ to any ailment. Curing a disease versus treating its symptoms does not make 'business sense' to drug companies. Just like government can only profit from criminals, the drug industry only makes money from sick people - sick people

with insurance...This business model enables drug companies to make huge profits and guarantees dependency among users. This dependency allows drug companies to pay for Direct-to-Consumer (DTC) advertising, drug trials, university research, government lobbying, and 'ghost writers.' Combined, these strategies are used to deceive the general public as well as medical doctors.” —Shane Ellison, Health Myths Exposed

“Much current medical advice is quackery.” —James Le Fanu, medical columnist for London’s Daily and Sunday Telegraph, The Rise and Fall of Modern Medicine

“Anyone who goes to a psychiatrist ought to have his head examined.” —Samuel Goldwyn, co-founder of Paramount Pictures and MGM Studios

“Doctors have throughout time made fortunes on killing their patients with their cures. The difference in psychiatry is that it is the death of the soul.” —Dr. R.D. Laing, MD

“Psychiatry is probably the single most destructive force that has affected American Society within the last fifty years.” —Dr. Thomas Szasz, Lifetime Fellow, American Psychiatric Association

“Dr. Loren R. Mosher resigned from the American Psychiatric Association (APA) saying that he could no longer square his conscience with being a member since they [the APA] had totally sold out to the pharmaceutical industry.” —Dr. Fred A. Baughman, Jr., M.D., Pediatric Neurologist

“Modern medicine is a negation of health. It isn't organised to serve human health, but only to serve itself as an institution. It makes more people sick than it heals.” —Ivan Illich, Medical Nemesis

“Despite the tendency of doctors to call modern medicine an 'inexact science', it is more accurate to say there is practically no science in modern medicine at all. Almost everything doctors do is based on a conjecture, a guess, a clinical

impression, a whim, a hope, a wish, an opinion or a belief. In short, everything they do is based on anything but solid scientific evidence. Thus, medicine is not a science at all, but a belief system. Beliefs are held by every religion, including the Religion of Modern Medicine.” —Dr. Robert Mendelsohn, M.D.

“I don't care what they say: the mental health business is the stigmatization business and nothing more or less. It's hardest to see the air we breathe. If you think you have an open mind, test it by reading something by Thomas S. Szasz, MD.” —Dr. John Friedberg, MD

“To teach the Rockefeller drug ideology, it is necessary to teach that Nature didn't know what she was doing when she made the human body.” —Hans Ruesch

“I think the takeover by corporate psychiatry is fairly complete at this point in time.” —Dr. David Healy

“Mankind has so far survived all major catastrophes. It will also survive modern medicine.” —Gerhard Kocher.

“The American Medical Association is fashioned to prescribe drugs and perform various treatments that although they may be unsuspecting, tend to weed out the weaker species. The Council views the AMA's 'modern medicine' as barbaric.” —Brice Taylor, Thanks For The Memories

“Medicines are of subordinate importance because of their very nature, they can only work symptomatically.” —Hans Kusche, MD

“If all the medicine in the world were thrown into the sea, it would be bad for the fish and good for humanity.” —O.W. Holmes, Prof. of Med. Harvard University

“Drug medications consists in employing, as remedies for disease, those things which produce disease in well persons. Its materia medica is simply a

lot of drugs or chemicals or dye-stuffs in a word poisons. All are incompatible with vital matter; all produce disease when brought in contact in any manner with the living; all are poisons.” —Dr. R.T. Traill, M.D., in a 2.5 hour lecture to members of congress and the medical profession, delivered at the Smithsonian Institute in Washington D.C.

“Every drug increases and complicates the patients condition.” —Robert Henderson, MD

“Drugs never cure disease. They merely hush the voice of nature's protest, and pull down the danger signals she erects along the pathway of transgression. Any poison taken into the system has to be reckoned with later on even though it palliates present symptoms. Pain may disappear, but the patient is left in a worse condition, though unconscious of it at the time.” —Daniel. H. Kress, MD

“The greatest part of all chronic disease is created by the suppression of acute disease by drug poisoning.” —Henry Lindlahr, MD

“Every educated physician knows that most diseases are not appreciably helped by medicine.” —Dr. Richard C. Cabot, MD

“Medicine is only palliative, for back of disease lies the cause, and this cause no drug can reach.” —Dr. Wier Mitchel, MD

"The person who takes medicine must recover twice, once from the disease and once from the medicine.” —Dr. William Osler, MD

“Medical practice has neither philosophy nor common sense to recommend it. In sickness the body is already loaded with impurities. By taking drug - medicines more impurities are added, thereby the case is further embarrassed and harder to cure.” —Dr. Elmer Lee, MD, Past Vice President, Academy of Medicine

“Conventional medicine is a collection of unproven prescriptions the results

which, taken collectively are more fatal than useful to mankind.” —Napoleon Bonaparte (1769-1821)

“Our figures show approximately four and one half million hospital admissions annually due to the adverse reactions to drugs. Further, the average hospital patient has as much as thirty percent chance, depending how long he is in, of doubling his stay due to adverse drug reactions.” —Dr. Milton Silverman, MD, Professor of Pharmacology, University of California

“Why would a patient swallow a poison because he is ill, or take that which would make a well man sick.” —Dr. L.F. Kebler, MD

“What hope is there for medical science to ever become a true science when the entire structure of medical knowledge is built around the idea that there is an entity called disease which can be expelled when the right drug is found?” —John H. Tilden, MD

“The necessity of teaching mankind not to take drugs and medicines, is a duty incumbent upon all who know their uncertainty and injurious effects; and the time is not far distant when the drug system will be abandoned.” —Dr. Charles Armbruster, MD

“We are prone to thinking of drug abuse in terms of the male population and illicit drugs such as heroin, cocaine, and marijuana. It may surprise you to learn that a greater problem exists with millions of women dependent on legal prescription drugs.” —Dr. Robert Mendelsohn, MD

“The cause of most disease is in the poisonous drugs physicians superstitiously give in order to effect a cure.” —Dr. Charles E. Page, MD

“Immunization is total nonsense! More than that is what's hidden from people about vaccines. They are dangerous. One child out of five has overwhelming disabilities from vaccines—neurological problems, seizures.” —Dr. Guylaine Lanctot, MD

“If the machine of government is of such a nature that it requires you to be the agent of injustice to another, then, I say, break the law.” —Henry David Thoreau, *On the Duty of Civil Disobedience*, 1849

“All matter originates and exists only by virtue of a force which brings the particles of an atom to vibration which holds the atom together. We must assume behind this force is the existence of a conscious and intelligent mind. This mind is the matrix of all matter.” —Max Planck, physicist. Physics Nobel Prize 1918.

“To be a physician in the truest sense, one must consider the patient's troubles from all these basic standpoints -- is it mechanical, nutritional, or psychological, or is it a varied combination of all three... The human body is not composed of separate entities, but is a working unit in its entirety and so must be treated as such.” —Dr. Fred Loffler, ND

According to the 2009 statistics from the Centers for Disease Control and Prevention, prescription drugs were responsible for more overdose deaths in the U.S. than “street drugs” such as cocaine, heroin and amphetamines.

“At present, intelligent people do not have their children vaccinated, nor does the law now compel them to. The result is not, as the Jennerians prophesied, the extermination of the human race by smallpox; on the contrary more people are now killed by vaccination than by smallpox.” —George Bernard Shaw, August 9, 1944, *The Irish Times*

“Mercury poisoning is the greatest masquerader of our time. Dentists are not in a position to see the cause and effect relationship of the insertion of mercury and the development of illness three to ten years later. Even the patient himself does not connect the illness to the original dental process.” —Dr. Alfred V. Zamm

“The pharmaceutical industry has spent \$15 billion since 2004 to settle thousands of criminal and civil complaints related to the illegal marketing of

drugs that kill or injure a million Americans annually – and yet, they control the policies that are used by CS [civil servant] personnel to force drug/vaccine use. ” —Office of Medical and Scientific Justice Journal

“The medicine of the future must not only conform to the rules of nature, avoiding the use of alien drugs where possible, but also confirm to human rules for ethics and objective science.” —Dr. Carl C. Pfeiffer, PhD, MD

“Doctors pour drugs of which of which they know little, to cure diseases of which they know less, into human beings of whom they know nothing.” —Voltaire

“Favorite foods are often the offending foods, so the patient is like an addict, eating the offending food to obtain a psychological high...Extreme mood swings occurring within a single day may typify the patient with cerebral allergy. These moods may be mania or deep depression, and they correspond with the ingestion of foods.” —Dr. Carl Pfeiffer, MD, PhD, Nutrition and Mental Illness, p.50

“You wouldn’t take a leaky thermometer, put it in your mouth, and leave it there 24 hours a day, 365 days a year. Yet that’s exactly what happens when an amalgam filling is installed in your mouth.” —Dr Michael Ziff

“The entire vaccine program is based on massive fraud.” —Dr. Russell L. Blaylock, MD

Orthomolecular Medicine, as conceptualized by double-Nobel Laureate Linus Pauling, aims to restore the optimum environment of the body by correcting imbalances or deficiencies based on individual biochemistry using substances natural to the body such as vitamins, minerals, amino acids, trace elements, and essential fatty acids.

“Orthomolecular medicine, as described by double Nobel Laureate Dr. Linus Pauling, is the practice of preventing and treating disease by providing the

body with optimal amounts of substances (nutrients) which are natural to the body. In fact, it was Dr. Linus Pauling's work with the structure of molecules and the reactions of molecules within the body that created the basis for modern medicine today.” —Dr Abram Hoffer

“I’m dying from the treatment of too many physicians.” —Alexander the Great

“As a retired physician, I can honestly say that unless you are in a serious accident, your best chance of living to a ripe old age is to avoid doctors and hospitals and learn nutrition, herbal medicine and other forms of natural medicine unless you are fortunate enough to have a naturopathic physician available. Almost all drugs are toxic and are designed only to treat symptoms and not to cure anyone. Vaccines are highly dangerous, have never been adequately studied or proven to be effective, and have a poor risk/reward ratio. Most surgery is unnecessary and most textbooks of medicine are inaccurate and deceptive. Almost every disease is said to be idiopathic (without known cause) or genetic - although this is untrue. In short, our main stream medical system is hopelessly inept and/or corrupt. The treatment of cancer and degenerative diseases is a national scandal. The sooner you learn this, the better off you will be.” —Dr. Allan Greenberg, Dec. 24, 2002

“The cure of many diseases remains unknown to the physicians of Hellos (Greece) because they do not study the whole person.” —Socrates (470-399 BC)

“We have the science to suggest that if you can make three changes—give up all meat, all dairy, and refined foods including free oils—you can avoid dying from cancer and heart disease. It’s being brought to life in a new documentary called Forks Over Knives. I saw it, I loved it, and I need all of you to see it too. This could be the Hail Mary of medicine.” —Dr. Mehmet Oz

“Illness or disease is Nature’s warning that filth has accumulated in the body; and it is the part of wisdom to allow Nature to remove the filth, instead of covering it up with medicines.” —Mahatma Gandhi, 1921

“Unless we put medical freedom into the Constitution the time will come when medicine will organize itself into an undercover dictatorship. To restrict the art of healing to doctors and deny equal privileges to others will constitute the Bastille of medical science. All such laws are un-American and despotic.”
—Dr. Benjamin Rush, a signer of the U.S. Declaration of Independence

“We physicians with all our training, knowledge and authority often acquire a rather large ego that tends to make it difficult to admit we are wrong.” —Dr. Dwight Lundell

“That government is best which governs least.” —Henry David Thoreau, On the Duty of Civil Disobedience, 1849

“If the machine of government is such that it requires you to be the agent of injustice to another, then I say, break the law. Let your life be a counter-friction to stop the machine.” —Henry David Thoreau, On the Duty of Civil Disobedience, 1849

“ADHD is fraud intended to justify starting children on a life of drug addiction.” —Dr. Edward C. Hamlyn, founding member of the Royal College of General Practitioners

“ADHD (Attention Deficit Hyperactivity Disorder) is a prime example of a fictitious disease.” —Dr. Leon Eisenberg, the discoverer of ADHD, before his death in 2009

“In the last century the practice of medicine has become no more than an adjunct to the pharmaceutical industry and the other aspects of the huge, powerful and immensely profitable health care industry. Medicine is no longer an independent profession. Doctors have become nothing more than a link connecting the pharmaceutical industry to the consumer.” —Dr. Vernon Coleman

“The necessity of teaching mankind not to take drugs and medicines, is a duty

incumbent upon all who know their uncertainty and injurious effects; and the time is not far distant when the drug system will be abandoned.” —Dr.

Charles Armbruster, MD

“We are prone to thinking of drug abuse in terms of the male population and illicit drugs such as heroin, cocaine, and marijuana. It may surprise you to learn that a greater problem exists with millions of women dependent on legal prescription drugs.” —Robert Mendelsohn, M.D

“Most people don't realize that pharmaceutical medicine is a false paradigm doomed to failure, as most drugs will damage the mitochondria as well as interfere with essential biochemical pathways. I strongly object to Medicare coverage of prescription drugs, because, the more drugs people take, the worse their health will be. “ —Alan Greenberg, M.D.

“Now, if doctors were aware that medicine was not a science and that they were pulling what is undoubtedly the largest and most successful confidence trick ever tried the damage would be fairly minimal. But the problem is compounded by the fact that the vast majority of doctors believe the lie that they are taught; they believe that they are scientists, practising an applied science.” —Dr Vernon Coleman

“Most patients probably assume that when a doctor proposes to use an established treatment to conquer a disease he will be using a treatment which has been tested, examined and proven. But this is not the case. The savage truth is that most medical research is organised, paid for, commissioned or subsidised by the drug industry (and the food, tobacco and alcohol industries). This type of research is designed, quite simply, to find evidence showing a new product is of commercial value. The companies which commission such research are not terribly bothered about evidence; what they are looking for are conclusions which will enable them to sell their product. Drug company sponsored research is done more to get good reviews than to find out the truth.” —Dr. Vernon Coleman

“Our figures show approximately four and one half million hospital admissions annually due to the adverse reactions to drugs. Further, the average hospital patient has as much as thirty percent chance, depending how long he is in, of doubling his stay due to adverse drug reactions.” —Dr. Milton Silverman, MD,

“Why would a patient swallow a poison because he is ill, or take that which would make a well man sick.” —Dr. L.F. Kebler, MD

“What hope is there for medical science to ever become a true science when the entire structure of medical knowledge is built around the idea that there is an entity called disease which can be expelled when the right drug is found?” —John H. Tilden, MD

“Indeed the modern physician now only represents an extension of these (medical) industries into the public.” —Dr. Carl Reich, MD

“In the last century the practice of medicine has become no more than an adjunct to the pharmaceutical industry and the other aspects of the huge, powerful and immensely profitable health care industry. Medicine is no longer an independent profession. Doctors have become nothing more than a link connecting the pharmaceutical industry to the consumer.” —Dr. Vernon Coleman

THE ANTI-VAXXER HANDBOOK

Thursday, April 25, 2019

“Vaccination is a business based on fear.” —Dr. Gerhard Buchwald, MD

“Vaccination is a barbarous practice and one of the most fatal of all the delusions current in our time. Conscientious objectors to vaccination should stand alone, if need be, against the whole world, in defence of their conviction.” —Mahatma Gandhi (1869-1948)

The drug companies (vaccine makers) use FEAR, shame, blame, and lies to sell vaccines. This guide will show you how to decipher their marketing tactics, some of which are layers deep.

At the root of it, vaccines are consumer products. Just like batteries, pizzas, televisions, and vehicles are consumer products. However, vaccines are dressed as disease prevention and disguised as for the good of public health. When you peel away the layers, you'll find that the drug companies that make vaccines have the same shareholder obligations as the oil, auto, and tech companies. They have to continually increase revenue, market share, and profit. If they don't, their stock prices drop, employees are laid off, and executives don't receive bonuses. It's sad, but true. Vaccination is a business and nothing to do with making people healthy.

As the Anti-vaxx movement has increased, the drug companies have hired a small army of online trolls (aka “pro-vaxxers”) to counter it. These trolls have created fake grass root groups to push vaccines. They mostly use fear tactics, hit the laughing emoji, ask to cite a source, or discredit parents with vaccine injured children. And their favorite is blame.

The biggest group of the anti-vaxx movement are the mothers of children who've been injured and killed by vaccines. If vaccines are “safe and effective”, there would be no anti-vaxxers or ex-vaxxers.

If you don't have time, you can overcome EVERY objection by a big pharma

troll by demanding, “Show me the vaccine ingredients and side effects!”

Demanding to see the vaccine ingredients and side effects as stated by the vaccine makers (drug companies) will often neutralize the trolls. Trolls like to use fear, shame, and blame to sell vaccines. Despite what anyone says, side effects and adverse reactions have the same practical meaning: Unintended / unwanted events of a product that are reported.

Who should vaccinate?

These are the people who should vaccinate:

1. Anyone who wants to end up in a wheel chair or coffin.
2. Anyone who wants to spread diseases to other people (SHEDDING).

Vaccine ingredients: heavy metals, carcinogens, neurotoxins.

Vaccine side effects (adverse reactions): paralysis, death, brain damage, cancer, ear infection, allergies, asthma, nerve control disorders, autoimmune diseases, SHEDDING (spreading diseases). Despite what anyone says, “side effects” and “adverse reactions” have the same practical meaning: Unintended / unwanted events of a product that are reported.

Vaccination: You are being injected with poisons, viruses, and diseases.

Things that cause diseases are heavy metals, neurotoxins, and carcinogens. They're all in vaccines. According to the drug companies: heavy metals, neurotoxins, and carcinogens prevent diseases when they're in vaccines. If you believe Big Pharma, you've been pharmed like a sheep.

Should parents be charged with with negligence and child abuse if they vaccinate their children without researching vaccine ingredients, side effects, and disease mortality rates?

Before You Vaccinate, Ask Yourself These Questions

Most people are clueless on vaccination. Don't be a sheep and be curious. Before you vaccinate, ask yourself these questions.

1. What disease am I vaccinating for? Do I know what causes that disease? Do I know the mortality rate for that disease? (If you don't, maybe you shouldn't be vaccinating.)
2. Who makes the vaccines? What's their track record as a company?
3. What are the ingredients and side effects of the vaccines?
4. What are the injury and mortality (death) rates of those vaccines? (The injury rate is significantly higher than "1 in a million" the drug companies claim. Even the death rate is significantly higher.)
5. What are the incident and death statistics of the unvaccinated versus the vaccinated for the diseases I am vaccinating for? That is, is it safer to vaccinate or not? (Not what your doctor, pediatrician, or the media says, but what the data says.)
6. Have I read a book on vaccination presenting the other side of vaccination? Or did I get my information from the mainstream media, my doctor and pediatrician?
7. Have I talked to parents of vaccine injured children? (Parents of vaccine injured children are the most reliable source of information.)

8. Do I know why the media, doctors, public figures, and pediatricians are pushing vaccines?
9. Do I know what mandatory vaccination is and what exemptions are?
10. If I or my child becomes injured or killed by the vaccines, who is legally responsible? Can I sue anyone for damages?

If you can answer all the questions above, you don't need to read the rest of the article. You are woke and no longer a sheep. If you can't answer the questions above, then you'll be intimidated or influenced by the small army of big pharma trolls. You'll need to know how to respond to their fear, shame, and blame games.

What Big Pharma Trolls Say and How to Respond

“The Anti-Vaccinators, firm in their convictions, remain unmoved by the stale sophistries, bogus statistics, and stupid taunts thrown at them.” —Dr. Walter Hadwen, JP, MD, LRCP, MRCS, LSA, “The Case Against Vaccination”, 1896

Did you know that the attention span of most people is less than that of a goldfish's? They believe vaccines work and can parrot slogans such as,

“Vaccines are safe and effective!”

“Vaccines saved millions of lives!”

“Doctors and scientists believe in vaccines!”

“Vaccine injuries are 1 in a million!”

“The science is settled!”

“Vaccine preventable diseases.”

Then you ask them, “How many books have you read on vaccination?” And watch their faces go blank.

The vast majority of people don't read books on vaccination but claim to know it's safe and effective. They get their information from newspapers and television, not realizing that the drug companies influenced those opinions through advertising money.

Below are the most common things pro-vaxxers (aka big pharma trolls) say and how to respond to them.

Anti-vaxxers are ignorant and stupid. Anti-vaxx is pro-disease. Vaccines work and they're one of the greatest public health achievements.

Those are a lot of empty words backed by nothing. According to over 150 years of official data from the US, UK, Australian, and Canadian governments, vaccines never prevented a single disease. Not one. Sanitation, hygiene, and nutrition eradicated diseases. An ignorant person is one who doesn't read and refuses to learn. They'll believe anything if it's in the newspapers and on TV. In 2018, drug companies spent \$5 billion advertising on mainstream media.

If you want to know if the iPhone is safe and effective, do you ask Apple and

Apple Engineers? Or do you ask iPhone users? (the end users of the iPhone)

If you want to know if vaccines are safe and effective, do you ask the drug companies and drug company scientists? Or do you ask parents? (indirect users of vaccines)

The most credible information for vaccines is from parents, because they are the indirect consumers of vaccines. They see first hand what happens to their children after vaccination.

It's not what you think, it's what the data shows. The data is unequivocally clear that IF YOU ARE PRO-VAXX, YOU ARE PRO-DISEASE.

Your children will die if you don't vaccinate them. They won't live to age 3.

Using fear to sell vaccines. Every independent study (those not funded by the drug companies) has shown that vaccinated people have higher illness, disease, and death rates due to vaccinations. Read the vaccine ingredients and side effects and you'll understand why. SIDS (Sudden Infant Death Syndrome) is common among vaccinated infants. Your child is more likely to die from the vaccine than the illness/disease it's being vaccinated for.

William VSauce White

The reason why we don't see unhealthy antivax people is because they all wind up dead before their 4th birthday

2h Like Reply

PHARMA TROLLS GONE WILD. Classic troll fear tactic: Offers no useable information. Death is a side effect of many vaccines. Would you trust your children's health to anyone who looks like that and has a name like that? They're called TROLLS, hired by drug companies to sell vaccines online.

They use fake profiles to spread fear and outright lies.

SIDS is listed as a side effect of many childhood vaccines. SIDS is the leading cause of infant deaths in the US.

The data shows that vaccinated infants die at much higher rates than unvaccinated infants.

Cancer is listed as a side effect of vaccines. In the US, cancer is the leading cause of death by disease in children under 7.

For the reconstitution of Haemophilus b Conjugate Vaccine (Tetanus Toxoid Conjugate).

A few cases of demyelinating diseases of the CNS have been reported following some tetanus toxin-containing vaccines or tetanus and diphtheria toxoid-containing vaccines, although the IOM concluded that the evidence was inadequate to accept or reject a causal relationship.³⁷

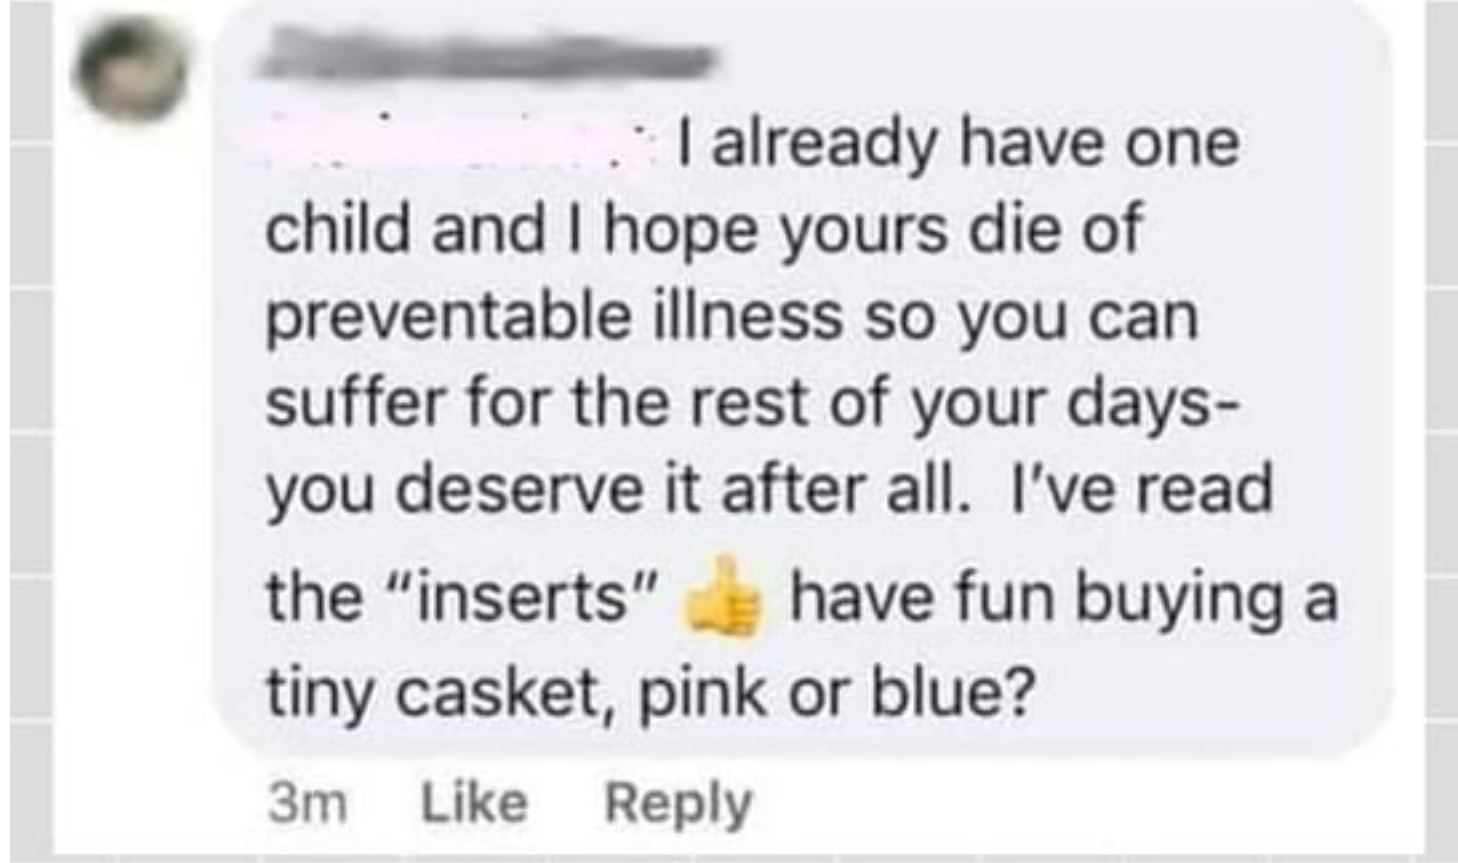

Adverse events reported during post-approval use of Tripedia vaccine include idiopathic thrombocytopenic purpura, SIDS, anaphylactic reaction, cellulitis, autism, convulsion/grand mal convulsion, encephalopathy, hypotonia, neuropathy, somnolence and apnea. Events were included in this list because of the seriousness or frequency of reporting. Because these events are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequencies or to establish a causal relationship to components of Tripedia vaccine.²

Reporting of Adverse Events

The National Vaccine Injury Compensation Program, established by the National Childhood Vaccine Injury Act of 1986, requires physicians and other health-care providers who administer vaccines to maintain permanent vaccination records of the manufacturer and lot number of the vaccine administered in the vaccine recipient's permanent medical record along with the

If you read the vaccine ingredients and study the side effects, and still vaccinate, it means you're a bloody idiot. These days, vaccination is for uninformed sheep. They'll believe anything on TV.

"When you impair the brain blood flow by vaccination, you can impair the respiration control center, which can result in death. We call it SIDS (Sudden Infant Death Syndrome)." —Dr. Andrew Moulden, MD, PhD, "Every Vaccine Produces Harm"

Where is the data backing up this silliness? Big pharma trolls are brainless drones. What big pharma trolls say are always contradicted by data. The above is an example of blame and fear. They blame the unvaccinated and create fear of not vaccinating. Hey, we all gotta make money somehow, right?

To put it bluntly: **THE VACCINE IS WORSE THAN THE DISEASE YOU FEAR.**

Outbreaks of Measles in Vaccinated Populations

In 1984, 58% of all school-aged children in the U.S. who contracted measles were adequately vaccinated.

In 1985, there was a measles outbreak in Corpus Christi, TX. The population was fully vaccinated.

In 1986, there was a measles outbreak in Dane County, WI. 96% of the cases were in vaccinated people.

In 1988, 69% of all school-aged children in the U.S. who contracted measles were adequately vaccinated.

In 1989, 89% of all school-aged children in the U.S. who contracted measles were adequately vaccinated.

In 1995, 56% of all measles cases in the U.S. occurred in people who were previously vaccinated.

Julie Franz The "argument" is that the reason it is mostly vaccinated people is because most of the population is vaccinated and that if they weren't, the numbers would be much higher.

That being said, I say let them get the measles! It's a cyclical infection that will continue to circulate regardless of vaccination status. Those who get it will have lifetime immunity and will pass that immunity to their children if they breastfeed to protect them during infancy. Thousands of negative side effects from vaccination occur every day, including permanent disability and death in the name of offering a potential temporary protection from a benign, self limiting illness. The ignorance surrounding this

"Vaccine preventable disease" outbreaks ALWAYS occur in the vaccinated population, because vaccines cause the very diseases they're supposed to prevent. The measles vaccine contains a live measles virus and when injected into a person, no surprise, it causes the measles!

You're retarded for not vaccinating your kids. Don't worry. I'm calling a coffin maker for your babies. I'll even make funeral arrangements for them.

This is the perfect example of using fear and outright lies. Statistics have shown that vaccinated infants have much higher death rates through SIDS (Sudden Infant Death Syndrome). Must be all those poisons in the vaccine ingredients.

Online trolls, like the drug companies that hire them, are crooks. They will say and do anything to get their bonuses, even injure and kill children in the

process. They are crooks and not to be trusted with your health.

Vaccines and SIDS: is there a link?

The U.S. has the most vaccines given in the first year of a child's life: 35	The U.S. leads the developed world in infant mortality 	More than 23,000 healthy babies
The U.S. is number 1 in first day death rates 	Children in Mississippi receive the most vaccinations in the U.S. and the state has the highest infant death rates 	DIE every year in the U.S.

Healthy babies do not **just die**... LearnTheRisk.org/SIDS

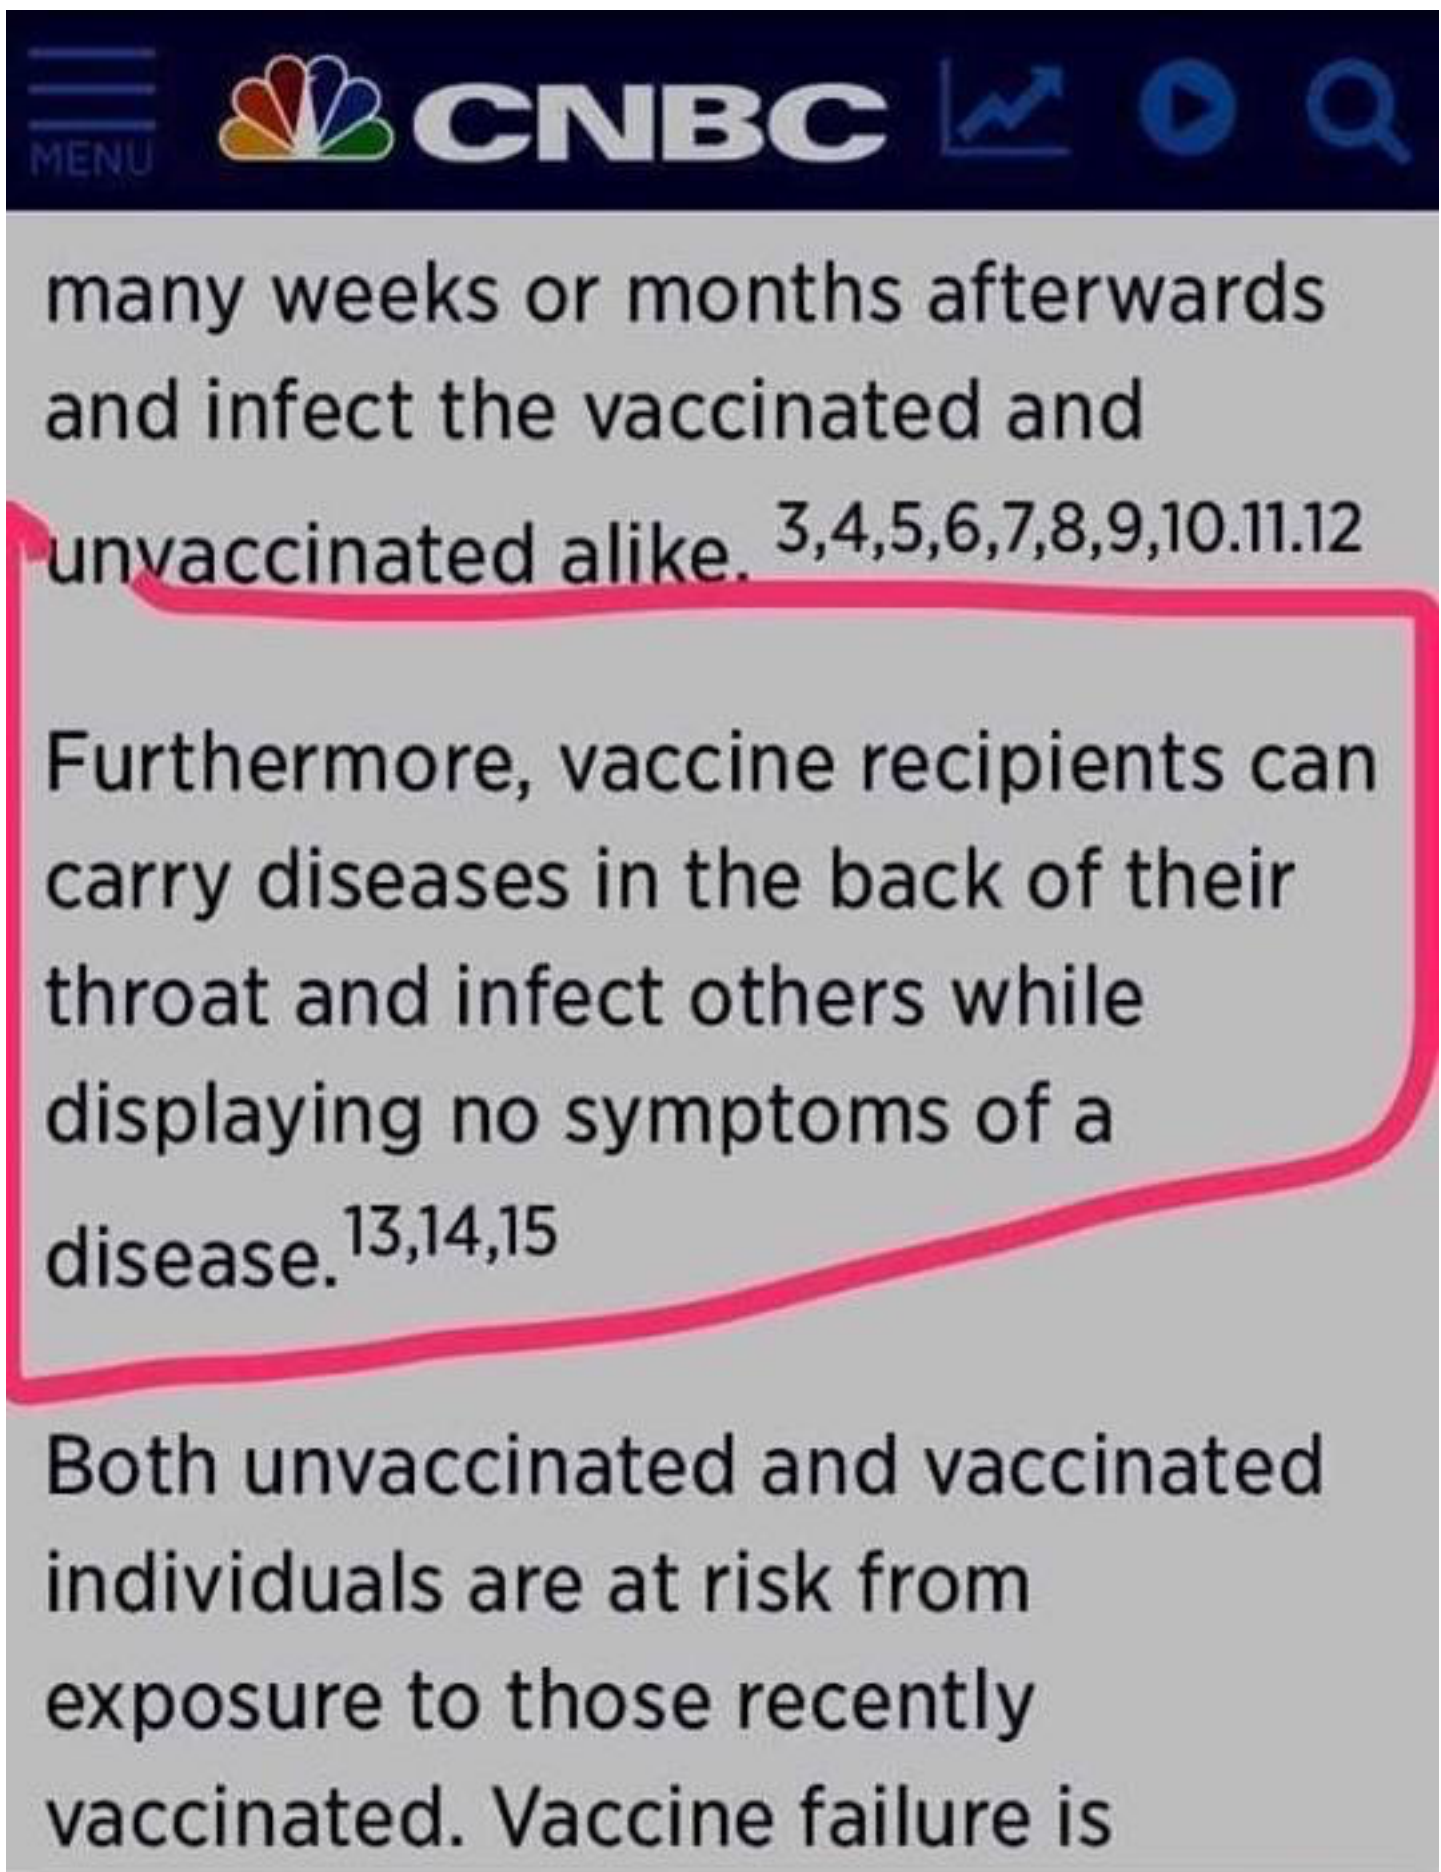

SIDS is actually VIDS (Vaccine Induced Death Syndrome). Over 23,000 infants in the US die a year shortly after vaccination. A listed side effect of childhood vaccines is SIDS. It's not a coincidence. "A single vaccine given to a 6 pound infant is the equivalent of giving a 180 lb. adult 30 vaccines in one day." —Dr. Boyd Haley, MD

Anti-vaxxers should move to their own island.

Good idea. The inserts of live vaccines, those that contain real attenuated (weakened) viruses such as the MMR, state that vaccinated people spread diseases through SHEDDING because they've been injected with poisons, viruses, and diseases.

“You'd think there would be loads of studies showing that vaccinated kids are healthier than non-vaccinated kids. There's not a single study showing that. Not one. There are increasing studies showing the reverse is true. It's the vaccinated kids with autism. It's the vaccinated kids with allergies; with asthma, with neurological problems; with weaker immune systems; with

personality disorders; with cancer. Not the non-vaccinated children...Childhood vaccines are giving us a world of chronic illness: autism, developmental disorders, Asperger's Syndrome, brain tumors, leukemia, cancers, information processing disorders, impulsive violence, allergies, asthma, diabetes, Crohn's disease, intestinal disorders, are just some of the vaccine associated disorders." – Dr. Tedd Koren, DC

many weeks or months afterwards and infect the vaccinated and unvaccinated alike. 3,4,5,6,7,8,9,10,11,12

Furthermore, vaccine recipients can carry diseases in the back of their throat and infect others while displaying no symptoms of a disease. 13,14,15

Both unvaccinated and vaccinated individuals are at risk from exposure to those recently vaccinated. Vaccine failure is

Proof that the vaccinated spread diseases. It even states it on the vaccine insert.

Anti-vaxxers are idiots. Doctors and scientists recommend vaccination. Trust doctors and scientists, not anti-vaxxers.

You mean these doctors?

“The public is woefully uninformed on vaccine risks due to government and mainstream media censorship.” – Dr. Mark Geier, MD

"Crib death was so infrequent in the pre-vaccination era that it was not even mentioned in the statistics, but it started to climb in the 1950s with the spread of mass vaccination." —Dr. Harris L. Coulter, PhD

"In my medical career I've treated vaccinated and unvaccinated children. The unvaccinated children are far healthier than the vaccinated ones." —Dr. Philip Incao, MD

No doctor, no scientist, no politician has ever, never, signed a legal document guaranteeing that “vaccines are safe and effective”. They never will sign a legal document because vaccines have never been safe and effective. When examined further, every doctor, scientist, and politician who have pushed vaccines have received money from the drug companies. The whole system is corrupt. There are thousands of nurses, doctors, and scientists against vaccination.

Vaccines are an elaborate business intended to create repeat customers. The vaccine industry involves the drug companies, media, hospitals, doctors, pediatricians, insurance companies, and medical device companies. Healthy people don't make money for the sickcare industry. Getting people sick is a trillion dollar business.

You trust the concerned parents who are voicing stories of their vaccine injured children. You do not the corrupt politicians and criminal drug companies.

And these doctors?

“The entire vaccine program is based on massive FRAUD.” —Dr. Russell L. Blaylock, M.D., neurosurgeon, editorial staff of Journal of American Physicians and Surgeons

“The vaccine industry is itself a FRAUD. I spent my whole career studying vaccines.” —Dr. Shiv Chopra, B.V.S., A.H., M.Sc., PhD, Fellow of the World Health Organization

“The vaccine science isn’t settled, it’s corrupt.” —Dr. James Meehan, MD

What chemicals are in the HPV vaccine?

The neurotoxic chemicals found in the Gardasil vaccine are foreign to your immune system, which may prompt it to try and fight to protect you. The HPV vaccine contains two powerful synthetic chemicals, **sodium borate** and polysorbate 80 that have been linked to infertility, birth defects, and developmental disabilities. Nov 25, 2013

[The Harmful Truth About Gardasil Finally Revealed - Ask Dr. Maxwell](#)

DRUG COMPANIES ARE NOW HAILING AUTISM AS A GIFT. They can longer deny that vaccines cause autism, so now they're promoting autism as "neuro diversity" and "a gift". If selling poisons wasn't enough, now they're selling brain damage.

"Vaccines are heavily contaminated. Some vaccine lots are more contaminated than others, some doses of the contaminated lot are more contaminated than others, so if you happen to get the contaminated dose, then guess what happens to your immune system? It goes down. You're weakened, you're susceptible to infectious diseases. In addition, the multiple drugs and vaccine reaction wreck havoc on your body. This is what they aren't telling you. The game is to manipulate through fear...some people are so brainwashed, they're braindead." —Dr. Leonard Horowitz, MPH (Master of Public Health), DMD, MA, Harvard University graduate

The health and safety of our children is of the utmost importance.

Agree. That's why parents who vaccinate their children without researching vaccine ingredients, side effects, and disease mortality rates should be charged with child abuse. They research car seats, blankets, cribs, but not vaccines? That's outright neglect and child abuse.

Vaccine injury is all around you. It's common but people have been conditioned to think it's normal. Being sick isn't normal.

I was vaccinated and nothing happened to me.

Are you the picture of health? Probably not. Vaccine ingredients have drastically changed over the years. Vaccines now include animal DNA, human DNA, animal blood, aborted baby parts, polysorbate 80, and some even glyphosate (the same ingredient used in pesticides). Also, children are being vaccinated more because the number of recommended vaccines have increased from 4 in 1940 to 74 in 2018. Also, smoking causes lung cancer, but not everyone who smokes gets lung cancer. Most people are clueless they're

being spoon fed misinformation.

**In 1986, Pharmaceutical manufacturers producing vaccines were freed from ALL liability resulting from vaccine injury or death by the Childhood Vaccine Injury Act.*

With this, vaccines became HIGHLY profitable. There are 271 vaccines in development and mandatory vaccine laws for children — and ADULTS — being pushed in most states.

The US gives 2-3x more vaccines to children than most developed countries, yet we have some of the highest rates of childhood issues that are NOT seen in other countries. Things like asthma, childhood diabetes, food allergies, childhood leukemia, developmental delays, tics, ADHD, autism, lupus, arthritis, eczema, epilepsy, Alzheimers, brain damage, etc... **It's NOT a coincidence.**

Vaccines contain toxic chemicals that do NOT belong in our bodies, such as aluminum (known to cause brain and developmental damage even in small doses) and formaldehyde (known to cause cancer in humans).

**LEARN
THE
RISK.ORG**

Yes, vaccines contain poisons. But poisons are found in some fruits and food. It's not a big deal.

Injection and ingestion/digestion are two different biological processes. Injection is much more potent because it bypasses the body's filtering mechanism (kidneys, liver, stomach). Anything that is injected bypasses the filters and goes to the bloodstream. That's the reason heroin users inject their drug and don't swallow it. For example, about 95% of the aluminum we ingest is filtered, while about 95% of the aluminum we inject is absorbed into the muscle, then the bloodstream and is distributed throughout the body.

Anti-vaxxers are are not scientists! Scientists have done studies and those studies have shown vaccines don't cause autism!

First, the DTaP vaccine insert and the MMR vaccine insert state that autism is a side effect (adverse reaction) of those vaccines. There has never been an independent, randomized double-blind placebo controlled study that shows vaccines work or that they don't cost autism. An independent study means one NOT funded by a drug company. One control group must be unvaccinated—a group that has never been vaccinated.

Original M.M.R. insert is never given to
An Excerpt from the Original M.M.R. Drug Insert

The following afflictions affecting nearly every body system -- blood, lymphatic, digestive, cardiovascular, immune, nervous, respiratory, and sensory -- have been reported following receipt of the MMR shot: encephalitis, encephalopathy, neurological disorders, seizure disorders, convulsions, learning disabilities, subacute sclerosing panencephalitis (SSPE) demyelination of the nerve sheaths, Guillain-Barré syndrome (paralysis), muscle incoordination, deafness, panniculitis, vasculitis, optic neuritis (including partial or total blindness) retinitis, otitis media, bronchial spasms, fever, headache, joint pain, arthritis (acute and chronic) transverse myelitis, thrombocytopenia (blood clotting disorders and spontaneous bleeding) anaphylaxis (severe allergic reactions) lymphadenopathy, leukocytosis, pneumonitis, Stevens-Johnson syndrome, erythema multiforme, urticaria, pancreatitis, parotitis, inflammatory bowel disease, Crohn's disease, ulcerative colitis, meningitis, diabetes, **autism**, immune system disorders, and death (Figure 49).(10,11).

The M.M.R. vaccine manufacturer has begun censoring autism from the package insert for its second version of the M.M.R. vaccine ("M.M.R. 2"). Most of the above indications continue to be listed in the package insert of an autism link, which has been selectively removed. The

Autism is clearly stated as a side effect (adverse reaction) of the MMR and DTaP vaccines.

In 2019, Swiss drug company Novartis (U\$ 194 billion market value as of May 2019) funded a large scale study proving that the MMR vaccine didn't cause autism. This was the news headline: "Study on 657, 461 Children Finds No Link Between Vaccines And Autism". However, when examined closely,

1. Novartis is a drug company and vaccine maker. Regardless of what the company claims, there are obvious conflicts of interest and biases involved with the study.
2. The study was done comparing a group of FULLY VACCINATED vs. a group of FULLY VACCINATED + MMR VACCINE. They called the "fully vaccinated" group the UNVACCINATED group. See how silly that is? The second group is also fully vaccinated but also had the MMR vaccine. Even using fraud, the MMR group had slightly higher autism rates. They said it was "statistically insignificant."

Jaime Lorraine

2 hrs · 🌐

Unvaccinated means 2 different things to us and our regulatory agencies. According to the CDC, unvaccinated can mean you missed ONE dose or skipped ONE vaccine. It does not mean you've never been vaccinated. So, again, people only read headlines to these bogus pharma and government funded epidemiological studies that show "the unvaccinated have just as much autism as the vaccinated" and again, they've only ever looked at ONE vaccine out of the 16 on the schedule. The MMR.

Based on studies done by a very well respected scientist, Dr. Zhibin Yao, the Hepatitis b vaccine ,given within 30 minutes of being born , is a major source of the ever increasing Neurological damage we see in this sick generation.

I'll post his study. See comments. [#hepatitisb](#) [#neurologicaldamage](#)

"Unvaccinated" does not mean what you think it means. The CDC, a private corporation that markets and sells vaccines, and drug companies, have a different definition of "unvaccinated".

When we think of “unvaccinated”, we think of someone who has never been vaccinated. To the drug company that funded the study, unvaccinated means “fully vaccinated”, and fully vaccinated means “fully vaccinated and the vaccine in question”.

Why aren't there large scale studies comparing truly unvaccinated people versus fully vaccinated people? The answer is obvious. Read the vaccine ingredients and side effects.

The National Childhood Vaccine Injury Act (NCVIA) was passed in 1986. The act prevented parents from directly suing the drug companies for injuries and deaths caused by vaccines. The parents had to go through a special administrative court. Since NCVIA was passed, the numbers of vaccines has increased, and so has the autism rate. Vaccines contain heavy metals that cause brain damage. Autism is a form of brain damage. So, do vaccines cause autism? Does smoking cause lung cancer?

Don't be selfish and vaccinate for the immuno-compromised and

elderly. And do it for herd immunity.

These are marketing strategies based on shame. Vaccines don't work. Over 150 years of data and independent studies have shown that. Any further argument is fallacious.

Also, if vaccines are supposed to make people healthy and are "safe", then the sick and elderly should benefit from them, right? Moreover, nearly everyone who is "immuno-compromised" was vaccinated or had chemotherapy. That's because vaccines and chemotherapy weaken the immune system. I know 3 children who are immuno-compromised and all three were vaccinated. Again, it's fraud when examined closely.

Washington, D.C., March 3, 2015 (GLOBE NEWSWIRE) -- Physicians and public health officials know that recently vaccinated individuals can spread disease and that contact with the immunocompromised can be especially dangerous. For example, the Johns Hopkins Patient Guide warns the immunocompromised to "Avoid contact with children who are recently vaccinated," and to "Tell friends and family who are sick, or have recently had a live vaccine (such as chicken pox, measles, rubella, intranasal influenza, polio or smallpox) not to visit."¹

A statement on the website of St. Jude's Hospital warns parents not to allow people to visit children undergoing cancer treatment if they have received oral polio or smallpox vaccines within four weeks, have received the nasal flu vaccine within one week, or have rashes after receiving the chickenpox vaccine or MMR (measles, mumps, rubella) vaccine.²

"The public health community is blaming unvaccinated children for the outbreak of measles at Disneyland, but the illnesses could

Vaccinated people are disease carriers and may not know it.

Herd Immunity doesn't mean what most brainwashed people think it means. Read up on it. Anyone who believes in "herd immunity" is part of the Herd

The herd immunity theory was originally coined in 1933 by a researcher called Hedrich. He had been studying measles patterns in the US between 1900-1931 (years before any vaccine was ever invented for measles) and he observed that epidemics of the illness only occurred when less than 68% of children had developed a natural immunity to it. This was based upon the principle that children build their own immunity after suffering with or being exposed to the disease. So the herd immunity theory was, in fact, about natural disease processes and nothing to do with vaccination. If 68% of the population were allowed to build their own natural defenses, there would be no raging epidemic.

Later on, vaccinologists adopted the phrase and increased the figure from 68% to 95% with no scientific justification as to why, and then stated that there had to be 95% vaccine coverage to achieve immunity. Essentially, they took Hedrich's study and manipulated it to promote their vaccination programs.

Vaccination doesn't confer herd immunity, as most people think. It's the opposite. The term "herd immunity" was coined by A.W. Henrich in 1933 to describe natural immunity from measles.

You're irresponsible and a bad parent if you don't vaccinate your kids.

You vaccinate your kids against benign illnesses and put them at risk for brain damage, cancer, and death. You're the irresponsible parent. You don't even know the mortality rate of the vaccinated vs. unvaccinated of the diseases you vaccinate for.

What's in your vaccine cocktail?

Not all vaccine ingredients are listed on the package insert. There are hidden ingredients that drug

companies don't have to list due to "trade secret" laws. Therefore, you don't know what you're getting with vaccines.

Not vaccinating is child abuse. Your children should be taken from you if you don't vaccinate.

You inject your kids with heavy metals, carcinogens, animal DNA, animal blood, human DNA, and neurotoxins. You're the one abusing your kids.

WHAT'S IN A VACCINE?

NONE OF THESE SHOULD BE INJECTED INTO YOUR BODY.

ALUMINUM

Known to cause brain damage at all doses, linked to ALZHEIMER'S DISEASE, dementia, seizures, autoimmune issues, SIDs and cancer. This toxin accumulates in the brain and causes more damage with each dose.

GENETICALLY MODIFIED YEAST, ANIMAL, BACTERIAL AND VIRAL DNA

Can be incorporated into the recipient's DNA and cause GENETIC MUTATIONS.

FORMALDEHYDE [formalin]

Formaldehyde [formalin]
Known to cause CANCER in humans. Banned in Europe. Probable gastrointestinal, liver, respiratory, immune, nerve and reproductive system POISON.

HUMAN AND ANIMAL CELLS

Human DNA from aborted BABIES, pig blood, rabbit brains, dog kidneys, cow hearts, & more. Linked to childhood leukemia and diabetes.

MERCURY [thimerosal]

One of the most toxic substances known. Tiny doses will damage the brain, gut, liver, bone marrow, nervous system and/or kidneys. Linked to autoimmune and neurological disorders.

Polysorbate 80 & 20

Known to cause CANCER in animals and linked to numerous autoimmune issues and infertility.

MONOSODIUM GLUTAMATE [MSG]

A toxic chemical that is linked to birth defects, developmental delays and infertility.

www.march-against-monsanto.com

Vaccine ingredients are more poisonous than those used to make meth. Vaccines have more and deadlier side effects than cigarettes.

Anti-vaxxers are morons. Aluminum, mercury, and other heavy metals are needed in vaccines to jumpstart the immune system.

Vaccination is a THEORY: Inject poisons, viruses, and diseases into the body to prevent disease. When you inject poisons, viruses, diseases into the body, you become diseased or dead. Just look at the side effects of vaccines. The vaccination theory has never been shown to work. If it worked, you could drink Windex, dishwashing soap, or any poison in small amount and your antibodies would increase and immune system stimulated.

"Vaccination is based on the long-discredited theory that stimulation of antibodies in the human body equals protection from disease. This theory has not only failed to be proved, but has been repeatedly disproved. Stimulation of antibodies does not equal immunity and certainly does not equal permanent immunity. The presence of antibodies is merely a sign of exposure to a disease, which is just one small aspect of what makes up the immune system. Children, with underdeveloped and immature immune systems, receive today about 25 separate vaccines by the age of 13 months. There is no doubt this irresponsible vaccination disrupts and can even destroy the development of their immune systems forever." —Dr. Majid Katme, MBBCh, DPM

Haha

Reply

More stupidity from the trolls. What was the name of this unvaccinated person who she's accusing of spreading diseases? She doesn't know because she's talking out of her ass. If she knew the name, it would be the first documented case of an unvaccinated communicating their disease to a vaccinated person. She could had been famous for making the discovery!

Your baby will die if you don't vaccinate it. You're signing your baby's death certificate by not vaccinating it.

A clear case of bullying and coercion. The chance of your baby dying is significantly higher when they're vaccinated.

Liz Watkins Barton

May 4 at 12:49 PM

Mason Bundy died within 3 days of receiving the DTaP vaccine after the pediatrician told his young parents that they would be "signing his death certificate" if they didn't agree to it.

From his mother...

"On March 5, 2011 at 12:06am, I found my four-month old son, Mason, dead in his bed.

I had just leaned over his pack n play to give him a kiss good night before going to sleep when I realized his skin was ice cold... and that he wasn't breathing.

That's the day that I stopped living."

Please watch this interview with the parents. It's only 8 minutes long.

The pediatrician said the parents were signing their baby's death warrant by not vaccinating. The baby was vaccinated and died.

Doctors and pediatricians make money from vaccines, especially those in the US.

Are *Unvaccinated* Children *Healthier*?

Resource: Mawson AR, et al. Pilot comparative study on the health of vaccinated and unvaccinated 6- to 12-year-old U.S. children. *J Transl Sci*. 2017. 3(3): 3-12.

You can't get autism if you die from polio and smallpox.

1) Vaccines don't work.

2) About 99% of polio was caused by the oral polio vaccine, even the inventor of the oral polio vaccine, Jonas Salk, admitted this to the US Congress in the early 1970s. This oral polio was discontinued because it was causing thousands of injuries and deaths.

3) Vaccines never eradicated smallpox. Sanitation, hygiene, and nutrition

eradicated smallpox. This was clearly demonstrated by the official statistics of the time.

“It is clear that the mortality from both causes fell very remarkably, and that in the case of smallpox as well as in the case of ‘other zymotics’ the decline had set in before the end of the eighteenth century—in other words before the beginning of the vaccination era.” — Dr. C. Killick Millard, M.D., D.Sc., “The Vaccination Question in the Light of Modern Experience”, 1914, chap. 2

Mortality from smallpox and other zymotic (infectious, contagious) diseases in London, 1760 to 1910. Official statistics from the Registrar General, England 1760-1910. From this historical data we know that vaccines had no role in preventing zymotic (infectious, contagious) diseases. Vaccines did not eradicate smallpox.

“Vaccination is utterly useless as a preventive against smallpox, that millions of vaccinated persons have died of smallpox.” —Dr. J.W. Hodge, MD, New York

“I know of one epidemic of smallpox comprising nine hundred and some cases in which 95% of the infected had been vaccinated, and most of them recently. I have had in my own experience on very small epidemic comprising 33 cases, of which 29 had vaccination histories a ‘good’ scar, and some of them vaccinated within the last year. There was no protection there.”—Dr. William Howard Hay, 1937

Your unvaccinated children are walking diseases. Keep them away from my children.

Great idea because, 1) Vaccines don't work, 2) Vaccinated people spread diseases through SHEDDING because they've been injected with poisons, viruses, and diseases, 3) Unvaccinated people can't spread diseases they don't have.

If you vaccinate, then you must believe vaccines work. You are protected against whatever diseases you're vaccinated for. Don't worry about other people. Your vaccines will protect you, right? After all, vaccines are safe and effective. You're vaccinated. You're safe. You're protected. Don't worry about anyone else.

Laura Condon
1 hr

**Have you noticed that the
only ones afraid of
measles are the ones who
are vaccinated?**

That's because vaccines don't work.

Here's a typical joke about an uninformed person who supports vaccination. A mother takes her child to get vaccinated and the child dies after vaccination.

Mother, "My child died after vaccination!"

Doctor, "Please calm down! Death is a normal reaction to vaccines. It's normal."

Mother, "What!"

Doctor, "Death is listed as an adverse reaction of vaccines. It's stated on the product insert. Your child had an expected, normal reaction to the vaccine we administered. We've done lots of studies on it. Death is a normal adverse reaction."

Mother, "Oh. I didn't know that."

Mother goes online, "All you anti-vaxxers are a danger to society. Doctors and scientists have studied this issue! If your child gets cancer, brain damage, allergies, asthma, or is dead after vaccination, those are normal reactions! They've done tonnes of studies. I trust doctors and scientists!"

My kid is vaccinated and fine...

Vaccine injuries are all around you. Look at the adverse reactions and compare them to those you know in real life. It is an epidemic on a monstrous scale.

Vaccines are safe and effective. Vaccines saved millions of lives.

“Vaccines are safe and effective”, “The science is settled”, and “Vaccines saved millions of lives” are marketing slogans created by the drug companies. Other popular marketing slogans: Coke Is It, Just Do It.

If people would stop watching mainstream television and reading the

mainstream newspapers, these diseases would magically disappear.

Vaccines make you healthy and prevent diseases. Are you really that dumb not to vaccinate your kids?

Drug companies (vaccine makers) make money from sick people. If vaccines make you healthy, how do drug companies make money?

LESS THAN 1% OF VACCINE INJURIES ARE REPORTED

2018 VAERS (Vaccine Adverse Event Reporting System) U.S. STATISTICS	IF ALL VACCINE INJURIES WERE REPORTED
60, 544 REPORTS	6, 054, 400 REPORTS
443 DEATHS	44, 300 DEATHS
1, 267 PERMANENT DISABILITIES	126, 700 PERMANENT DISABILITIES
4, 414 HOSPITALIZATIONS	441, 400 HOSPITALIZATIONS

There is no other product that causes these many injuries and deaths and continued to be sold and marketed as "safe and effective." Drug companies are protected from direct liability by the 1986 H.R.5546 National Childhood Vaccine Injury Act. Save for rare circumstances, vaccine injured victims must make claims through NVIC (National Vaccine Injury Compensation Program). Vaccines have never been safe and effective.

"Adverse events from drugs and vaccines are common, but underreported. Although 25% of ambulatory patients experience an adverse drug event, less than 0.3% of all adverse drug events and 1-13% of serious events are reported to the Food and Drug Administration (FDA). LIKEWISE, FEWER THAN 1% OF VACCINE ADVERSE REACTIONS ARE REPORTED." —Dr. Ross Lazarus, MBBS, MPH, MMed, GDCCompSci, Vaccine Adverse Event Reporting System (VAERS)

Anti-vaxxers are conspiracy theorists and stupid. Anti-vaxxers are

child killers.

More big pharma trolls gone wild. Vaccination is a serious topic, so leave your tin foil hat home. Vaccinated children are more likely to die than unvaccinated children. Every independent study has shown this. Ever heard of SIDS (Sudden Infant Death Syndrome). It's listed as a side effect of many vaccines. The US has the highest infant vaccination rate in the developed world; it also has the highest infant death rate in the developed world. Must be something in the vaccine ingredients, eh?

Vaccination is for people who can't do basic math. Here's a simple math test:

- 1) Pick a disease.
- 2) What is the death rate of that disease with vaccination?
- 3) What is the death rate of the disease without vaccination?

**Vaccine injury isn't rare. It's everywhere you look.
The best vaccine has an efficacy rate of 95%.
The unvaccinated efficacy rate is over 99% for
every disease.
Most people still vaccinate because they don't
know basic math.**

Vaccine injuries and deaths are common. We've been brainwashed into believing they're normal. There's nothing normal about being chronically sick.

The drug companies have been fined \$35 BILLION since 2009, mostly for fraud. In 2018, they collectively made \$100 billion in profit in one year. Their collective stock market value is over \$1 TRILLION. It's not about conspiracy. It's about increasing revenue, profit, and shareholder value. Imagine the crimes you'd have to commit to be fined \$35 billion in 10 years. Seriously, imagine it.

How the drug companies (Big Pharma) run the vaccine business. Their tentacles are wide and deep.

Anti-vaxxers are spreading...the truth about vaccines!

SELLING VACCINES

FEAR

In the first four months of 2019 , there were daily reports on mainstream media about the measles and mumps outbreaks threatening national security and public health.

The drug companies hired an army of online trolls to insinuate that unvaccinated parents were killing vaccinated babies and their own babies by not vaccinating.

Get ready for the flu epidemic next. Rinse and repeat.
Vaccination is the biggest medical fraud in history.

The vaccine makers have been fined \$35 BILLION since 2009, mostly for fraud and false advertising. Now you know how they operate.

FACT

The drug companies drafted several mandatory vaccination bills. They wanted to pass those bills in California, Oregon, Colorado, Texas, and New York. When those bills were decided and concluded, the "outbreaks" were suddenly declared over by the media. The incident rates of those diseases had not changed in prior months, and no one died during those outbreaks. The timing of the outbreaks coincided with the mandatory vaccination bills drafted by the drug companies.

SIDS (Sudden Death Infant Syndrome) is the leading cause of infant deaths in the US. SIDS is listed as a side effect of childhood vaccines.

Vaccinated people carry diseases because they've been injected with viruses and diseases. They spread those diseases through SHEDDING.

Healthy unvaccinated people cannot communicate a disease you don't have.

The drug companies have an army of lawyers. If you slander or defame their products, they could sue you. However, I can say,

“Vaccination is the biggest medical fraud in history.”

“Vaccines are poison.”

“Vaccines cause brain damage, cancer, and death.”

I can't be sued because those statements are true. They are backed by court documents and historical data.

Vaccine-injured Child used to Push Vaccine Agenda

(April 16, 2019) A vaccine-injured child was used by CBS last week to push the vaccine agenda that all mainstream media outlets support at the behest of their **Big**

Pharma advertisers. The

all-seeing “eye” network presented the picture of a blotchy-faced infant and captioned the photo to imply he was unvaccinated and suffering from measles as a result. In reality, in the *actual* world,

MMR Vaccine-injured Child used by CBS to push Vaccine Agenda

not the promotional one that CBS lives in, the child looked that way because of his reaction to the MMR vaccine, according to his mother. In fact, beside the obvious signs of a vaccine reaction, the child was also diagnosed with autism following his MMR vaccination. Back to the drawing board,

Vaccines work and save lives. My son gets his one year round of vaxx tomorrow always up to date, my entire family.

That's great. Vaccines are safe and effective. You love vaccines. Your doctor loves vaccines. Now, show us videos of the needle going in each time you're vaccinated. You can say anything online. It doesn't make it true, especially if you're paid to say things online or your job is tied to vaccines. If vaccines are so great, why don't doctors and pharmacies allow you to video being vaccinated, just in case something goes wrong you have evidence to show the court how safe and effective vaccines are.

Megan Media (SocialMoms) | CDC Vaccination Awareness Paid Blogging Opportunity

We are looking for Moms with kids under the age of 2 years old (or who can reach that audience) who want to raise awareness around childhood vaccinations. The recommended immunization schedule is designed to protect infants and children early in life, when they are most vulnerable and before they are exposed to potentially life-threatening diseases.

Please fill in the form below if you are interested and feel free to forward this on to any other influencers you may know who would be interested in spreading the word! Please click here for more information: <http://1.usa.gov/1MmMVfB>

This campaign begins on or around April 11th and will last approximately one month. Thanks for your consideration!

Ready for this? the cdc has now resorted to paying moms to blog about vaccines.. this movement is geared up to start on April 11th.. so just be warned.

For those who don't know, many of the doctors, scientists and ex vaxx moms (of kids who were injured, like our family) have been working together to fight against legislation that is trying to take away medical freedom and mandate vaccines.. first for kids (even ones like mine who have been injured and already have 5 times the level of antibodies needed) then the plan is for adults.. so fb and google, Netflix, Amazon just to name a few have been pulling and banning research, documentaries, books, articles, even things as simple as the Brady Bunch episode where all the kids had the measles.. major censorship campaign going on. Whatever your opinion is, you are entitled to have it and be the one to choose what is best for your family. Pay close attention to what is happening and Protect your Freedom.

Please research this and see what this media company does.. they have a fake mom blog that their customers (in this case the cdc) use to manipulate the thinking of its readers.

When asked for an exemption, she simply REFUSED. She demanded they show her the studies and science. She also challenged them to call the police if they wanted her child removed from the school.

They did not.

We need to change our posture regarding this situation. We need to take our power back.

Reminds me of the inpower movement.

11 Comments

File a SCIENTIFIC EXEMPTION

They have to prove vaccines are "safe and effective".

- Ask for the ingredients and side effects.
- Ask for the injury rate of the vaccine.
- Ask for the death (mortality) rate of the disease with the vaccine.
- Ask for the death rate of the disease WITHOUT the vaccine.

The studies must be from independent parties and not the drug companies that make the vaccine.

File a LEGAL CHALLENGE

- Who is legally responsible if my child is injured or killed by the vaccine?
- Financial conflict of interest. Does the school or workplace make money directly or indirectly from the vaccine being administered.

The drug companies don't have the right to force their products on you anymore than the tobacco companies do.

MANDATORY VACCINATION and what to do. There has never been a double-blind placebo controlled study comparing the vaccinated to the unvaccinated that shows vaccines work. In other

words, vaccines don't work.

How did you make it to adult without vaccines?

Hominids have been around for 4.4 million years and did fine without vaccines. The first vaccine was introduced in 1796.

Moreover, over 150 years of data shows that vaccines are based on fraud. There are about 200 countries on Earth. India, China, and the continent of Africa were multiplying like rabbits BEFORE vaccines. If you live in the US, UK, Canada, or Australian, you are a tiny minority who have been conditioned (brainwashed) into believing vaccines saved lives. Every study has shown that when there is clean running water, the birth rate always exceeded the death rate.

As someone with an autoimmune disease, it should be considered self-defense for me to kill any unvaxed child that comes near me. You get to threaten my life because you wouldn't love a child if they were autistic? You shouldn't be allowed to have that child. And that child shouldn't be allowed to threaten my life. My tax dollars pay for schools too. And my kids have every right to be there. Clearly school wasn't able to educate you, so why would your brat fare any better?

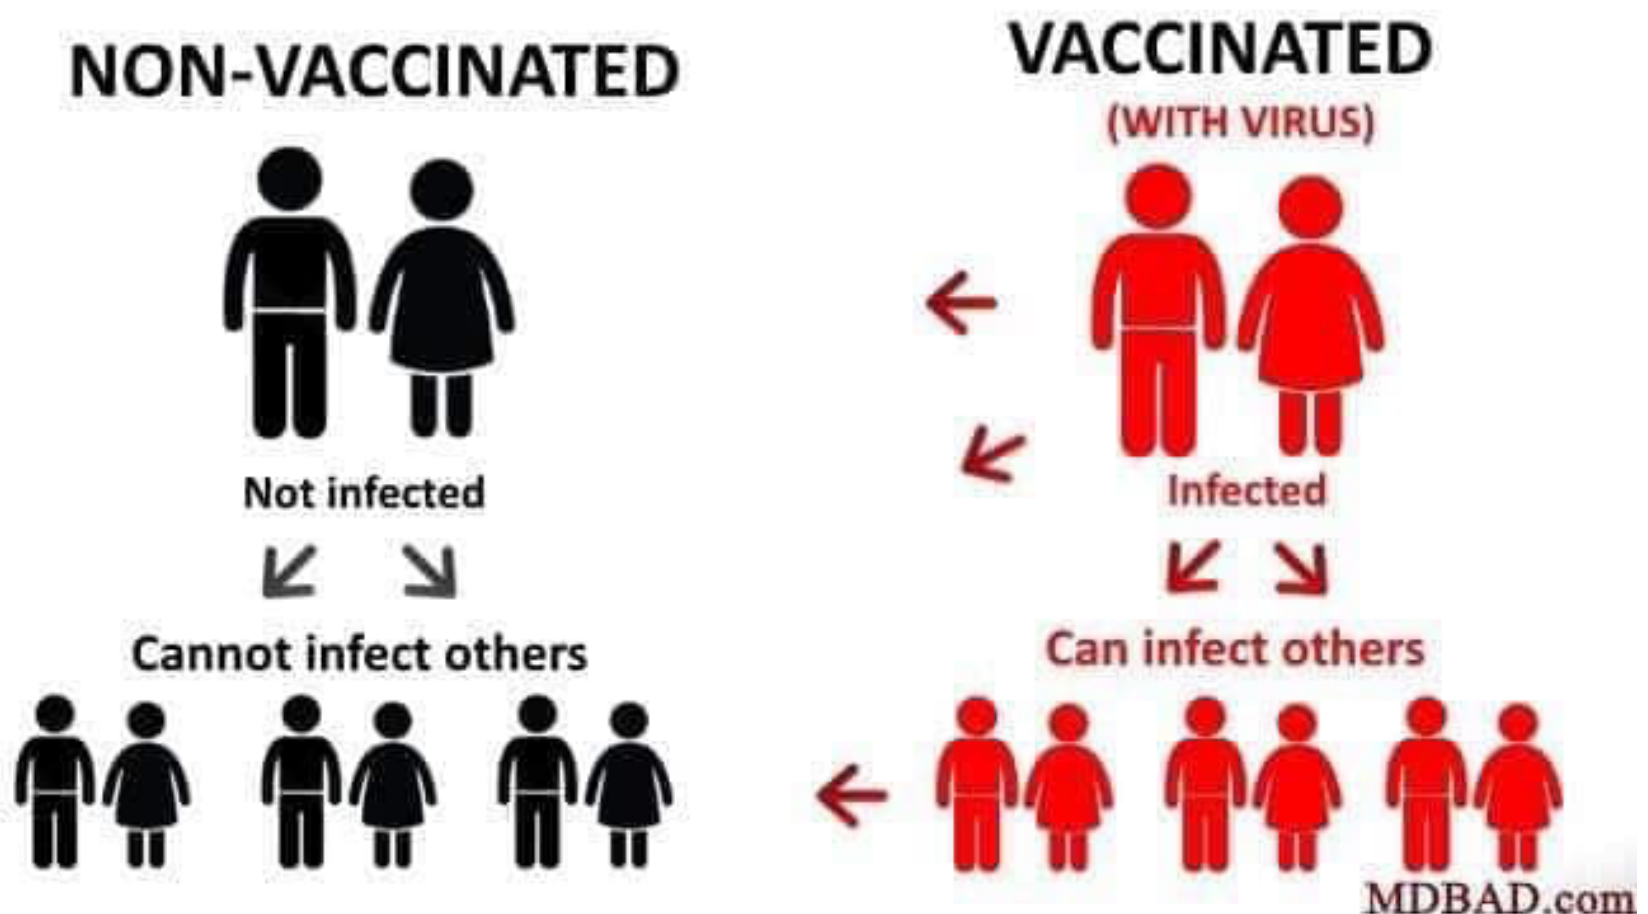

7 hours ago • Like • Reply •   2

The product insert of most vaccines state that they cause autoimmune diseases. This no-so-smart pro-vaxxer (troll) didn't know that.

Nice try. Calm down, troll. The heavy metals in vaccines have gone to your brain. Vaccines cause autoimmune diseases. It's clearly stated on the insert, which this bonehead didn't bother to read. He or she most likely got the disease from vaccination. Furthermore, vaccines are supposed to strengthen the immune system, so go get vaccinated again.

Healthy unvaccinated people can't spread diseases they don't have. It needs to be said again: **YOU CAN'T SPREAD DISEASES YOU DON'T HAVE.** The first vaccine was introduced in 1796. Since that time, there has never been a documented case of an unvaccinated person communicating a disease to vaccinated person causing death. Never. The post is more proof that vaccination is the biggest medical fraud in history.

WHO IS THE REAL THREAT?

Unvaccinated people are a public risk. They should be refused public services. They should go to jail. They should be

quarantined!

This fear tactic is based on an outright lie. Again, you cannot spread a disease you don't have. There's never been a documented case of an unvaccinated person communicating a disease to a vaccinated person causing death. Never. Ever. In History.

The Washinton Post is owned by Jeff Bezos, who is the founder of Amazon. Amazon bought drug distribution company PillPack for \$1 billion in June 2018. Follow the money. It will lead you to the truth.

However, it's the vaccinated that have been shown to spread diseases through shedding BECAUSE THEY'VE BEEN INJECTED WITH POISONS, VIRUSES, AND DISEASES and are communicating those pathogens to other people.

Vaccinated Population Contracting and Spreading Disease They were Vaccinated For By Dr. Mercola Recently published research in the New England Journal of Medicine 1 investigated the reasons behind, and potential solutions, for mumps outbreaks reported to the CDC during the past several years.

Unvaccinated people are a public healthy risk. We should post the addresses of those who don't vaccinate.

Good idea. That way the vaccinated will see how healthy people look like. Also post the names of those who are vaccinated so the unvaccinated can stay

away from those low IQ walking diseases who believe everything they watch on TV. The people who vaccinate don't even know what disease they vaccinate for or even the death rate of that disease. Or the death rate of the unvaccinated versus the vaccinated for that disease. They're sheep.

KIDS WHO DONT
HAVE MEASLES,
ARE SPREADING IT
@anakeedneedle_vaccinesdivulged
TO KIDS THAT ARE
VACCINATED FOR IT.
...
GOT IT.

Get vaccinated, get a disease. Blame it on the anti-vaxxers because they don't make money for the drug companies, hospitals, doctors, pharmacies, and media.

Anti-vaxxers and the people who believe their drivel shouldn't have kids for the betterment of society.

Many vaccines, especially the tetanus and HPV vaccines, contain sterilization ingredients that cause infertility. Read the ingredients and reports. In addition, the flu vaccine was shown to increase miscarriages (fetal deaths) by 4, 250%.

“Documentation received from the National Coalition of Organized Women (NCOW) states that between 2009 and 2010 the mercury-laden combined flu vaccinations have increased Vaccine Adverse Events Reporting Systems (VAERS) fetal death reports by 4,250 percent in pregnant women. Eileen Dannemann, NCOW’s director, made abundantly clear that despite these figures being known to the Centers for Disease Control (CDC), the multiple-strain, inactivated flu vaccine containing mercury (Thimerosal) has once again been recommended to pregnant women as a safe vaccination this season.”

Gail GQ

April 11 at 8:53 AM

Here's another child with measles.

She didn't get it from an unvaccinated person—she got it from the MMR vaccine. Her mom hired a lab to confirm it was the vaccine strain of measles.

Guess what her doctor called it? "Viral syndrome."

Why? Didn't want to get fired.

One side effect of the measles vaccine is the measles. There isn't a single measles vaccine, it's a combo vaccine called MMR (measles, mumps, rubella). The MMR vaccine is a live, attenuated (weakened) virus. Those who receive it shed the virus to those around them. You're injecting diseases into the body that are unnecessary.

Vaccinate your fucking kids! Or have them taken away by child services.

Your kids are more likely to die from the vaccine than the disease they're vaccinated for. The reason is obvious. Read the vaccine ingredients and side effects.

Childhood

With vaccines

Without vaccines

You decide

PICCOLLAGE

The human body needs nutrients, water, sunlight, and exercise. Poisons (vaccines) have no place in the biology of humans.

The measles outbreaks are going to kill us all!

You have a higher chance of being strike by lightning. The media can't seem to name an unvaccinated person who's died from these measles outbreaks. So, if you want to remain alive during these measles outbreaks, don't vaccinate!

SCURVY

In the 1600 and 1700s, scurvy was a deadly disease that killed about 50% of sailors on long distance voyages. The scurvy death rate was significantly higher than the measles death rate of the 21st century.

A Scottish doctor, James Lind, discovered that scurvy was caused by a vitamin C deficiency. To prevent and cure scurvy, all you had to do was eat fruits rich in vitamin C (oranges, lemons, limes, etc.).

There was never a vaccine for scurvy.
There was never a drug for scurvy.
Scurvy was eradicated with nutrition.

Before 1963, measles was classified as a BENIGN ILLNESS with an extremely low death rate.

The measles death rate had declined by 98% in 1962. Measles was nearly eradicated with nutrition.

Then in 1963, the measles vaccine was introduced and the measles was reclassified as a DEADLY DISEASE.

The measles was chosen by the drug companies as the poster child of "vaccine preventable diseases" because of its grotesque markings, which made it scary and easy to sell the vaccine.

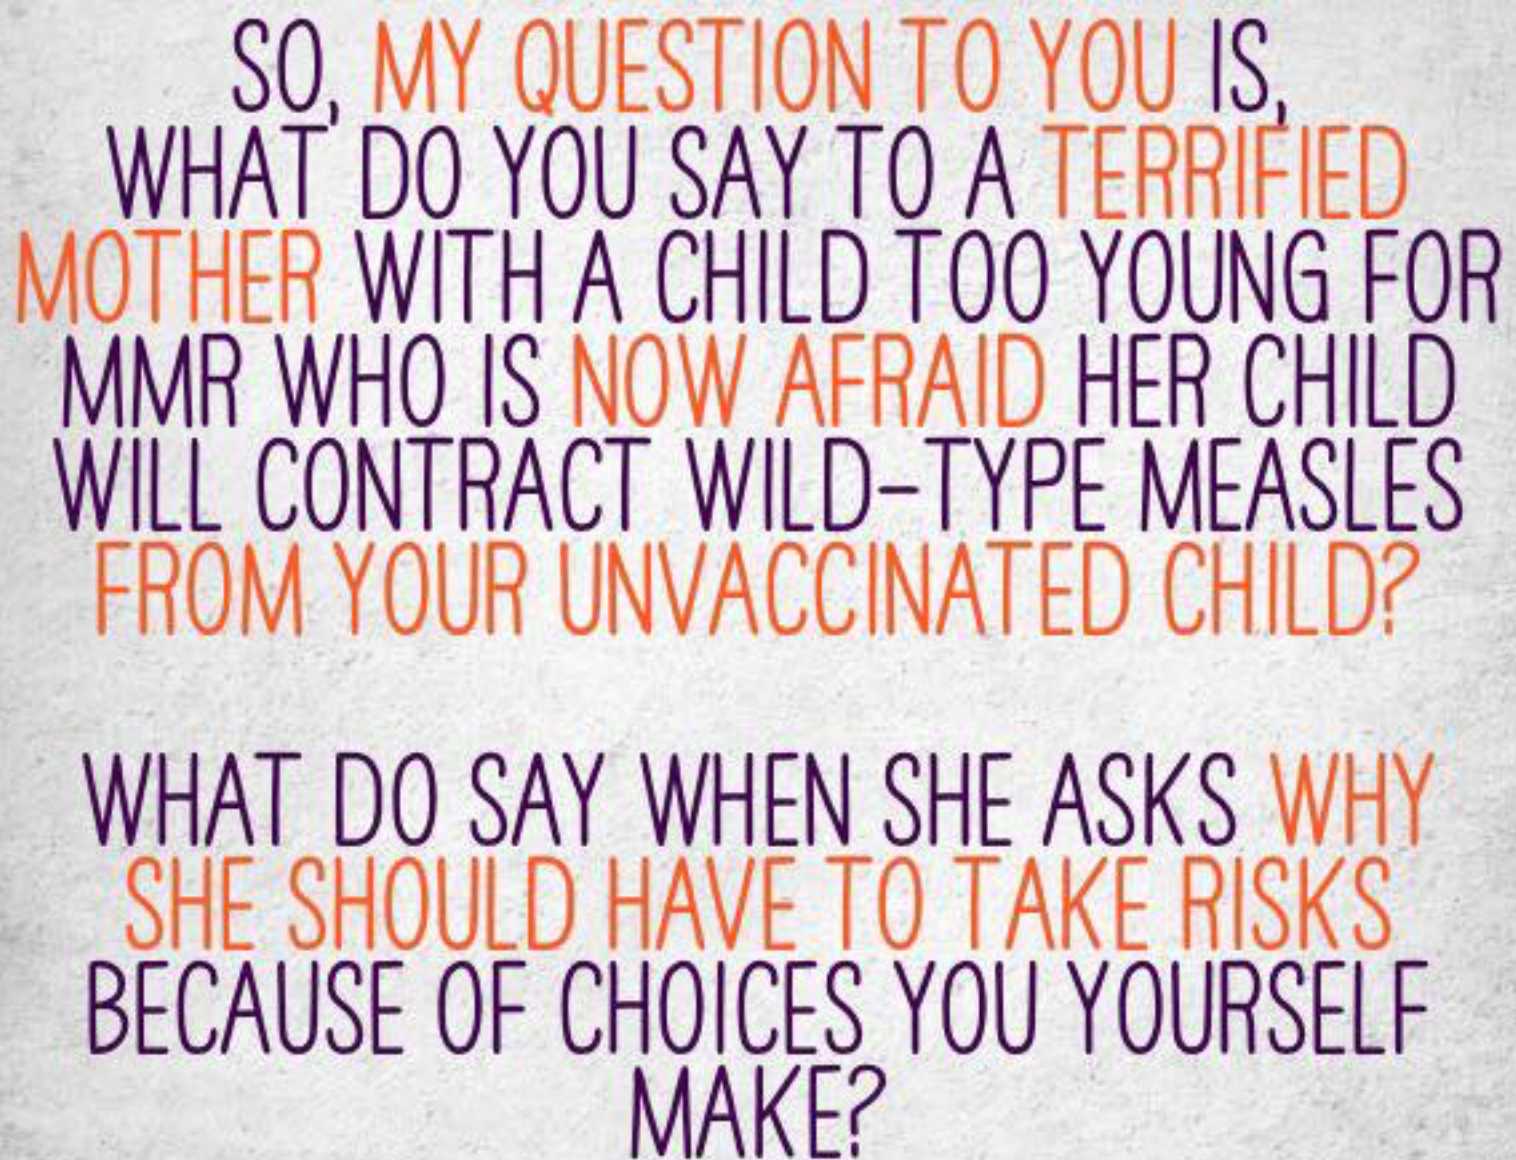

The measles is caused by a vitamin A deficiency (carrots, spinach, squash, lettuce, etc.)

MEASLES

Now we get to the meat of the fear campaign. Blame everything on the anti-

vaxxers and get the blood pumping.

SO, MY QUESTION TO YOU IS,
WHAT DO YOU SAY TO A TERRIFIED
MOTHER WITH A CHILD TOO YOUNG FOR
MMR WHO IS NOW AFRAID HER CHILD
WILL CONTRACT WILD-TYPE MEASLES
FROM YOUR UNVACCINATED CHILD?

WHAT DO SAY WHEN SHE ASKS WHY
SHE SHOULD HAVE TO TAKE RISKS
BECAUSE OF CHOICES YOU YOURSELF
MAKE?

There are many layers of fear with this meme, crafted by the marketing departments of the drug companies.

First, it assumes that vaccines work, when they don't work. Let's examine the complex layers of fear in the above question,

1. It is cleverly equating "unvaccinated" with disease.
2. It is blaming the unvaccinated for spreading diseases.
3. It is making the division between vaccinated ("terrified mothers") and

unvaccinated groups.

- 1) Again, vaccinated people have higher disease rates than the unvaccinated. They often acquire the disease they're vaccinated against. For example, the measles is a side effect of the measles vaccine because the measles virus is in the vaccine.
- 2) Unvaccinated people cannot spread diseases they don't have.
- 3) The measles is a benign illness with lower death rates than being struck by lightning. People are made to fear the measles because there's a vaccine for it.

It is all about fear, shame, blame, and lies to sell vaccines. The drug companies have zero cares about your health. They make money from sick people. If vaccines make people healthy, how do drug companies make money?

Excuses drug companies use when vaccines don't work

When vaccines don't work, instead of admitting that they don't work, the drug companies concoct a myriad of excuses.

- 1) Vaccines don't work because you didn't get a second or third shot.
- 2) Vaccines don't work because women are breastfeeding their children.
- 3) Vaccines don't work because there's no herd immunity.
- 4) Vaccines don't work because there was a bad batch.
- 5) Vaccines don't work because the person had a prior condition.
- 6) Vaccines don't work because we had the incorrect flu strain.
- 7) Vaccines don't work because of anti-vaxxers.

Vaccines don't work because...vaccines don't work because they're based on

over 200 years of fraud. That's the real reason vaccines don't work.

Vaccines are for the good of public health. There is no money to be made in vaccines.

The CDC (Centers for Disease Control and Prevention) is expected to sell roughly \$5 billion of vaccines in 2019. The worldwide vaccine market is expected to reach \$50 billion in 2020. The drug companies collectively have a stock market value of \$1 trillion. There is a ton of money to be made in vaccines.

WA STATE MEASLES OUTBREAK IS OVER!

**NO "DEATHS
OR SERIOUS
COMPLICATIONS"**

**AND A 27% INCREASE IN EARNINGS
FOR MERCK IN THIS
FIRST QUARTER.**

@CHEMFREEKIDS

It's the flu outbreaks, then the measles outbreaks, then some other disease we've never heard of before. That's how they sell vaccines: FEAR.

"Merck & Co Inc reported higher-than-expected first-quarter profit on Tuesday on increased demand for vaccines" "Sales of the company's MMR and chickenpox vaccines rose 27 percent to \$496 million" "Merck is the sole provider of the MMR."

Vaccines are an enormous source of profit for the drug companies.

Let's look at the biggest and baddest fear mongering we've seen to date. Ever heard that joke about politicians? Here it is: How can you tell if a politician is lying? When he moves his lips.

METRO.CO.UK

Anti-vaxxers 'have blood on their hands' says health minister

Matt Hancock said he wouldn't rule out making childhood vaccination...

Anti-vaxxers have blood on their hands? Care to give a name of ONE anti-vaxxer with blood on their hands? We're not asking for hundreds, just ONE.

This one takes the cake. Matt Hancock is probably the Richard Pan of Britain. If you don't know who Richard Pan is—he's a US (D) Senator from California. He received \$100,000 from the drug companies and god knows how much more behind the scenes, and after he leaves office. He's been pushing mandatory vaccination in California.

If Mr. Hancock cared about people's health, he would publicly list the vaccine ingredients and side effects. Then let the people decide. Furthermore, he should show the number of SIDS cases caused by vaccines. Then the number of child autism, cancer, and autoimmune disease cases related to vaccination.

Vaccines don't work. Every argument after that is blah blah blah.

Everyone needs to get vaccinated! Use your brains, you dumbasses! If you're susceptible to side effects, then spread them out or delay them.

This is as dumb as "If your vaccine doesn't work, vaccinate again, and

again...” If vaccines are safe and effective, why would you need to delay them or spread them out? Spreading out poison is still putting poison in your body. The cumulative effect comes into play. You just die slower.

Vaccines saved millions of lives! Look at the history. Anti-vaxxers are morons for arguing against history! Listen to historians and scientists!

This is where the fraud gets insidiously deliberate and deep, perpetrated by trolls with no conscience. Sometimes lies are easier to prove than half-truths. To understand the eradication of diseases throughout history, we need to look at data from 50 or more years. Again, 50 or more years. Let's look at the measles as an example again. The graph below shows data for 50+ years. It's clear from the graph that vaccine had nothing to do with reducing measles mortality rate.

60 years (from 1900 to 1960) of data clearly showing that measles was nearly eradicate without

vaccines. You can never fully eradicate a disease—that is have a zero incident rate. Diseases will always be around. Eradication means only an acceptable, small percentage of the population has the disease.

Using 60 years of data, we see that vaccines weren't needed. Now, if we look at the graph above again, we see that the measles reached near eradication status starting in 1945 and the mortality rate remained nearly constant from 1945 to 1960.

Now, if you wanted to show vaccines eradicated measles, how would you do it? You would use the data from 1945 - 1960—any of those years.

TABLE 18.4 The Effectiveness of Universal Immunization in the United States		
Disease	Cases per Year Before Immunization	Decrease After Immunization
Smallpox	48,164 (1900–1904)	100%
Diphtheria	175,885 (1920–1922)	Nearly 100%
Pertussis (whooping cough)	147,271 (1922–1925)	93.4%
Tetanus	1,314 (1922–1926)	98.1%
Paralytic poliomyelitis	16,316 (1951–1954)	100%
Measles	503,282 (1958–1962)	Nearly 100%
Mumps	152,209 (1968)	99.8%
Rubella (German measles)	50,230 (1966–1969)	98%
<i>Haemophilus influenzae</i> type b invasive disease	20,000 (estimated)	99.8%

Using slight of hand to show the measles vaccine eradicated the measles. They only used the years 1958-1962. By that time, the measles death rate had already declined by 98%, then the measles vaccine was introduced. Source: Microbiology- Nester's Microbiology: A Human Perspective- Anderson/Salm/Allen, 9th Edition

They're only showing you the tail end of those diseases—the last 5 years. If they showed the entire 60 or so years, you'll get the entire picture. And that entire picture is that vaccines had nothing to do with the eradication of the measles.

Think of it like this: There are 100 ants in your home. You got rid of 98 of them. Your neighbor comes over and there are two ants left. He kills the last 2 and said that he killed 100% of the ants. He's not lying. When he came over, there were 2 ants left and he killed them both. Technically, he did kill 100% of the ants (that were remaining when he came over).

Health Canada did the exact same thing. Instead of using 50+ years of data, they used 5 years (the most favourable before vaccines were introduced). This gave the impression that vaccines eradicated diseases, when they had nothing to do with it.

VACCINES WORK

DISEASE		CASES THEN*	CASES NOW**	DECREASE
WHOOPING COUGH		19,878	1,275	93%
MEASLES		61,370	83	99%
CHICKENPOX		72,343	464	99%
MUMPS		43,671	94	99%
DIPHTHERIA		9,010	0	100%
POLIO		5,384	0	100%

* Highest number of cases in a single year in the five years preceding vaccine introduction.

** Data for measles are from the Canadian Measles and Rubella Surveillance System (CMRSS). All other data are from the Canadian Notifiable Disease Surveillance System (CNDSS). Most recent report of cases in Canada in 2013. 2013 is the most recent validated data available for publication.

This chart is selective and deceptive. Using selective 5 year data, it appears diseases were eradicated by vaccines. But using 50+ year data, vaccines had no role in eradicating diseases.

“There are three kinds of lies: lies, damned lies, and statistics.” —Mark Twain

Do you see what you’re up against now? The entire system is corrupt so that everyone in the system can make money at the expense of your health, and even life.

Common Tactics Trolls Use

FEAR. The drug companies are petrified of people learning the truth. Knowledge is spreading to the masses that vaccination is based on fraud. This affects sales and the drug companies will do whatever it takes to use FEAR (fake vaccine outbreaks) to create vaccine demand. They have gone as far as pushing mandatory vaccination. If their “safe and effective” products are so great, there would be no anti-vaxxers and they wouldn’t have to force it on the people.

HITTING THE LAUGHING EMOJI. When you present overwhelming facts, they cannot counter and take the lazy way out by hitting the laughing emoji. Hitting the laughing emoji when someone presents facts is a sign of intellectual laziness.

CITE YOUR SOURCE. When you cite sources from nurses, doctors, and scientists, they hit the laughing emoji. Again, a sign of ignorance or stupidity. Or ask them to cite sources that show vaccines are safe and effective. They’re trying to sell you a product. The onus is on them to prove to you the product works.

DISCREDIT PARENTS OF VACCINE INJURED CHILDREN. Parents are now connecting the dots between their sick or dead children to vaccines. Many simply read the vaccine ingredients and side effects and immediately made the connection. Drug companies don’t want informed parents. Informed parents are a threat to drug companies’ profits.

MY FAMILY IS ALWAYS UP TO DATE WITH THEIR VACCINES. That’s

awesome. Please post the vaccine ingredients and side effects. Also, post the mortality rate of the vaccinated vs. unvaccinated of the illness/disease you're vaccinating for. Most people don't even know what they're vaccinating for, never mind the mortality rates of those diseases.

BLAME EVERYTHING ON THE ANTI-VAXXERS. Anti-vaxxers are a threat...a threat to drug company profits. It's always the vaccinated that spread diseases and cause outbreaks, but the media blames the unvaccinated. Why? Because the media receives billions of advertising dollars from the drug companies.

ANTI-VAXXERS present facts, data, statistics, testimonials from parents with vaccine injured children, information and data from doctors and scientists.

PRO-VAXXERS (trolls) mostly use fear, shame, and blame. They appeal to emotions to sell vaccines, because the marketing departments of the drug companies know that people make decisions based on emotions, and rarely on reason. They will go against reason if they feel strongly about something.

The drug company that makes the M.M.R. vaccine (Merck) publishes an extensive list of warnings, contraindications, and adverse reactions associated with this triple shot. It may be found in the vaccine package insert that is given to doctors administering M.M.R., and inside the Physician's Desk Reference (PDR)(8,9). However, this information is never given to patients or parents. The original M.M.R. insert is quoted immediately below.

An Excerpt from the Original M.M.R. Drug Insert

The following afflictions affecting nearly every body system -- blood, lymphatic, digestive, cardiovascular, immune, nervous, respiratory, and sensory -- have been reported following receipt of the MMR shot: encephalitis, encephalopathy, neurological disorders, seizure disorders, convulsions, learning disabilities, subacute sclerosing panencephalitis (SSPE) demyelination of the nerve sheaths, Guillain-Barré syndrome (paralysis), muscle incoordination, deafness, panniculitis, vasculitis, optic neuritis (including partial or total blindness) retinitis, otitis media, bronchial spasms, fever, headache, joint pain, arthritis (acute and chronic) transverse myelitis, thrombocytopenia (blood clotting disorders and spontaneous bleeding) anaphylaxis (severe allergic reactions) lymphadenopathy, leukocytosis, pneumonitis, Stevens-Johnson syndrome, erythema multiforme, urticaria, pancreatitis, parotitis, inflammatory bowel disease, Crohn's disease, ulcerative colitis, meningitis, diabetes, **autism**, immune system disorders, and death (Figure 49).(10,11).

The M.M.R. vaccine manufacturer has begun censoring autism from the package insert for its second version of the M.M.R. vaccine ("M.M.R. 2"). Most of the above indications continue to be listed, but the indication of an autism link, which has been selectively removed. The

Side effects and adverse reactions are not the same!

A way to weasel out of the issue to is offer a statement like this, "Side effect is an adverse drug reaction where causality is established. whereas an adverse event is any random bad thing that has been reported after a drug has been administered, without the demonstration of a link back to the product. in healthcare it is the adverse drug reactions, those bad events that have a proven medical link to a drug, that are clinically meaningful and actionable. The body of scientific evidence that has been gathered to date, vaccines do not cause autism."

You can use weasel words or any verbiage you want. However, in practice, side effects and adverse reactions ARE THE SAME: Unintended or unwanted events of using a product that must be reported.

Heavy metals are in vaccines. Heavy metals cause brain damage. Autism is a form of brain damage. Vaccinated children have high rates of autism. Do vaccines cause autism? Do you see a link between the heavy metals in vaccines and brain damage in vaccinated children?

Cigarette smoking does not cause cancer

-CDC (Center for Disease Control) [1958]

Vaccines do not cause autism

Using FEAR to Sell Vaccines

“Vaccination is a business based on FEAR.” —Dr. Gerhard Buchwald, MD

The biggest fear of any parent is to lose their child, especially if that loss can be prevented. Increasingly doctors, nurses, and pediatricians are bullying, shaming, and coercing new parents into vaccinating their newborns. Those medical personnel may say, “You’re being irresponsible. It’s child abuse not to vaccinate your baby. I’m a doctor. I know more than you and what’s good for your baby. Your baby will die if you don’t vaccinate it. You need to vaccinate that baby before it dies. You will be held responsible.”

If you are informed, you should be thinking, or replying, “Before I make a decision, I would like to practice my right to informed consent. I would like to know what vaccines you’re recommending, and their ingredients and side effects. I would like to read the vaccine inserts, so please provide them for me.

“I would also like to study all safety and efficacy studies of the vaccines you’re recommending—those studies must be independent and not from the drug companies that make the vaccines. I would like to see the injury and death rates of those vaccines.

“I would like to know the incident rate and mortality rate of those diseases—of the vaccinated versus the unvaccinated.

“And if you’re willing to sign a legal document guaranteeing that the vaccines you’re recommending are 'safe and effective'.

“I also want to know who will be legally responsible if my child is injured or killed by the vaccines.

“I also want to know if there’s any conflict of interest, that you may be receiving bonuses based on vaccination quotas.”

Or a simple, “This is an important decision. Let me think about it and get back to you, doctor,” will do.

There have been instances in which parents outright refused, even stated in writing, to vaccinate their infants but those infants were vaccinated when the parents weren't around. Always stay with your infant because of the vaccination issue, and more importantly, medical kidnapping is becoming common in the US. Even when your baby is vaccinated without your permission and it is injured or killed, you will be blamed for the mistakes of the medical industry. This is to deter you from suing them. Modern medicine is a business, it has nothing to do with making people healthy. If people are healthy, the medical industry doesn't make money.

EVOLUTION OF AUTISM

We don't know what causes autism

Vaccines do not cause autism

Vaccines may cause autism in predisposed individuals

There is a minimal risk that vaccines cause autism

Vaccines cause autism

|

When they can no longer defend the position:

Autism creates neuro biodiversity and is a gift.

Brain damage is a gift from the vaccine makers.

Right, like lung cancer is a gift from the tobacco companies.

Autism is a form of brain damage. It's being sold as a "gift" by the drug companies.

You are the employer and the doctor is the employee. YOUR DOCTOR WORKS FOR YOU. YOU DON'T WORK FOR YOUR DOCTOR. Your doctor's income depends on the services and products that you purchase from them. The onus is on them to prove that vaccines are safe and effective, not the other way around. You have nothing to prove to your doctor about vaccines, the doctor has to prove to you why you should get vaccinated. Vaccines are consumer products dressed as disease prevention and under the guise of public good. Purchase vaccines like you would a major purchase.

The measles outbreaks of 2019 were clearly based on fraud. The vaccine had no role in reducing the measles death rate. Sanitation, hygiene, and nutrition eradicated most diseases. The measles is caused mostly by a vitamin A deficiency, just like scurvy was caused by a vitamin C deficiency.

Understanding Disease Outbreaks: INCIDENT RATE vs. MORTALITY RATE

To understand how selling “disease outbreaks” work, we need to understand the difference between the incident rate and the mortality (death) rate.

INCIDENT RATE. The incident rate is the number of times something occurred. As examples,

- 250 million confirmed cases of people crossing the street
- 90 million confirmed cases of people driving vehicles
- 60 million confirmed cases of people walking the stairs
- 50 million confirmed cases of people falling down

-10 million confirmed cases of people swimming

-556 confirmed cases of the measles

-1 500 confirmed cases of the measles

The incident rate tells us the number of times an event happened. We know that people die crossing the street, driving, swimming, falling down the stairs, falling out of bed, and they even die from the measles. Of those “confirmed cases”, how many died?

According to the CDC (a private corporation that sells and markets vaccines) guideline, an INCIDENT rate of 3 (three) can be considered an “outbreak”. See how ridiculous that is?

MORTALITY (DEATH) RATE. The mortality rate (aka the death rate) is the number of people who died based on the incident rate. For example, if 250 million people cross US streets everyday, how many died a day? Or if 90 million drive in the US everyday, how many died? Now, you can scare people by flashing death statistics and gruesome pictures of those who died driving, swimming, crossing the street, or falling down the stairs. Most will be horrified because they don’t understand the difference between the incident rate and the mortality rate.

When you watch the mainstream media, they always use the “confirmed cases” for the incident rate, not the mortality (death) rate. In other words, during all the disease outbreaks, the media has not named a single unvaccinated person who has died, because not a single unvaccinated person has died during these disease outbreaks that is “threatening national security/health”. Essentially, if unvaccinated, you have a higher chance of dying from a lightning strike than those “vaccine preventable diseases”. In other words, don’t get vaccinated. It is always the vaccinated who have higher illness, disease, and death rates.

U.S. DISEASES BY THE NUMBERS: **BEFORE** VACCINES

Vaccines were gradually introduced between 1945 and 1995. Have you ever wondered just how many people died or suffered permanent harm from each disease before the vaccine was implemented?

DISEASE NAME (VACCINE INTRODUCED)	FATALITY/HARM (BEFORE THE VACCINE)	POPULATION NOT HARMED (BEFORE THE VACCINE)
POLIO (1955)	1 in 100,000 (fatalities/paralysis) <i>people in the population</i>	99.999%
MEASLES (1963)	1 in 500,000 <i>people in the population</i>	99.9998%
PERTUSSIS (late 1940s) <i>whooping cough</i>	1 in 77,000 <i>people in the population</i>	99.9987%
TETANUS (late 1940s)	1 in 200,000 <i>people in the population</i>	99.9995%
MUMPS (1967)	1 in 2,000,000 (fatalities/sterility/deafness) <i>people in the population</i>	99.99995%
RUBELLA (1963)	1 in 1,000,000 (fatalities/birth defects) <i>people in the population</i>	99.9999%
DIPHTHERIA (late 1940s)	1 in 83,000 <i>people in the population</i>	99.9988%
CHICKEN POX (1995)	1 in 2,300,000 <i>people in the population</i>	99.999957%
HEPATITIS B (1991)	1 in 1,400,000 <i>population without high-risk behavior</i>	99.999929%
HIB (1985)	1 in 600,000 (fatalities/brain injury/deafness) <i>people in the population</i>	99.999833%

The date the vaccine was introduced refers to the first widespread use in the United States for each vaccine.
The fatality/harm rate reflects the number of people who died or suffered permanent harm from each disease out of the total population at that time.

Brought to you by Immunity Education Group: ImmunityEd.org

There is no reason for anyone to get vaccinated. In most cases, you are more likely to be struck by lightning than dying from "vaccine preventable diseases."

Vaccines often cause the very disease they're supposed to prevent, because the person is injected with viruses and diseases. If we examine every "disease outbreak" reported in the mainstream media dating back to the 1850s, we find that the vast majority of those affected had been vaccinated. As examples,

—The Disneyland measles "outbreak", Dec. 2014. About 59 "confirmed cases". The majority were vaccinated and the vast majority who were ill were vaccinated. Mortality rate: 0 (no confirmed deaths).

—Oregon measles outbreak, Jan. 2019. Up to 80 "confirmed cases". Mortality rate: 0 (no confirmed deaths). Some politicians called for mandatory vaccination with no philosophical, medical, or religious exemption.

—Temple University "mumps outbreak", March 2019. About 74 "confirmed cases". Nearly every student had been vaccinated. Mortality rate: 0 (no confirmed deaths).

—Rockland County, New York, measles outbreak, March 2019. About 186 "confirmed cases", but later revised to 5 cases because the 186 cases were since October 2018. Mortality rate: 0 (no confirmed deaths). The government (politicians who received campaign contributions from the drug companies) threatened door-to-door vaccination, but was overturned by the court. Rockland County, New York, was predominantly Orthodox Jews and had the lowest vaccination rate. The county was the healthiest in New York state. Lowest vaccination rate, highest health rate. Coincidence?

—USS Fort McHenry amphibious warship mumps outbreak, March 2019. The ship had been quarantined in the Persian Gulf for two months due to a "mumps like illness" viral infection. All 703 personnel aboard were vaccinated for the mumps, and got the mumps anyway. It cannot return to port until 30 days after the last reported case. This is the perfect example of those who vaccinate get the disease they're vaccinated for. Sample size: 703, 100%.

—New York City “measles outbreak”, April 2019. Up to 626 “confirmed cases”. Mortality rate: 0 (no confirmed deaths). More people die crossing NYC streets than the measles and other diseases. The city targeted Yiddish Jew community because of their low vaccination rate and high health index. The city planned to fine anyone \$1,000 if they refused vaccination.

—Indiana University mumps “outbreak”, April 2019. About 20 confirmed cases. All cases (students) had been vaccinated. The MMR vaccine failed so the students were asked to get “booster shots”, some even a third time. This is nonsense because they were vaccinated and got the disease they were vaccinated for, and were asked to vaccinate again when vaccines, in theory, are meant to prevent disease.

Again, the CDC guideline states that an INCIDENT rate of 3 (three) can be considered an “outbreak”. See the silliness of all this fraud in order to sell vaccines and enrich the drug companies?

Figure 19.—Death Rates for Measles: Death-registration States, 1900–32, and United States, 1933–60

(Rates per 100,000 population).

In 1962, the measles death rate had declined by 98%. In 1963, the measles vaccine was introduced. Read that again.

https://www.cdc.gov/nchs/data/vsus/vsrates1940_60.pdf

The measles death rate had declined by 98% due to improvements in nutrition. The measles is often caused by a Vitamin A deficiency, just like scurvy was caused by the vitamin C deficiency.

"Measles is a self-limiting infection of short duration, moderate severity, and low fatality." —Dr. Alexander Langmuir (1910-1993), former head of the CDC, the father of infectious disease epidemiology

Debbie Dickl-Romaldo

2 hrs · 🌐

Honestly, high doses of Vitamin A.

"Treatment: There is no specific antiviral therapy for measles. Medical care is supportive and to help relieve symptoms and address complications such as bacterial infections.

Severe measles cases among children, such as those who are hospitalized, should be treated with vitamin A. Vitamin A should be administered immediately on diagnosis and repeated the next day. The recommended age-specific daily doses are

50,000 IU for infants younger than 6 months of age

100,000 IU for infants 6–11 months of age

200,000 IU for children 12 months of age and older"

Source: <https://www.cdc.gov/measles/hcp/index.html>

"Vitamin A deficiency is a recognised risk factor for severe measles. The World Health Organization (WHO) recommends administration of an oral dose of 200,000 IU (or 100,000 IU in infants) of vitamin A per day for two days to children with measles in areas where vitamin A deficiency may be present."

CDC.GOV

Measles | For Healthcare Professionals | CDC

Measles is an acute viral respiratory illness. Healthcare professionals, learn more about measles clinical features, complications,...

The measles went from a benign illness prior to 1963, to a life threatening disease after the measles vaccine was introduced in 1963, to a public health and national security threat in 2019.

The measles is accompanied by a week's rash and skin irritation. It is used by the drug companies to scare people because of the visible rash. Before the measles vaccine was introduced in 1963, very few people feared the measles. Parents would encourage their children to get the measles early and get it over with. Measles was considered a benign illness that had health advantages later in life, such as lifelong immunity and fighting cancer. After the measles vaccine was introduced in 1963, the drug companies started their fear campaign and reclassified measles from a benign illness to a life

threatening disease. Then in 2019, the measles was suddenly threatening public health and national security, despite no one dying from the measles during the "measles outbreaks".

THE MEASLES THROUGHOUT THE DECADES

Prior to 1963, before the measles vaccine was introduced.

The measles was classified as a benign ILLNESS that conferred health advantages, such as lifelong immunity and fighting cancer later in life.

The measles was mostly caused by a vitamin A deficiency, just like scurvy was caused by a vitamin C deficiency.

No one feared the measles.

After 1963, when the measles vaccine was introduced

The measles was reclassified as life threatening DISEASE.

The measles death (mortality) rate had declined 98% BEFORE the measles vaccine was introduced.

People were made to fear the measles by the drug companies after the measles vaccine was introduced.

2019, when the drug companies and corrupt politicians began pushing mandatory vaccination.

The measles suddenly became a public health and national security threat.

During the "measles outbreaks that threatened public health and national security", the media failed to name a verified unvaccinated person who died from measles.

More people die from lightning strikes than the unvaccinated die from the measles.

"Measles is a self-limiting infection of short duration, moderate severity, and low fatality." —Dr. Alexander Langmuir (1910-1993), former head of the CDC, the father of infectious disease epidemiology

The media will ignore the fact that it's the vaccinated who spread diseases

and blame the unvaccinated for the “measles outbreaks”. Furthermore, the media even encourages the unsuspecting to get vaccinated, when vaccines caused those outbreaks. In 2018, the media received over \$5 billion of advertising from the drug companies. The reason why the media keeps parroting “vaccines are safe and effective” is obvious. Unvaccinated people are informed and don’t make money for the drug companies, media, hospitals, doctors, pediatricians, and pharmacies. So the unvaccinated are scapegoated. But more people are becoming informed (awakened) because they are vaccine injured, or their children are vaccine injured, or they know someone who is vaccine injured.

During these disease outbreaks, the media has failed to,

1) Name an unvaccinated person who has died during these disease “outbreaks”.

2) Name an unvaccinated person who has infected a vaccinated person and caused that vaccinated person to die.

Again, don’t vaccinate and you’ll be fine during these outbreaks that threaten national health and security.

• Gentle Informants •

One of the largest rallies/protests in Leicester, England in 1885 drew out over 100,000 people who were against forced vaccination. Props included a child's coffin and an effigy of Jenner (grandfather of vaccines) to damage and destroy! The rally was successful and exemptions were started. These efforts aided in lowering vaccination rates.

We can do this. They've done it before.

[#wearenotalone](#)

Anti-vaccination movements have been around since the 1850s, when mandatory (compulsory) vaccination was implemented in England.

What disease do you fear dying from?

Do you know what causes that disease?

Do you know the death rate of that disease if you vaccinate?

Do you know the death rate of that disease if you don't vaccinate?

If you can't answer those questions, why are you vaccinating?

Using Reverse Psychology On the Drug Companies

Let's have some fun and instill fear into those who want to vaccinate.

So you want to vaccinate your baby?

Get a coffin ready.

SIDS (Sudden Infant Death Syndrome) is the leading cause of infant death in the US.

SIDS is listed as a side effect of infant vaccines.

Educate before you vaccinate.

Do you know the name of the disease you're vaccinating against?

Do you know what causes that disease?

Do you know the mortality rate of the disease?

Do you know the injury rate of the vaccine?

Do you know the death rate of the vaccine?

Do you know the death rate of the unvaccinated versus the vaccinated for that disease?

If you don't research vaccines and something happens to your child, you should be charged with child abuse, manslaughter, or murder, depending on what happens to your child.

Trung Nguyen If you vaccinate your kids, you should be charged with child abuse and even murder if they die of SIDS.

Like · Reply · 4m

Trung Nguyen Every single person I know in real life doesn't know the name of the disease they vaccinate for. They don't know the mortality rate of that disease. They don't know the injury and death rates of the vaccine. They should be charged with negligence.

Like · Reply · 1m

It should be mandatory that parents research vaccines before they vaccinate their children. Otherwise, if something goes wrong they should be charged with negligence or child abuse. If the child dies due to vaccines, the parent should be charged with murder.

"I have lectured all over the world...I have always had a special interest in newspapers. All of them have one thing in common, there is always some reference made to some epidemic in some part of the world. For instance, two years ago, one paper referred to a polio epidemic in Holland. For the past three years, our newspapers have commented on the diphtheria epidemic in Russia. By these means, the population is constantly threatened with epidemics, they have been made to fear them, and the reports always conclude: Go and get vaccinated...To create fear among parents to strengthen their motivation to vaccinate is an important part of the publicity used to promote vaccinations. A whole branch of research is examining the question: What level of fear needs to be created to appear as convincing as possible?" — Dr. Gerhard Buchwald, MD

Politicians shouldn't be allowed to accept bribes disguised as political contributions from the pharmaceutical industry in exchange for them writing and voting for bills that become law.

Doctors should not be allowed to accept bonuses from the pharmaceutical industry based on the percentage of their patient's vaccinations nor on which brand of drugs they prescribe.

Anti-vaxxers aren't spreading diseases they don't have. Anti-vaxxers are spreading the truth about vaccines.

Rest assured that as more people awake to the vaccination fraud, vaccine sales will plummet, and you'll be inundated with these disease outbreaks that threaten national health and security. The solution: arm yourself with knowledge. Turning off the mainstream media would also help.

Anti-Vaxxers Are Now A Top 10 Global Health Threat, According To...

 <https://www.buzzfeednews.com/article/carolinekee/who-top-health-threats-2019-anti-va...>

The World Health Organization has published its top 10 threats to global health in 2019, and some interesting additions are in the list. Each year, the WHO releases a list of the top health threats facing the global population; the list helps inform policies and action plans. The 2019 list includes ...

World Health Organization: Anti-Vaxxers A Threat To Global Health...

Announcement:

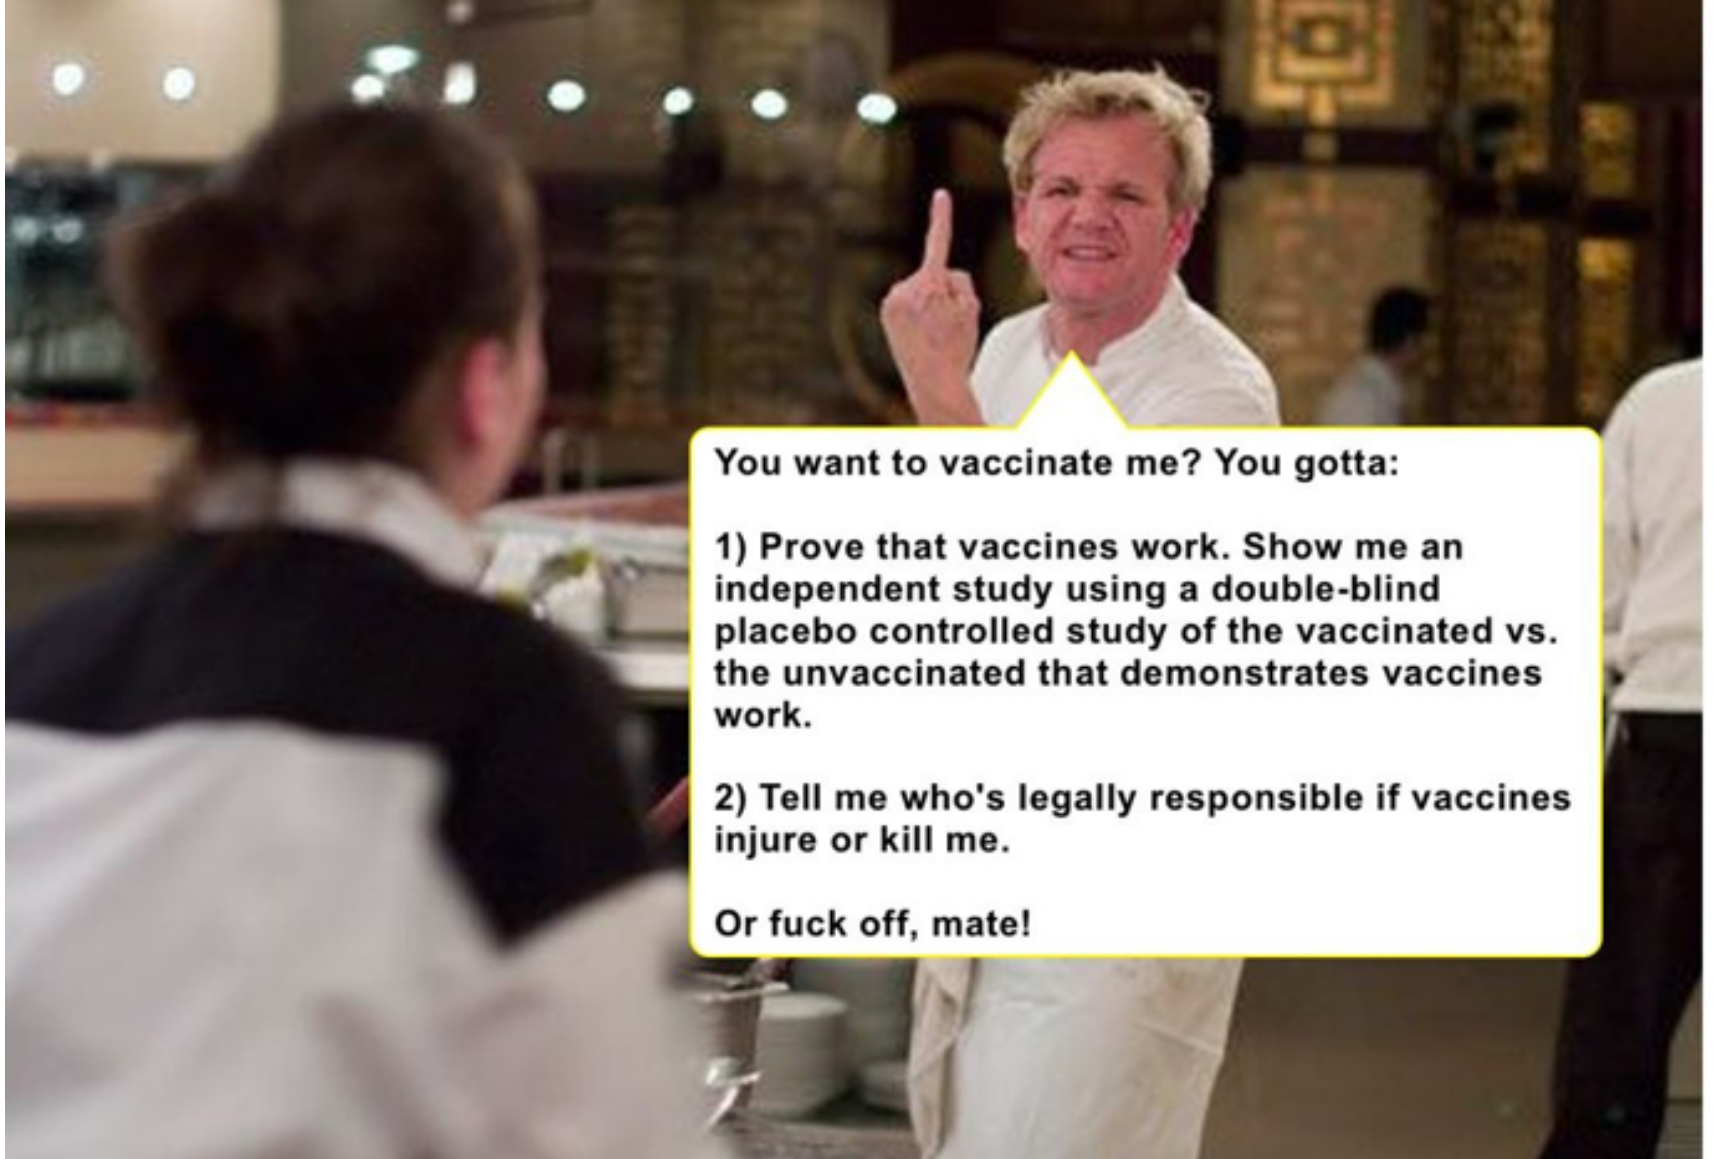

We have just decided that the term anti-vaxxer will no longer be used.

Those who oppose vaccinations will now be called pro-plague.

Hey stupid anti-vax idiots, you just got MURDERED by WORDS

Troll gone overboard. In general, pro-vaxxers have a LOW IQ. They can't read books, can't read a basic table of data, and can't read a basic graph if their lives depended. That's the reason they resort to name calling, fear, and blame.

It takes a lot research to reach your own conclusion about vaccination. Along the way, you'll meet many low IQ pro-vaxxers who have nothing to offer but fear, shame, blame, and lies to convince you that vaccines are safe and effective. They're crooks.

There has never been a placebo controlled study of the vaccinated versus the unvaccinated to show vaccines work. The drug companies and government cite ethical reasons. The truth is that vaccinated people have much higher illness and disease rates due to vaccination. All you need to do is look at the vaccine ingredients and side effects.

In summary, with all the fear, shame, blame, and lies aside, before you vaccinate ask these questions:

- What disease are you vaccinating against? Do you know what causes that disease?
- Do you know the death rate of the disease with the vaccine?
- Do you know the death rate of the disease WITHOUT the vaccine?
- Do you know the injury and death rates of the vaccine?

In all cases, the injury and death rates of the vaccine is greater than without vaccination. In other words, you are better off NOT vaccinating.
